The COMPACT radial shock wave therapy system

Facts and figures

The highlights of this exceptionally efficient shock wave system include: compact design, integral compressed air supply, low capital expenditure and maintenance costs and maximum mobility thanks to the built-in compressor.

Facts and figures:

- Compact design: 9 kg, 34 x 34 x 15.6 cm
- Built-in »Silent« compressor
- Extended pressure and frequency range: 8 Hz/4.0 bar, 11 Hz/3.4 bar, 15 Hz/2.8 bar
- Bag or case for transport
- Optional battery-powered operation

Range of application

Range of application

Myofascial trigger points (MTrP) are the most frequent causes of acute and chronic pain in the locomotor system. Local improvement of perfusion, reduction of nociceptor activity and neuromuscular tone and local inter- and intramuscular stretching are the physiological and mechanical axioms of MTrP therapy with the MASTERPULS® MP50.

Indications:

- Calcified tendonitis of the shoulder
- Radial and ulnar humeral epicondylitis
- Patellar tendonitis
- Achillodynia
- Plantar fasciitis
- Myofascial trigger points
- Other disorders of tendon insertions
- Activation of muscle and connective tissue
- Acupuncture shock wave therapy
