## Medcontour

"Is my character beautiful?" Each of your clients / Patienten has taken up this question already, everyone wants to have a great figure. But what is a beautiful figure? Universally ideal or individual performance?

Beauty is in the eye of the beholder is well known. Beauty is not subject to any standard, but is dependent on the subjective perception of the individual. Characterized by the particular culture and its ideals of beauty. Beauty is comfortable in his own skin and his own character - harmony of body, mind and soul. Presentation and perception of a dream body are individually. No man is perfect and some people feel its one or the other feature as a beauty flaw. The ability to correct the flaw, small or large, are manifold. New to this market, treatment with ultrasonic cavitation. (MedContour)

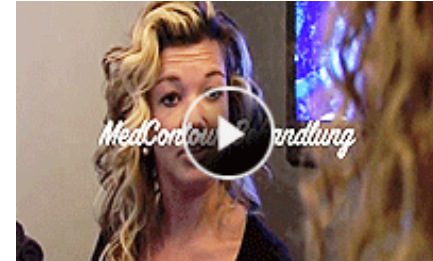

An effective and gentle method for local fat deposits and cellulite get to grips with. MedContour is a new specially developed ultrasonic Kavitationsgerät with corresponding low frequency and high frequency ultrasound bundled with two powerful heads with ultrasonic handpiece and a vacuum drainage handpiece.

MedContour is another option for surgical liposuction. In the hands of a trained Lipologen or Lipologin the system, with its two transducers an excellent way to treat larger areas. The method is particularly suitable for saddlebags, love handles and local fat deposits in the upper and lower abdomen, buttocks, hips and arms, and cellulite treatments. MedContour is the only device worldwide that sucks the tissue and allows for its low variable and the bundled ultrasonic radiation in a controlled treatment. In the programmed ultrasonic frequencies act like a cavitation. Local fat deposits and certain areas of the body can thus be specifically addressed.

Thanks to the special vacuum technology, the hand piece the obese range sucks so precise that the dual ultrasound can work specifically in the area. After treatment, the patient can immediately re-engage in his usual activities. Wound pain, long downtime as a surgical liposuction, or the dreaded bumps and waves accounted for MedContour treatment.
