20 KHz Ultrasonic Sonochemistry Equipment For Drug Extraction , Titanium Alloy

[Large Image](#) : 20 KHz Ultrasonic Sonochemistry Equipment For Drug Extraction , Titanium Alloy

Product Details:

Place of Origin: Hangzhou, China

Brand Name: FYCG

Certification: BV

Model Number: YP-S59

Payment & Shipping Terms:

Minimum Order Quantity: 1 Set

Packaging Details: Wooden Case

Delivery Time: 7-10 Working Days

Payment Terms: T/T Escrow

Supply Ability: 80 Sets/Month

Certifications

Stable machine, competitive price, rich products series.

— Alan Scott (U.K.)

Good design,make scheme according customers' requirement.

Detailed Product Description

Model:	YP-S59	Frequency:	20±1 KHz
Power:	2000 W	Voltage:	220±10% V
Temperature:	300	Pressure:	35 MPa

20 KHz Ultrasonic Sonochemistry Equipment For Drug Extraction , Titanium Alloy

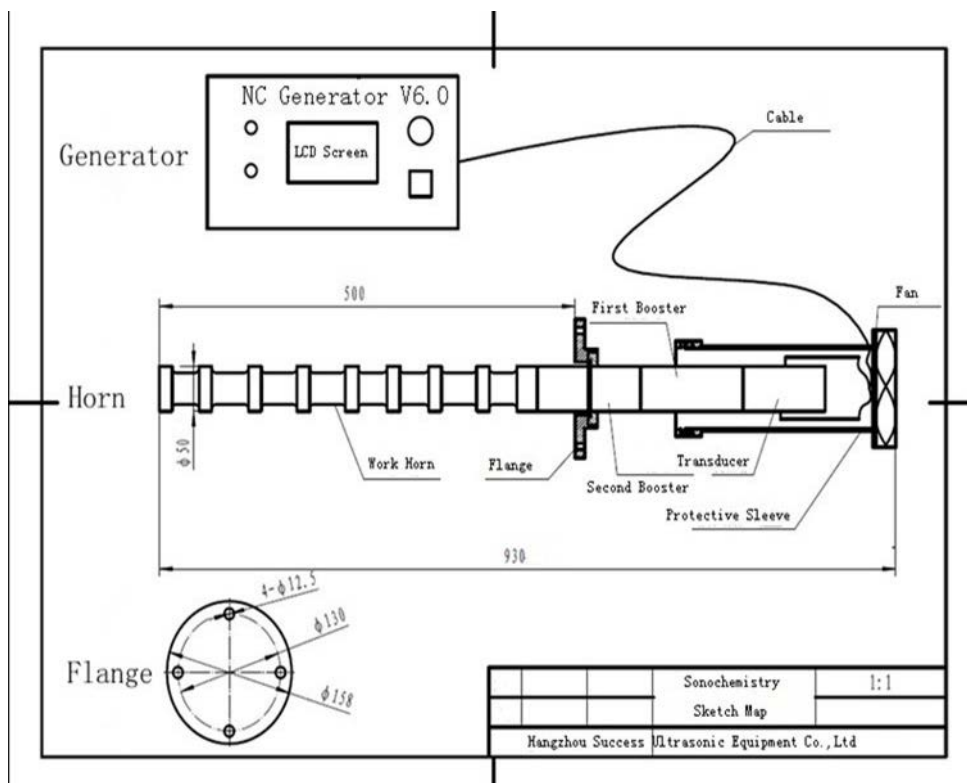

Quick Detail:

Simple, low-cost design
 Low operating costs
 High efficiency
 Low maintenance
 Faster emulsification

Description:

Ultrasonic dispersion refers to the liquid medium, the ultrasonic "cavitation" in the liquid, the liquid particles dispersion and agglomeration process.

Ultrasonic technique as a physical means and tools, can produce various extreme conditions in the liquid, a phenomenon known as sonochemistry, ultrasonic equipment related is called ultrasonic chemical equipment (referred to as "the sound of chemical equipment"). Ultrasonic dispersing device is an application of acoustic chemical equipment, can be used for water treatment, solid dispersion of particles in a liquid system, disaggregation, promoting effect of solid-liquid reaction etc.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

I'm Online Chat Now

Applications:

- Dispersion of silicon carbide in liquid
- Dispersed cell material paste
- Food powder emulsion dispersion
- The dispersion of nano carbon reaction process
- Dispersion tube phosphor materials
- Graphite particles in liquid

Specifications:

Model	YP-S53	YP-S55	YP-S57	YP-S59	YP-S61
Frequency	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz
Power	500 W	1000 W	1500 W	2000 W	3000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	300	300	300	300	300
Pressure	35 MPa	35 MPa	35 MPa	35 MPa	35 MPa
Intensity of sound	10 W/cm ²	20 W/cm ²	30 W/cm ²	40 W/cm ²	60 W/cm ²
Max Capacity	5 L/Min	10 L/Min	15 L/Min	20 L/Min	30 L/Min
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

PS:If you need more power, we can install two or more device.

Competitive Advantage:

- A single set of high power, maximum power can reach 3000W
- Work stability: continuous work around the clock
- The titanium alloy as the transducer and the tool head material, improve the vibration transmission efficiency, the service life of the equipment is greatly improved
- High temperature resistant: radiation head part, highest can withstand 600 degrees.
- High pressure: the maximum pressure 35Mpa
- A plurality of the tool head design: the effective increase of ultrasonic radiation area, the radiation effect is more uniform
- Focus on design, high energy density

Upgrade equipment is simple, no need to change the customer production equipment and the existing process

Simple installation, the standard flange butt joint installation

Yield and efficiency can be improved obviously, reduce the cost of

Sets of equipments used in combination

Detailed Product Description

Model:	YP-S57	Frequency:	20±1 KHz
Power:	1500 W	Voltage:	220±10% V
Temperature:	300	Pressure:	35 MPa
Max Capacity:	15 L/Min		

Ultrasonic Biodiesel Processor / Reactor

Quick Detail:

- Simple, low-cost design
- Low operating costs
- High efficiency
- Low maintenance
- Faster emulsification

Description:

Ultrasonic technique as a physical means and tools, can product in the reaction medium in a series of close to the extreme conditions, this energy can not only stimulate or promote many chemical reactions, accelerate the rate of a chemical reaction, and even may also change the direction of chemical reaction, generate a beat all effect and miracles.

Industrial ultrasonic sonochemistry system is mainly used for large-scale industrial production. It has big power, high efficiency, the advantages of large radiation area etc.. And can be customized according to customer needs.

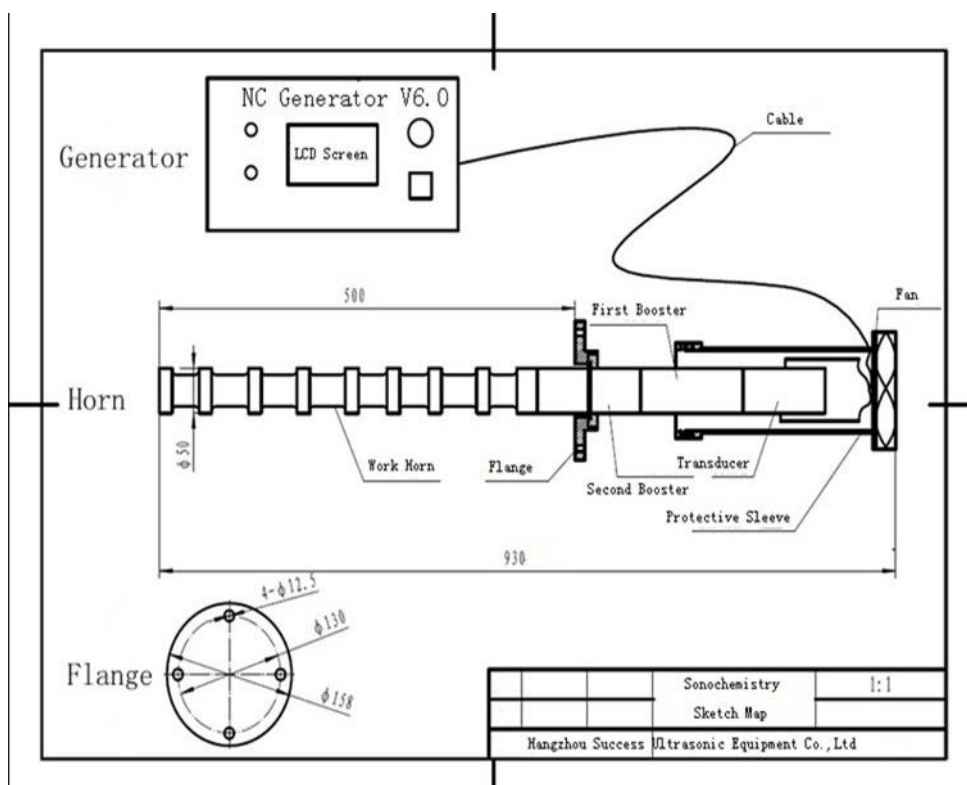

Great company!

— Julie (USA)

I'm Online Chat Now

Contact Now

Applications:

Ultrasonic in the biochemistry of the earliest applications should be used ultrasonic to crush the cell wall, to release its contents. Subsequent studies showed that, low intensity ultrasonic can promote the biochemical reaction process, such as ultrasonic irradiation can increase the speed of liquid nutrition growth of algal cells, making the cells to produce proteins increased 3 times.

Energy density and cavitations bubble collapse of ultrasonic field energy density, energy density is enlarged a trillion times, great concentration caused by energy; sound chemistry led to the phenomenon of extreme heat and pressure cavitations effect of luminescence, is unique in form of exchange of energy and substance of sonochemistry. Therefore, ultrasonic chemical extraction, biodiesel production, organic synthesis, governance microorganisms, degradation of toxic organic pollutants, the chemical reaction speed and yield, the catalytic efficiency, biological degradation, ultrasonic anti fouling, biological cell crushing, dispersion and agglomeration, and the chemical reaction is more and more important role.

Specifications:

Model	YP-S53	YP-S55	YP-S57	YP-S59	YP-S61
Frequency	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz
Power	500 W	1000 W	1500 W	2000 W	3000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	300	300	300	300	300
Pressure	35 MPa	35 MPa	35 MPa	35 MPa	35 MPa
Intensity of sound	10 W/cm ²	20 W/cm ²	30 W/cm ²	40 W/cm ²	60 W/cm ²
Max Capacity	5 L/Min	10 L/Min	15 L/Min	20 L/Min	30 L/Min
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

PS:If you need more power, we can install two or more device.

Competitive Advantage:

- Save mixing time 20%~60%
- Lower temps 30%~60%(30)
- Less methanol 5%~30%
- Less chemical (KOH) less 20%~50%

Total production cost save 15%~50%

Another benefit is the time of glycerol separation. This is also faster and one of the reasons for it is that less methanol is been used, so glycerol separation is faster.

20 KHz Ultrasonic Sonochemistry Equipment

[Large Image](#) : 20 KHz Ultrasonic Sonochemistry Equipment

Product Details:

Place of Origin: **Hangzhou, China**

Brand Name: **FYCG**

Certification: **BV**

Model Number: **YP-S59**

Payment & Shipping Terms:

Minimum Order Quantity: **1 Set**

Packaging Details: **Wooden Case**

Delivery Time: **7-10 Working Days**

Payment Terms: **T/T Escrow**

Supply Ability: **80 Sets/Month**

[Contact Now](#)

Detailed Product Description

Model:	YP-S59	Frequency:	20±1 KHz
Power:	2000 W	Voltage:	220±10% V
Temperature:	300	Pressure:	35 MPa

20 KHz Ultrasonic Sonochemistry Equipment
Quick Detail:

Simple, low-cost design
 Low operating costs
 High efficiency
 Low maintenance
 Faster emulsification

Description:

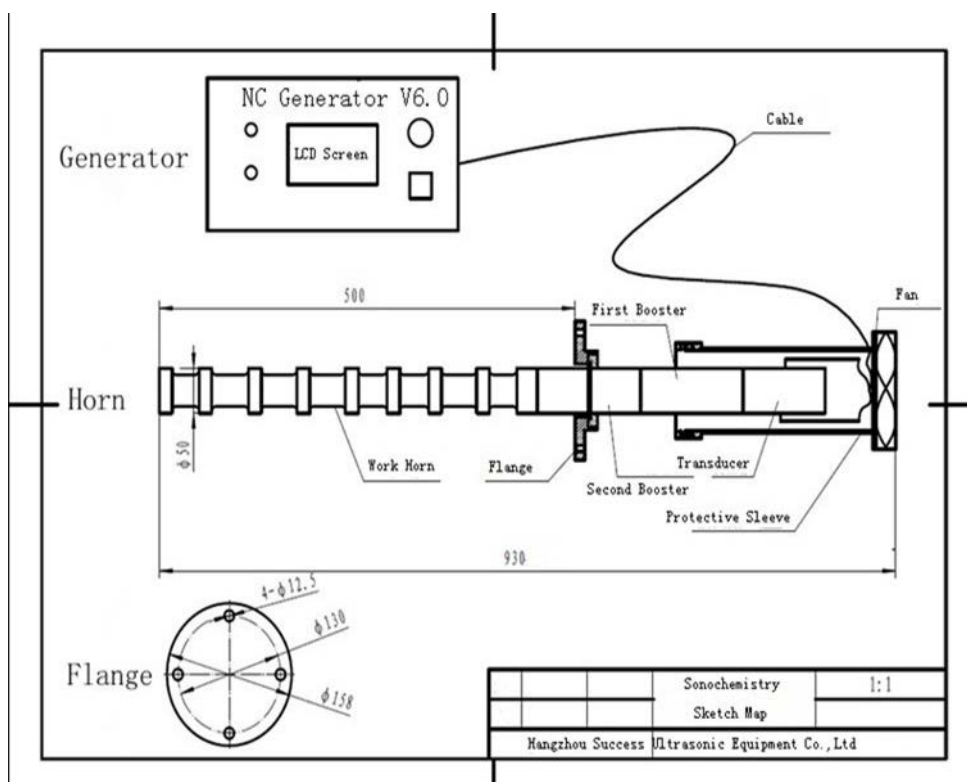

Ultrasonic dispersion refers to the liquid medium, the ultrasonic "cavitation" in the liquid, the liquid particles dispersion and agglomeration process.

Ultrasonic technique as a physical means and tools, can produce various extreme conditions in the liquid, a phenomenon known as sonochemistry, ultrasonic equipment related is called ultrasonic chemical equipment (referred to as "the sound of chemical equipment"). Ultrasonic dispersing device is an application of acoustic chemical equipment, can be used for water treatment, solid dispersion of particles in a liquid system, disaggregation, promoting effect of solid-liquid reaction etc.

Great company!

— Julie (USA)

I'm Online Chat Now

Applications:

Dispersion of silicon carbide in liquid
 Dispersed cell material paste
 Food powder emulsion dispersion
 The dispersion of nano carbon reaction process
 Dispersion tube phosphor materials
 Graphite particles in liquid

Specifications:

Model	YP-S53	YP-S55	YP-S57	YP-S59	YP-S61
Frequency	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz
Power	500 W	1000 W	1500 W	2000 W	3000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	300	300	300	300	300
Pressure	35 MPa	35 MPa	35 MPa	35 MPa	35 MPa
Intensity of sound	10 W/cm ²	20 W/cm ²	30 W/cm ²	40 W/cm ²	60 W/cm ²
Max Capacity	5 L/Min	10 L/Min	15 L/Min	20 L/Min	30 L/Min
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

PS: If you need more power, we can install two or more device.

Competitive Advantage:

A single set of high power, maximum power can reach 3000W
 Work stability: continuous work around the clock
 The titanium alloy as the transducer and the tool head material, improve the vibration transmission efficiency, the service life of the equipment is greatly improved
 High temperature resistant: radiation head part, highest can withstand 600 degrees.
 High pressure: the maximum pressure 35Mpa
 A plurality of the tool head design: the effective increase of ultrasonic radiation area, the radiation effect is more uniform
 Focus on design, high energy density

Upgrade equipment is simple, no need to change the customer production equipment and the existing process

Simple installation, the standard flange butt joint installation

Yield and efficiency can be improved obviously, reduce the cost of

Sets of equipments used in combination

Detailed Product Description

Laboratory Ultrasonic Sonochemistry Processor

Quick Detail:

Simple, low-cost design
Low operating costs
High efficiency
Low maintenance
Faster emulsification

Description:

Ultrasonic technique as a physical means and tools, can produce various extreme conditions in the liquid, a phenomenon known as sonochemistry, ultrasonic equipment related is called ultrasonic chemical equipment (referred to as "the sound of chemical equipment"). Ultrasonic dispersing device is an application of acoustic chemical equipment, can be used for water treatment, solid dispersion of particles in a liquid system, disaggregation, promoting effect of solid-liquid reaction etc.

Applications:

Ultrasonic Laboratory System: It is mainly used in laboratory tests or small scale production. It has big power, small volume, light weight, portability etc.

Specifications:

Model	YP-S11	YP-S13	YP-S15	YP-S17
Frequency	40±1 KHz	40±1 KHz	40±1 KHz	40±1 KHz
Power	500 W	1000 W	1500 W	2000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	150	150	150	150
Intensity of sound	20 W/cm ²	40 W/cm ²	60 W/cm ²	80 W/cm ²

Great company!
— Julie (USA)

Max Capacity	250 ml	500 ml	1000 ml	20 2000 ml
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

Competitive Advantage:

Many frequency selection,
Has the advantages of small volume, light weight, portable operation,
Time, function arbitrarily set
Can be designed according to the requirements, wide applicability
Focusing type design, improve the experimental efficiency

CERTIFICATE

IQNet and CQM hereby certify that the organization

Hangzhou Success Ultrasonic Equipment Co.,Ltd.

Head Office: No.205-T, Yuying North Road, Fuchun Street, Fuyang City, Hangzhou City, Zhejiang, P.R.China
 Certification Add: No.205-T, Yuying North Road, Fuchun Street, Fuyang City, Zhejiang, P.R.China

Postcode: 311400

is in conformity with

ISO 9001:2008 Standard

This certificate is valid to the following product(s)/service:
Design, development and production of ultrasonic transducer and ultrasonic generator

Issued on: 2011-07-25

Validity date: 2014-07-24

Registration Number: CN-00211Q13473R1M

[Signature]

Michael Drechsel
 President of IQNet

[Signature]

Zhang Wei
 President of CQM

IQNet Partner:

Hangzhou Success Ultrasonic Equipment Co., Ltd

Company Details:

Business Type:	Manufacturer Exporter Seller
Main Market:	North America South America Western Europe Eastern Europe Eastern Asia Southeast Asia Middle East Africa Oceania Worldwide
Brands:	FYCG
No. of Employees:	100~200 People
Annual Sales:	US\$ 4 Million - US\$ 5 Million
Year Established:	1995
Export p.c.:	70% - 80%

Introduction History Service Our Team

Our company is the leading manufacturer in high-power ultrasonic device in China with its registered trademark<FYCG> .

Our company has a strict quality inspection system.

Our firms have gathered the top talents in ultrasonic transducer and generator for designation and production, closely watching on the advanced techniques abroad and never hesitates to import in. Strictly abiding to the QC system of ISO9000, having reached a service idea of our success is all because of your success; we cautiously do our best to produce each transducer. The reliability of brand has widely accepted by most customers in domestic market and the kind serve has also obtained the most confidence. After decade hard working, our firms are now the best privacy manufacturer in high-efficiency ultrasonic transducer in PR China. We are now far beyond other competitors both in quality and market shares. Now we are proud to be the most important supplier in core parts and technique supporting for most OEM customer in domestic markets. Though we are unknown, the excellent quality of customers' products depends on ours.

To make the best ultrasonic transducer is our constant target, and develop with you is our eternal pursuit.

Detailed Product Description

Model:	YP-D45	Frequency:	28 KHz±1 KHz
Power:	200 W	Generator:	ZJS-500N
Working Type:	Intermittent	Shape:	Pistol Type
Applications:	Car, Motorcycle, Stationery, Daily Necessities, The Application Of The Sports Industry, The Packaging I		

28 KHz Mobile Spot Ultrasonic Welding Machine For Plastic PVC UPVC HDPE , High Power

Quick Detail:

Stable, safe use

According to the need to set the working time

Convenient and safe operation

The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

Efficiency: The welding process is very fast, welding time is only 0-999 seconds.

Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).

Quality: Finished product is hermetic sealing (airtight and watertight).

Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).

Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Working Mode: PLC Or Manual Model: YP-D77

Frequency: 60Khz Applications: Car, Motorcycle, Electronic Products, Household Appliances, Stationery, Daily Necessities, The Applicati

60 KHz High Frequency Ultrasonic Welding Machines , Spot Welder For Smart Card

Quick Detail:

Steady welding point, completely eradicate insufficient solder

Save labor and cost

Search the frequency automatically

Description:

During the past half year, with many effort from the research development section of our company, at present we have successfully promote the intelligent card welding equipment substantially. After promotion, comparison with the former one, the properties of the equipment has been promoted highly, more stability, better in search the frequency at more wide range, and much better appearance. On the process using the former 60K equipment, with the damage of the welding horn, the frequency would be altered.(the frequency is decided by the size of the product).When the frequency is altered to a certain degree, the ultrasonic generator would be difficult to coincide with the frequency, then influencing to the normal running of all the ultrasonic system.

Applications:

The equipment is used for the coil embedded in a smart card.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Specifications:

Model	YP-D77
Frequency	60Khz or custom made
Working Mode	PLC or manual
Material of Head	Wear-resisting alloy steel, HRC≥50
Hole for line	φ0.3 mm, φ0.5 mm or custom made
Cable	2M
Generator	V1.5
Size of generator	250*250*120 mm
Size of Shell	φ25*100 mm
Material of Shell	Nylon or aluminium
Cooling mode	Compressed air(φ4 mm)

I'm Online Chat Now

 **Contact Now**

Competitive Advantage:

Steady welding point, completely eradicate insufficient solder technically.

The size of welding spots is the same, equality line, good effect on uniformity.

The welding spot is small, wouldn't increase the weight of the coil, easy to do lamination and encapsulation.

To leave out the immersion tin step before doing welding, save an operator.

After skilled in welding, much faster than the way to use searing iron to do weld.

On the process on manufactory, there is no waste gas, waste rubbish on pollution, runs in quiet and no noise.

To select the frequency 60KHz, one machine could drive 5-10 ultrasonic products, the speed to do welding is much faster.

Low power consumption, to save production cost for manufactory enterprise.

Detailed Product Description

Model:	YP-F51	Frequency:	35 KHz
Power:	400 W	Power Adjust Method:	File Or Continuous

Portable Ultrasonic Welding Machine For Seamless Sewing / Non-woven Fabric Sewing , 100r/min

Quick Detail:

- Fast weld
- High strength
- Good tightness
- Simplicity of operator
- Low energy consumption

Description:

The work method of Seamless sewing part is completely imitating traditional sewing machine. The biggest characteristic is the ultrasonic transmit horn work direction is same with the sewed cloth. Which will make the sewed point of the cloth are even, flat and fastness. Through suitable design, it can reach perfect sewing effectiveness.

Applications:

Usually used in clothing industry is the ultrasonic lace machine, which is mainly used in cutting and welding cloth. Owing to its transmit horn is a plane, so it only can turn its own geometric center and cant turn the same direction with the cloth. Which make the sewed point of the cloth is unevenness. The transmit horn of Seamless sewing part is a circumference horn, and can turn around . For the cloth, it is jointing with the cloth

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

and working at the same time. The ultrasonic seamless sewing part advance ultrasonic lace machine and its market prospects are very bright.

Specifications:

Model	YP-F51	YP-F57
Frequency	35 KHz	35 KHz
Power	400 W	600 W
Rotary Welding Horns Width	7 mm	12 mm
Power Adjust Method	File or Continuous	
The Horns Surface Hardness	More than HRC56	
Real-time Display	Working Frequency and Working Current	
Synchronizing Wheel Specifications	46XL Trapezoidal Tooth,Width16mm	
Synchronizing Belt Matched	The Length is not more than730mm,the Width 12mm	
Allowable Rotation Speed	100 r/min.	
Install Bolt	M8, 4 pcs

Detailed Product Description

Model:	YP-S57	Frequency:	20±1 KHz
Power:	1500 W	Voltage:	220±10% V
Temperature:	300	Pressure:	35 MPa
Max Capacity:	15 L/Min		

20KHz 1500W Ultrasonic Biodiesel Processor / Ultrasonic Biodiesel Reactor

Quick Detail:

Simple, low-cost design
 Low operating costs
 High efficiency
 Low maintenance
 Faster emulsification

Description:

Ultrasonic technique as a physical means and tools, can product in the reaction medium in a series of close to the extreme conditions, this energy can not only stimulate or promote many chemical reactions, accelerate the rate of a chemical reaction, and even may also change the direction of chemical reaction, generate a beat all effect and miracles.

Industrial ultrasonic sonochemistry system is mainly used for large-scale industrial production. It has big power, high efficiency, the advantages of large radiation area etc.. And can be customized according to customer needs.

— Ahmet Ogmen (Turkey)

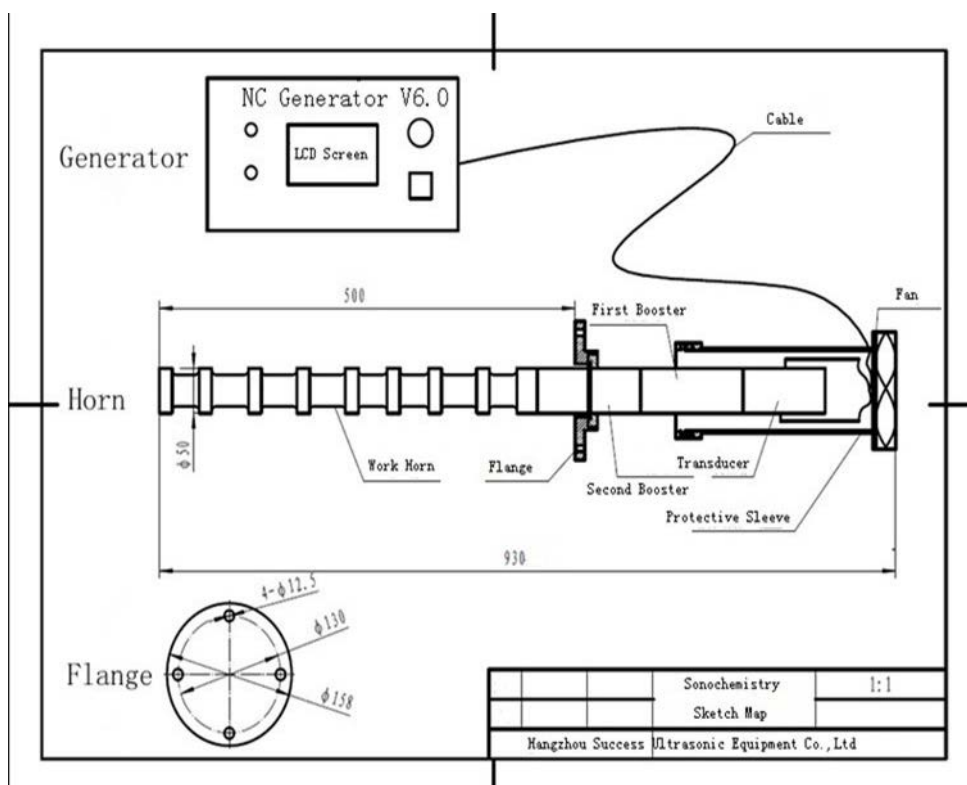

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Applications:

Ultrasonic in the biochemistry of the earliest applications should be used ultrasonic to crush the cell wall, to release its contents. Subsequent studies showed that, low intensity ultrasonic can promote the biochemical reaction process, such as ultrasonic irradiation can increase the speed of liquid nutrition growth of algal cells, making the cells to produce proteins increased 3 times.

Energy density and cavitations bubble collapse of ultrasonic field energy density, energy density is enlarged a trillion times, great concentration caused by energy; sound chemistry led to the phenomenon of extreme heat and pressure cavitations effect of luminescence, is unique in form of exchange of energy and substance of sonochemistry. Therefore, ultrasonic chemical extraction, biodiesel production, organic synthesis, governance microorganisms, degradation of toxic organic pollutants, the chemical reaction speed and yield, the catalytic efficiency, biological degradation, ultrasonic anti fouling, biological cell crushing, dispersion and agglomeration, and the chemical reaction is more and more important role.

Specifications:

Model	YP-S53	YP-S55	YP-S57	YP-S59	YP-S61
Frequency	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz
Power	500 W	1000 W	1500 W	2000 W	3000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	300	300	300	300	300
Pressure	35 MPa	35 MPa	35 MPa	35 MPa	35 MPa
Intensity of sound	10 W/cm ²	20 W/cm ²	30 W/cm ²	40 W/cm ²	60 W/cm ²
Max Capacity	5 L/Min	10 L/Min	15 L/Min	20 L/Min	30 L/Min
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

PS:If you need more power, we can install two or more device.

Competitive Advantage:

- Save mixing time 20%~60%
- Lower temps 30%~60%(30)
- Less methanol 5%~30%
- Less chemical (KOH) less 20%~50%

Total production cost save 15%~50%

Another benefit is the time of glycerol separation. This is also faster and one of the reasons for it is that less methanol is been used, so glycerol separation is faster.

Detailed Product Description

Model:	YP-S59	Frequency:	20±1 KHz
Power:	2000 W	Voltage:	220±10% V
Temperature:	300	Pressure:	35 MPa
Max Capacity:	30 L/Min		

Industrial Ultrasonic Sonochemistry For Water Treatment , Solid Dispersion Of Particles

Quick Detail:

Simple, low-cost design
Low operating costs
High efficiency
Low maintenance
Faster emulsification

Description:

Ultrasonic dispersion refers to the liquid medium, the ultrasonic "cavitation" in the liquid, the liquid particles dispersion and agglomeration process.

Ultrasonic technique as a physical means and tools, can produce various extreme conditions in the liquid, a phenomenon known as sonochemistry, ultrasonic equipment related is called ultrasonic chemical equipment (referred to as "the sound of chemical equipment"). Ultrasonic dispersing device is an application of acoustic chemical equipment, can be used for water treatment, solid dispersion of particles in a liquid system, disaggregation, promoting effect of solid-liquid reaction etc.

— Ahmet Ogmen (Turkey)

Applications:

- Dispersion of silicon carbide in liquid
- Dispersed cell material paste
- Food powder emulsion dispersion
- The dispersion of nano carbon reaction process
- Dispersion tube phosphor materials
- Graphite particles in liquid

Specifications:

Model	YP-S53	YP-S55	YP-S57	YP-S59	YP-S61
Frequency	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz
Power	500 W	1000 W	1500 W	2000 W	3000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	300	300	300	300	300
Pressure	35 MPa	35 MPa	35 MPa	35 MPa	35 MPa
Intensity of sound	10 W/cm ²	20 W/cm ²	30 W/cm ²	40 W/cm ²	60 W/cm ²
Max Capacity	5 L/Min	10 L/Min	15 L/Min	20 L/Min	30 L/Min
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

PS:If you need more power, we can install two or more device.

Competitive Advantage:

- A single set of high power, maximum power can reach 3000W
- Work stability: continuous work around the clock
- The titanium alloy as the transducer and the tool head material, improve the vibration transmission efficiency, the service life of the equipment is greatly improved
- High temperature resistant: radiation head part, highest can withstand 600 degrees.
- High pressure: the maximum pressure 35Mpa
- A plurality of the tool head design: the effective increase of ultrasonic radiation area, the radiation effect is more uniform
- Focus on design, high energy density

Upgrade equipment is simple, no need to change the customer production equipment and the existing process

Simple installation, the standard flange butt joint installation

Yield and efficiency can be improved obviously, reduce the cost of

Sets of equipments used in combination

Detailed Product Description

Model:	YP-Q83	Frequency:	20 KHz
Power:	2000 W	Size Of Cutter:	15*6 Mm
Voltage:	AC220V 50Hz		

Food / Cake / Candy Ultrasonic Cutting Machine Magnalium Alloy 20 KHz 2000 W

Quick Detail:

High precision cutting, compound unchanged
 Easy to apply to automation
 Clean cutting surface, bonding performance
 Fast speed, high efficiency, no pollution
 Smooth, reliable cutting, accurate trimming, no deformation, no raising, fuzzing, spinning, wrinkling

Description:

Ultrasonic Cutting Machine is a class of device using ultrasonic energy for cutting. Instead of using traditional blade cutting, ultrasonic cutting has its advantages of smooth, reliable cutting, accurate trimming, no deformation, no raising, fuzzing, spinning, wrinkling etc. It can avoid the rough cutting-edge, coked edge, fuzballs and other shortcomings of laser cutting machine.

Applications:

Ultrasonic cutting machine is used for cutting rubber, synthetic fabric, cloth, plastic, sheet metal, food etc.

Specifications:

— Julie (USA)

Model	YP-Q83
Frequency	20 KHz
Power	2000 W
Size of cutter	Design as customers' need
Length of cable	3 M
Generator	V6.0
Outer skin	Aluminium
Weight	13.5 KG
Voltage	AC220V 50Hz
Material of cutter	Magnalium alloy, titanium alloy, stainless steel

PS: we can produce the cutter according to your drawing or design by your requirement.

Competitive Advantage:

The use of high power ultrasonic transducer vibrating element, ensure the long time stable working
The cutting speed is improved greatly, the efficiency 10 times higher than the traditional cutting knife.
Cutting all kinds of ordinary tool to cut products, solve production problems
Can be installed high hardness blade, cutting blade can be replaced, greatly reducing the use cost
Cutting tool complete varieties, can also be customized according to customer process shaped cutting tool
Installation, easy to use, almost does not change the original cutting process
Can be used in the production of circular ultrasonic tool cutting equipment, rolling cutting, suitable for cutting special
Can use air-cooled, water-cooled design, adapt to various working conditions and environment

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Model	YP-Q83
Frequency	20 KHz
Power	2000 W
Size of cutter	Design as customers' need
Length of cable	3 M
Generator	V6.0
Outer skin	Aluminium
Weight	13.5 KG
Voltage	AC220V 50Hz
Material of cutter	Magnalium alloy, titanium alloy, stainless steel

PS: we can produce the cutter according to your drawing or design by your requirement.

Competitive Advantage:

The use of high power ultrasonic transducer vibrating element, ensure the long time stable working
The cutting speed is improved greatly, the efficiency 10 times higher than the traditional cutting knife.
Cutting all kinds of ordinary tool to cut products, solve production problems
Can be installed high hardness blade, cutting blade can be replaced, greatly reducing the use cost
Cutting tool complete varieties, can also be customized according to customer process shaped cutting tool
Installation, easy to use, almost does not change the original cutting process
Can be used in the production of circular ultrasonic tool cutting equipment, rolling cutting, suitable for cutting special
Can use air-cooled, water-cooled design, adapt to various working conditions and environment

Products

Ultrasonic Welding Machine

- High Precision Small Ultrasonic Welding Machine 400W For Clothing Industry , Good Tightness
- 60 KHz Ultrasonic RF Card Welding Machine / Welder , Wear-resistant Tool Head
- 2000W High Power Ultrasonic Metal Welding Machine For Iron , Steel , Copper , Aluminum , Zinc
- Electronic HF Hand Held Ultrasonic Welding Machine / Equipment For Car / Automobile
- PVC / UPVC Portable Ultrasonic Welding Machine High Efficiency 500W For Clothing , Packaging
- 200W Spot Ultrasonic Plastic Welding Machine For Toy Industry , Airless Plastic Welder
- Portable Ultrasonic Welding Machine For Plastic , Straight Type For Each Direction Welding
- 28 KHz Small Hand Held Ultrasonic Welding Machine 500W For Thermoplastic , Pistol Type
- Automatic Thermoplastic Ultrasonic Welding Machine 500 W For Auto Door
- 60 KHz High Frequency Ultrasonic Welding Machines , Spot Welder For Smart Card
- Portable Ultrasonic Welding Machine For Seamless Sewing / Non-woven Fabric Sewing , 100r/min
- 20 KHz Industrial Ultrasonic Metal Welding Machine High Frequency For Machine Tools , Hardware Parts

Ultrasonic Plastic Welding Machine

- Mobile ABS / PET Ultrasonic Plastic Welding Machine / Welder 200W For Car Lamps
- PVC / HDPE Ultrasonic Plastic Welding Machine 800W Automatic For Electronic / Industry
- PE / HDPE HF Ultrasonic Plastic Welding Machine 28 KHz 500 W For Sports Industry
- PVC / UPVC Portable Ultrasonic Plastic Welding Machine / Welder For Toy Industry
- Handheld Ultrasonic PVC Plastic Welding Machine / Equipment For Toys / Dolls / Gifts
- Micro Spot Ultrasonic Plastic Welding Machine 300 W 28 KHz , Airless And Watertight
- PE / HDPE Automatic Ultrasonic Plastic Welder / Welding Machine 200 W High Vibration Speed
- Pistol Type Ultrasonic Plastic Welding Machine For PP / ABS Textile Industry
- Portable Ultrasonic Plastic Welding Machine For PET / Acrylics Electronic Products
- Hand Held Ultrasonic Plastic Welding Machine With Digital Generator High Power
- High Frequency Ultrasonic Welding Machine For Plastic ,

Ultrasonic Spot Welding Machine

- High Frequency Ultrasonic Spot Welding Machine / Equipment 60 KHz PLC For Coil , Aluminium / Nylon
- Auto Small Ultrasonic Spot Welding Equipment 200 W For Mobile Phone Batteries , Good Tightness
- High Power Mini Ultrasonic Spot Welding Machine 500 W For Children Dolls / Plastic Gifts
- High Power Ultrasonic Spot Welding Machine / Equipment For Plastic , Sports Industrial
- 28 KHz HF Industrial Ultrasonic Spot Welding Machine Automatic For Circuit Board
- 200W Handheld Ultrasonic Spot Welding Machine For Textile Industry / Toy Industry
- 28 KHz Industrial Ultrasonic Spot Welding Machine For Electronic Component
- 50 KHz Small Automatic Ultrasonic Spot Welding Machine For ID Card / RF Card
- Hand Held Ultrasonic Spot Welding Machine For Clothing / Packaging , Pistol Type
- Portable Coil Ultrasonic Spot Welding Machine High Efficiency , Steady Point
- 60 KHz High Frequency Ultrasonic Spot Welding Machine PLC For Smart Card
- Small Ultrasonic Portable Spot Welding Machine 28 KHz For Diamond , High Power

Ultrasonic Metal Welding Machine

- 20 KHz Ultrasonic Metal Welding Machine / Equipment High Frequency For Copper Wire / Aluminium
- Mobile Small Ultrasonic Metal Welding Machine / Welder For Annealing Stainless Steel Basin / Tube
- Industrial Hand Held Ultrasonic Metal Welding Machine 2000W , 220 V With Generator
- High Frequency Ultrasonic Metal Welder / Welding Machine Automated For Heat Treatment
- 20 KHz Automatic Metal Ultrasonic Welding Machine 2000W 220 V High Frequency
- HF Portable Ultrasonic Metal Welding Machine High Efficiency For Welding / Brazing
- 2000w Electronic Spot Ultrasonic Metal Welding Machine / Welder For Hot Forging High Power
- HF Portable Ultrasonic Metal Welding Machine
- High Frequency Ultrasonic Metal Welding Machine
- 20 KHz Automatic Metal Ultrasonic Welding Machine

Hand Held Ultrasonic Welder

- Portable Hand Held Ultrasonic Welder For Household Appliances , High Precision

Contact Now

- Straight Type
- Airtight And Watertight Ultrasonic Plastic Welding Machines For Stationery , Daily Necessities
- 500W HF Ultrasonic Hand Held Welding Machine For Computer / Mobile Phone
- Small Hand Held Ultrasonic Welder For Textile Industry , Straight Type For Each Direction
- High Frequency Handheld Ultrasonic Welder For Auto Parts / Car Motorcycle
- Electronic Industrial Hand Held Ultrasonic Welder For Thermoplastic High Power
- Automatic Hand Held Ultrasonic Welder For Non-woven Fabric Sewing / Clothing
- Portable Hand Held Ultrasonic Welder 500W For Plastic Toys / Toy Industry , High Frequency
- 200W Thermoplastic Hand Held Ultrasonic Welder / Welding Equipment High Efficiency
- High Power Hand Held Ultrasonic Welder 800W Pistol type For Packaging Industry
- 28 KHz 800W Mobile Hand Held Ultrasonic Welder / Welding Machine For Communication Equipment
- Spot Hand Held Ultrasonic Welder
- HF Industrial Hand Held Ultrasonic Welder

Piezoelectric Ultrasonic Transducer

- M8 1.5 High Power Piezoelectric Ultrasonic Transducer For Welding Machine
- 50mm 20 KHz Magnetostrictive Piezoelectric Ultrasonic Transducer For Metal Welder
- 2000W 20 KHz Piezoelectric Ultrasonic Transducer High Power For Plastic Welding
- High Temperature Piezoelectric Ultrasonic Transducer For Atomizing , Low Frequency
- 1 μm 60KHz Piezoelectric Ultrasonic Transducer High Power For Ultrasonic Welding
- 20 KHz High Power Piezoelectric Ultrasonic Transducer 50 mm , Low Frequency
- 35 KHz Piezoelectric Ultrasonic Ceramic Transducers For Cleaner / Welder
- 28KHz Low Frequency Piezoelectric Ultrasonic Transducer / Converter 25 mm , 1950 - 2500 pF
- Atomizing Ceramic Piezoelectric Ultrasonic Transducer 20 KHz High Reliability
- 20 KHz Waterproof Piezoelectric Ultrasonic Cleaner Transducer High Reliability
- 15 KHz Low Frequency Piezoelectric Ultrasonic Transducer For Atomizing 12500 - 19000 pF
- 70 KHz High Frequency Piezoelectric Ultrasonic Transducer 10mm , Columnar Type

Ultrasonic Oscillator

- 28 KHz High Pressure Ultrasonic Oscillator For Ultrasonic Cutting Machine
- Waterproof Ultrasonic Oscillator Include Booster And Transducer 7500 - 12500 pF
- 15 KHz 70mm Ultrasonic Oscillator Stainless Steel For Ultrasonic Equipment , High Reliability
- Piezoelectric Ultrasonic Oscillator , Ultrasonic Horn For Welding Machine 15 KHz – 100 KHz
- 70mm Aluminium Ultrasonic Oscillator For Ultrasonic Machine , 15 KHz Gray / Black
- 15 KHz Low Frequency Ultrasonic Oscillator 100μmm For Welding And Cutting Machine
- Small Piezoelectric Ultrasonic Oscillator High Speed With 4pcs Piezoelectric Chip
- Carbon Steel / Stainless Steel Ultrasonic Bolt Connect Ultrasonic Transducer And Booster
- 25 KHz Ultrasonic Oscillator Waterproof With Booster And Transducer , 38mm
- 15 KHz Waterproof Ultrasonic Oscillator / Vibrator For Ultrasonic Welding Machine
- Stainless Steel Ultrasonic Oscillator
- Aluminium Small Ultrasonic Oscillator

Ultrasonic Generator

- ≤ 85%RH High Power Ultrasonic Generator For Cleaning Tank 500 – 30000 pF
- Digital Electrical Ultrasonic Generator Intelligent NC Power For Ultrasonic Chemical Equipment
- 60 KHz High Frequency Ultrasonic Generator For Welding / Cutting Machine
- Sound Analog Ultrasonic Generator High Power 3000 W For Ultrasonic Equipment
- High Power Digital Ultrasonic Frequency Generator For Plastic Welding Machine
- Intelligent Automatic Ultrasonic Generator / Controller For Cleaner , Waterproof
- 60 KHz / 40 KHz Ultrasonic Generator For High Power Ultrasonic System 300*450*170mm
- Analog / Digital Ultrasonic Generator For Making Machines , High Efficiency
- Automatic Ultrasonic Generator
- Ultrasonic Generator For Welding Machine

Ultrasonic Sonochemistry

- 20KHz 1500W Ultrasonic Biodiesel Processor / Ultrasonic Biodiesel Reactor
- High Power Ultrasonic Sonochemistry 20 Khz For Solid-liquid , Liquid-liquid Dispersion
- Titanium Alloy Small Ultrasonic Sonochemistry For Cell Crushing / Sterilization 60 W/cm²
- 20 KHz Ultrasonic Sonochemistry Equipment For Drug Extraction , Titanium Alloy
- Industrial Ultrasonic Sonochemistry For Water Treatment , Solid Dispersion Of Particles
- Laboratory Ultrasonic Sonochemistry Processors 40Khz For Degassing , Emulsifying , Atomizing
- 40 Khz 1000W Ultrasonic Sonochemistry Machine For Laboratory Dispersion / Emulsification
- Portable Ultrasonic Sonochemistry Laboratory Dispersion Equipment , 500ml 40 KHz
- 2000W / 3000W High Pressure Ultrasonic Sonochemistry Processor For Cell Disruption
- Small Volume Ultrasonic Sonochemistry System For Laboratory , Cavitation Machine
- 20 Khz 1000W Industrial Ultrasonic Sonochemistry System For Biodiesel Equipment
- 1500W 40 Khz Ultrasonic Sonochemistry Equipment For Cell crushing / Sterilization

Ultrasonic Metal Crystallization Processor

- 20 KHz 2000W Ultrasonic Metal Crystallization Processor For Broken / Fine Metal Particles
- High Power Ultrasonic Metal Crystallization Processor For Grain Refinement , 450mm Gun
- 50KHz Ultrasonic Metal Crystallization Processor For Powder / Metal Milling , Small Uniform
- Ultrasonic Metal Crystallization Processor , Ultrasonic Metal Melting Casting Processor
- Ultrasonic Metal Crystallization Processor , Magnesium Aluminum Alloy Melt Grain Refining Machine
- Small Ultrasonic Metal Crystallization Processor / Grain Refinement 20 KHz 2000W
- 1500 W Ultrasonic Metal / Aluminium Alloy Melt Crystallization Grain Refinement Machine
- Portable Ultrasonic Metal Crystallization Processor For

- Electrical Ultrasonic Generator

Ultrasonic Cutting Machine

- 20 KHz Automatic Ultrasonic Cutting Machine High Power 500W , No Pollution
- 40 KHz High Speed Ultrasonic Cutting Machine With Generator For Sheet Metal
- 40 KHz Hand Held Ultrasonic Cutting Machine Stainless Steel With 3M Cable
- Industrial Fabric Ultrasonic Cutting Machine 28 KHz Titanium Alloy , No Deformation
- Food / Cake / Candy Ultrasonic Cutting Machine Magnalium Alloy 20 KHz 2000 W
- Portable Ultrasonic Cutting Machine For Rubber / Synthetic Fabric , High Power
- PVC Plastic / Cloth Ultrasonic Cutting Machine AC 220V 20 KHz With Generator V6.0
- 40 KHz Ultrasonic Cutting Machine Air-cooled / Water-cooled For Digging , Sculpture
- 28 KHz Hand Held Industrial Ultrasonic Cutting Machine / Ultrasonic Fabric Cutter
- 40 KHz Automatic Ultrasonic Cutting Machine / Cutter For Rubber , High Precision
- Fabric High Power Ultrasonic Cutting Machine
- Magnalium Alloy Ultrasonic Cutting Machine

Ultrasonic Nozzle Spray

- 60 KHz Industrial Ultrasonic Nozzle Spray High Power Atomize Various Kinds Of Liquid
- High Power Ultrasonic Nozzle Spray / Nebulizer Promote Chemical Reactions , Spraying , 1 to 100 Microns
- Industrial Atomizing Ultrasonic Spraying Systems / Nebulizer With Nozzle , Small Volume
- 40 KHz Ultrasonic Nozzle Spray System For Clean Industrial Dust , Large Atomizing Volume
- Industrial Humidification Ultrasonic Nozzle Spray For Granulating , Mixing Liquid
- High Pressure Atomizer Ultrasonic Nozzle Spray For Chemical Mixing 150 L/H 62μm
- Portable Ultrasonic Nozzle Spray / Nebulizer Machine For Industry Chemical Liquid
- Small Portable Ultrasonic Nozzle Spray For Liquid Atomization Humidification , Paint Spraying
- High Power Ultrasonic Nozzle Spray / Nebulizer
- Industrial Ultrasonic Nozzle Spray
- Portable Ultrasonic Nozzle Spray Systems
- 20μm Industrial Ultrasonic Nozzle Spray Titanium / Stainless Steel For Various Kinds Of Oil Mucus

Cable Stripping Machine

- Automatic Ultrasonic Coaxial Cable Stripping Machine Pollution-free 3 mm 30 mm
- Ultrasonic Electric Cable Stripping Machine Multi-function For Armoured Cable Wire
- Ultrasonic Industrial Cable Wire Stripping Machine High Frequency 220V 50Hz 3A
- 20 KHz Automatic Ultrasonic Cable Stripping Machine High Speed , 1000W
- Ultrasonic Automatic Cable Stripping Machine
- Ultrasonic Electric Cable Stripping Machine
- Ultrasonic Coaxial Cable Stripping Machine
- 35 KHz Ultrasonic Cable Stripping Machine For Mineral insulated cable stripping equipment
- Ultrasonic Automatic Cable Stripping Machine For High-rise Building , High Power 1000W

- Bridge , Electric Power , High Reliability
- Ultrasonic Crystal Processor For Metal / Melting Aluminium Grain Refinement
- 50 KHZ Ultrasonic Metal Crystallization Processor / Ultrasonic Metal Powder Atomizer Machine
- Grain Refinement Ultrasonic Metal Crystallization Processor
- Portable Ultrasonic Metal Crystallization Processor

- Ultrasonic Small Cable Stripping Machine High Efficiency For Scrap Cable Wire
- Ultrasonic Cable Stripper Wire Stripping Machine Copper Recycle , High Speed 5 mm

Ultrasonic Testing Equipment

- Sound Intensity Ultrasonic Testing Equipment
- Portable Ultrasonic Testing Equipment
- Amplitude Ultrasonic Testing Equipment
- Portable Amplitude Ultrasonic Testing Equipment High Precision DC 3V
- High Power Ultrasonic Testing Equipment For Sound Intensity Ultrasonic Power 0 - 150 W/cm²
- Sound Intensity Ultrasonic Testing Equipment Measuring Ultrasonic Power With LCD Screen
- 1 µm Sensitivity Amplitude Ultrasonic Testing Equipment With Digital Indicator
- 10 KHz – 200 KHz Amplitude Ultrasonic Testing Equipment , Ultrasonic Amplitude Measuring Instrument
- Portable Ultrasonic Testing Equipment , Sound Intensity Measuring Instrument In The Liquid

Ultrasonic Cleaning Machine

- 15 KHZ - 100 KHZ Ultrasonic Cleaning Machines For Metal , 59k Low Noise
- Double Frequency Ultrasonic Cleaning Machine For Electro-gilding , Efficient Heating
- Custom High Frequency Ultrasonic Cleaning Machine / Equipment For Plastic Industries
- 20L 40 KHz Ultrasonic Cleaning Machine , Ultrasonic Washer Mechanical Heating
- High Power Ultrasonic Cleaning Machine , Industrial Ultrasonic Cleaner For Automobiles
- 10L - 100L Industrial Ultrasonic Cleaning Machine For Medical , Lab Instruments
- Stainless Steel Ultrasonic Cleaning Machine / Washer With Touch Sensitive Panel
- 4000W 100KHZ Automatic Ultrasonic Jewelry Cleaning Machine 100L With Memory Quick
- 3L Industrial Ultrasonic Cleaning Machine Stainless Steel 304 For Plastic
- 6L 37 KHZ Ultrasonic Cleaning Machines For Lab Instruments , Low Noise
- 2.5L Stainless Steel Ultrasonic Cleaning Machine / Ultrasonic Washer High Power
- High Frequency Ultrasonic Cleaning Machine For Electro-gilding , 40 KHz 80L

Good design,make scheme according customers' requirement.

Detailed Product Description

Model:	YP-S57	Frequency:	20±1 KHz
Power:	1500 W	Voltage:	220±10% V
Temperature:	300	Pressure:	35 MPa
Max Capacity:	15 L/Min	Material Of Tip Head:	Titanium Alloy

High Power Ultrasonic Sonochemistry 20 Khz For Solid-liquid , Liquid-liquid Dispersion

Quick Detail:

Simple, low-cost design
 Low operating costs
 High efficiency
 Low maintenance
 Faster emulsification

Description:

Ultrasonic dispersion refers to the liquid medium, the ultrasonic "cavitation" in the liquid, the liquid particles dispersion and agglomeration process.

Ultrasonic technique as a physical means and tools, can produce various extreme conditions in the liquid, a phenomenon known as sonochemistry, ultrasonic equipment related is called ultrasonic chemical equipment (referred to as "the sound of chemical equipment"). Ultrasonic dispersing device is an application of acoustic chemical equipment, can be used for water treatment, solid dispersion of particles in a liquid system, disaggregation, promoting effect of solid-liquid reaction etc.

— Ahmet Ogmen (Turkey)

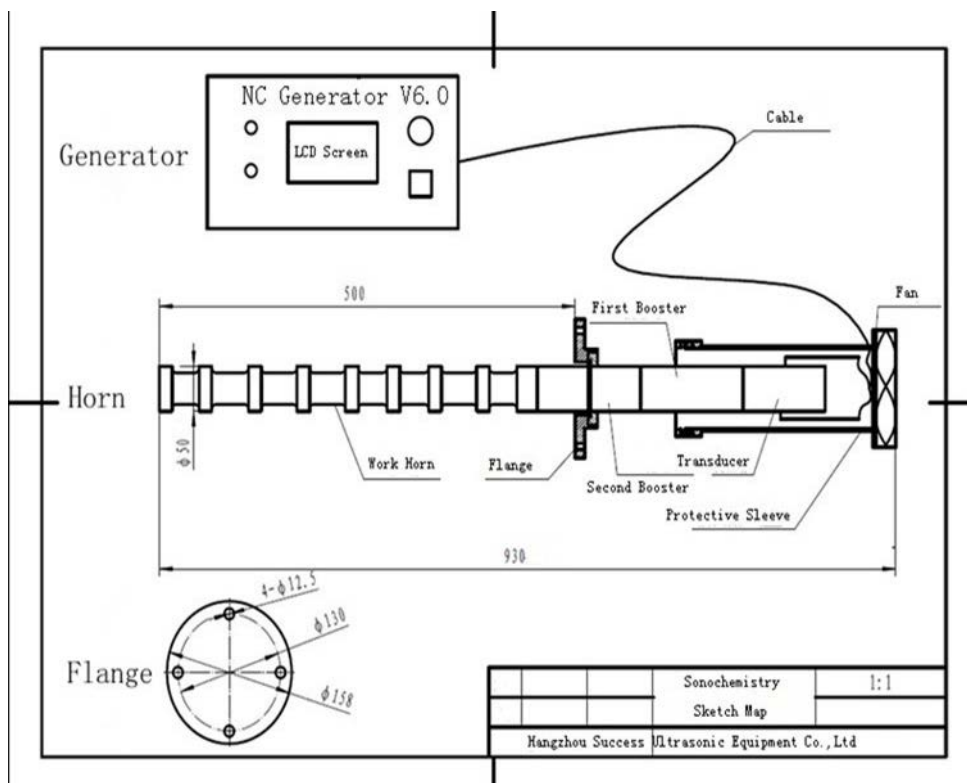

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

I'm Online Chat Now

Contact Now

Applications:

All kinds of paint, dye and homogeneous dispersion; various industrial additives and food field and mix. Can be applied to various solid-liquid, liquid-liquid dispersion field.

Specifications:

Model	YP-S53	YP-S55	YP-S57	YP-S59	YP-S61
Frequency	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz
Power	500 W	1000 W	1500 W	2000 W	3000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	300	300	300	300	300
Pressure	35 MPa	35 MPa	35 MPa	35 MPa	35 MPa
Intensity of sound	10 W/cm ²	20 W/cm ²	30 W/cm ²	40 W/cm ²	60 W/cm ²
Max Capacity	5 L/Min	10 L/Min	15 L/Min	20 L/Min	30 L/Min
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

PS:If you need more power, we can install two or more device.

Competitive Advantage:

- A single set of high power, maximum power can reach 3000W
- Work stability: continuous work around the clock
- The titanium alloy as the transducer and the tool head material, improve the vibration transmission efficiency, the service life of the equipment is greatly improved
- High temperature resistant: radiation head part, highest can withstand 600 degrees.
- High pressure: the maximum pressure 35Mpa
- A plurality of the tool head design: the effective increase of ultrasonic radiation area, the radiation effect is more uniform
- Focus on design, high energy density
- Upgrade equipment is simple, no need to change the customer production equipment and the existing process
- Simple installation, the standard flange butt joint installation
- Yield and efficiency can be improved obviously, reduce the cost of

Sets of equipments used in combination

Detailed Product Description

Power:	500 W	Shape:	Straight Type
Working Type:	Intermittent	Model:	YP-D53
Frequency:	28 KHz		

High Power Ultrasonic Spot Welding Machine / Equipment For Plastic , Sports Industrial

Quick Detail:

Stable, safe use

According to the need to set the working time

Convenient and safe operation

The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations. Great company!

— Julie (USA)

I'm Online Chat Now

Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-D47	Power:	200 W
Working Type:	Intermittent	Shape:	Straight Type
Applications:	Household Appliances, The Packaging Industry, Toy Industry		

High Frequency Ultrasonic Welding Machine For Plastic , Straight Type

Quick Detail:

Stable, safe use
According to the need to set the working time
Convenient and safe operation
The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
--------------	---

 Short delivery time , quality and price meet my expectations.
 Great company!
 — Julie (USA)

I'm Online Chat Now

Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-D21	Frequency:	20 KHz
Output Power:	2000 W	Voltage:	220 V
Applications:	Heat Treatment, Hot Forging, Welding/Brazing		

20 KHz Ultrasonic Metal Welding Machine / Equipment High Frequency For Copper Wire / Aluminium

Quick Detail:

Welding machine
 Used for metal welding
 High working rate
 High quality parts
 Convenient and save labor

Description:

By using the ultrasonic high frequency vibration principle, the ultrasonic metal welder converts the ultrasonic vibration energy into friction energy to transfer the metal's surface. Under condition of producing the heat by the friction and putting a pressure to the metal, the metal pieces will fuse.

Applications:

Hot Forging: Aims to fabricate the work pieces of certain temperature into other shapes through forging press with the help of punch press ,forging machine or other equipments.

Smelting: Mainly aims to melt the metal into liquid by using the high temperature, which is mainly applicable to smelting of iron, steel, copper, aluminum, zinc as well as various precious metals;

Heat Treatment: It is mainly aims to change the hardening of the materials through the heat treatment to work pieces. Such as, quench for various hardware and tolls, automobile and motorcycle, machine tools, hardware parts and

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

machine parts, hardware mold, etc.

Welding/Brazing:

It mainly aims to melt the solder by heating it to a certain temperature for the purpose of connecting two types of metals of the same material or different material

Annealing:

Annealing of various stainless steel products and other work pieces , such as stainless steel basin, stainless steel tube, cue ,brass lock, aluminum radiator and so on .

Specifications:

Model	YP-D21
Frequency	20 KHz
Output Power	2000 W
Voltage	220 V
Switch	Handle or foot switch
Power Adjusting	Step or continuous
Working Time Control	24 Hours
Weight	20-30 KG (Determined by the size of the horn)
Generator	V6.0

Competitive Advantage:

- Fast Heating: The minimum rate of heating is less than one second (rate of heating is available for adjustment and control)
- Wide Coverage of Heating: It can be used to heat various metal parts (replace removable induction coil as per different shape).
- Easy Installation: It can be used once it is connected with power source, induction coil as well as water supply pipe and rising pipe; it is small in size and light in weight.
- Easy Operation: You can learn to operate it within several minutes.
- Fast start-up: It can be started to perform heating operation on condition that water and power supply is available.
- Low Power Consumption: As compared with conventional vacuum tube high frequency equipments, it can save the power by approximately 70%. The smaller the size of the work pieces, the lower power consumption would be.
- High Effectiveness: It has such features as uniform heating (it is applicable to adjust the spacing of the induction coil to ensure the appropriate temperature as required by each part of work piece), fast warming and limited oxid horizon, and can guard against any waste after annealing.
- Comprehensive Protection: It has such functions as overvoltage, over-current, overheat and water shortage alarm indications as well as automatic control and protection.
- Controllable Temperature: It is applicable to control the temperature for heating work pieces as per the preset heating time, and thereby control the heating temperature at a certain technical point.
- Comprehensive Full Load Design: It can work continuously for 24 hours
- Small Size and Light Weight: It has a weight of only several dozens of kilograms, of which, the limited floor space can effectively save the workshop space.
- Sound operational environment: it is favorable for environmental protection, conservation of energy and safety operation, which is free of any noise, exhaust gas and dust.
- Elimination of High Voltage: it requires no step-up transformer which may produce approximately ten thousand voltages, and thus can ensure the maximum safety.

Detailed Product Description

Frequency:	15 KHz – 60 KHz	Capacitance:	500 – 30000 PF
Output Power:	100 – 3000 W	Voltage:	220 V 50 Hz

High Power Digital Ultrasonic Frequency Generator For Plastic Welding Machine

Quick Detail:

Cheap
Simple structure
Easy to repair

Description:

The ultrasonic generator, also called ultrasonic driving power supply, electronic box, control box, is an important part of high power ultrasonic system. Main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.

Applications:

Ultrasonic generator main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.
Ultrasonic generator is applied to all kinds of ultrasonic equipment, mainly with ultrasonic welding, ultrasonic cutting, ultrasonic chemical equipment and ultrasonic welding equipment such as non-woven fabric.

Specifications:

Model	ZJS-2000
Frequency	15 KHz – 60 KHz
Size	410*600*180 mm
Weight	14 KG
Output Power	100 – 3000 W
Voltage	220 V 50 Hz

price meet my expectations.
Great company!

— Julie (USA)

Temperature	≤300
Moisture	≤85%RH

Competitive Advantage:

The use of high-quality electronic components assembly.
Advanced and reliable protection circuit makes the reliability is greatly improved.
FM and frequency automatic compensation, frequency of the digital display.
Frequency deviation, working current two meter indication and protection function.
According to the customer request interface plug.
Has the advantages of simple structure, easy to repair, cheap.

Comparison:

	Analog generator	Digital generator
Circuit	Analog circuit, discrete components	Digital circuit, the chip control
Automatic search	x	•
Automatic frequency tracking	x	•
Frequency adjustment range	±0.15 KHz	±0.5 KHz
Power regulation	x	•
24 hours of continuous work	x	•
Non resonant condition	x	•
LCD	x	•
Add the PLC protocol	x	•
Automatic circuit protection	Bad, easy to cause the damage of components	Good
Repair method	Professional repair	Module replacement

Detailed Product Description

Ultrasonic Sonochemistry / Homogenizer For All Kinds Of Paint , Dye , Homogeneous Dispersion

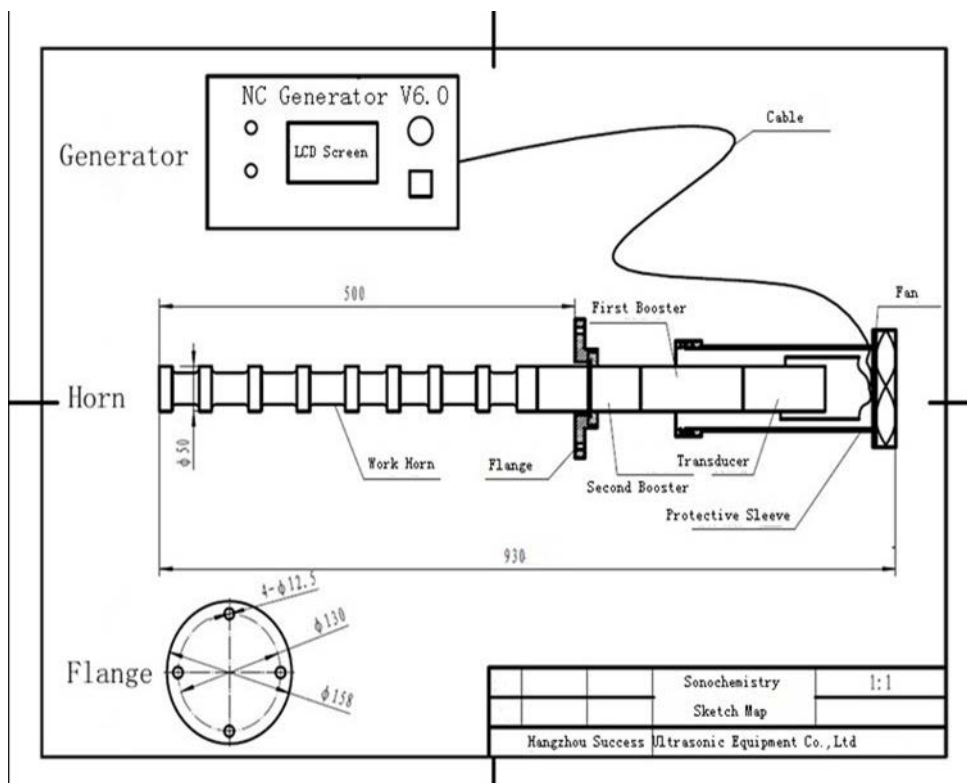

Quick Detail:

- Simple, low-cost design
- Low operating costs
- High efficiency
- Low maintenance
- Faster emulsification

Description:

Ultrasonic dispersion refers to the liquid medium, the ultrasonic "cavitation" in the liquid, the liquid particles dispersion and agglomeration process.

Ultrasonic technique as a physical means and tools, can produce various extreme conditions in the liquid, a phenomenon known as sonochemistry, ultrasonic equipment related is called ultrasonic chemical equipment (referred to as "the sound of chemical equipment"). Ultrasonic dispersing device is an application of acoustic chemical equipment, can be used for water treatment, solid dispersion of particles in a liquid system, disaggregation, promoting effect of solid-liquid reaction etc.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations. Great company!

— Julie (USA)

I'm Online Chat Now

Contact Now

Applications:

All kinds of paint, dye and homogeneous dispersion; various industrial additives and food field and mix. Can be applied to various solid-liquid, liquid-liquid dispersion field.

Specifications:

Model	YP-S53	YP-S55	YP-S57	YP-S59	YP-S61
Frequency	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz
Power	500 W	1000 W	1500 W	2000 W	3000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	300	300	300	300	300
Pressure	35 MPa	35 MPa	35 MPa	35 MPa	35 MPa
Intensity of sound	10 W/cm ²	20 W/cm ²	30 W/cm ²	40 W/cm ²	60 W/cm ²
Max Capacity	5 L/Min	10 L/Min	15 L/Min	20 L/Min	30 L/Min
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

PS:If you need more power, we can install two or more device.

Competitive Advantage:

- A single set of high power, maximum power can reach 3000W
- Work stability: continuous work around the clock
- The titanium alloy as the transducer and the tool head material, improve the vibration transmission efficiency, the service life of the equipment is greatly improved
- High temperature resistant: radiation head part, highest can withstand 600 degrees.
- High pressure: the maximum pressure 35Mpa
- A plurality of the tool head design: the effective increase of ultrasonic radiation area, the radiation effect is more uniform
- Focus on design, high energy density
- Upgrade equipment is simple, no need to change the customer production equipment and the existing process
- Simple installation, the standard flange butt joint installation
- Yield and efficiency can be improved obviously, reduce the cost of

Detailed Product Description

Model:	YP-W57	Frequency:	40 KHz
Atomization Volume:	10 L/H	Average Particle Diameter Of Fog:	32µm
Atomization Head Structure:	Cylindrical	Power:	60 W
Application:	A Variety Of Oil Mucus, Ordinary Water, Variety Of Liquid Substances		

40 KHz Ultrasonic Nozzle Spray System For Clean Industrial Dust , Large Atomizing Volume

Quick Detail:

Atomize various kinds of liquid
Large atomizing volume, energy-saving, environmental protection
No plug, no abrasion

Description:

Ultrasonic spray (FOG) is to use the energy of ultrasonic water or liquid scattered, forming several microns to 100 microns in size of particles, used for air humidifying, granulating, mixing liquid, promote chemical reactions, spraying, molten metal powder etc..

Applications:

Atomization humidification, chemical mixing, production, spray drying granulation, paint spraying, metal milling and so on

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Specifications:

Model	YP-W51	YP-W55	YP-W57	YP-W59	YP-W61	YP-W63

Atomization Head Structure	Cylindrical			Horn		
Power	30 W	30 W	60 W	100 W	300 W	500 W
The Application of Atomizing Media	Ordinary water, a variety of liquid substances, chemical liquid, a variety of oil mucus, metal melt and so on					

I'm Online Chat Now

Competitive Advantage:

- A major breakthrough in spray technology, you can spray a variety of liquids.
- Low power consumption, the fog of great energy saving.
- No plug, no abrasion, no noise, no pressure, no moving parts.
- Can be any combination to meet the requirements of the spray volume.
- The use of high-performance titanium and stainless steel.

Sound Intensity Ultrasonic Testing Equipment Measuring Ultrasonic Power With LCD Screen

Large Image : Sound Intensity Ultrasonic Testing Equipment Measuring Ultrasonic Power With LCD Screen

Product Details:

Place of Origin:	Hangzhou, China
Brand Name:	FYCG
Certification:	BV
Model Number:	YP-0511F

Payment & Shipping Terms:

Minimum Order Quantity:	1 Set
Packaging Details:	Wooden Case
Delivery Time:	5 Days
Payment Terms:	T/T Escrow
Supply Ability:	500 Sets/Month

[Contact Now](#)

Detailed Product Description

Model:	YP-0511F	Range Of Sound Intensity:	0-150 W/cm ²
Range Of Frequency:	5 Khz-1 MHz	Service Medium:	PH 4-PH 10 (liquid)
Length Of Probe:	30cm 40cm 50cm 60cm (optional)	Material Of The Probe:	Titanium

Sound Intensity Ultrasonic Testing Equipment Measuring Ultrasonic Power With LCD Screen

Quick Detail:

Measuring ultrasonic power in the liquid.

Description:

The sound intensity measuring instrument is a kind of special for ultrasonic measurement of liquid in the sound equipment. The sound power of sound intensity is the so-called unit area; sound intensity directly affects the size of the ultrasonic cleaning, emulsification, extraction, dispersion effect. We design and development of the second generation of ultrasonic sound intensity measuring instrument, the probe adopts stainless steel design, built-in high precision piezoelectric sensor, sensitive, accurate response of sound intensity.

Applications:

This equipment is used for ultrasonic measurement of intensity of sound in the liquid.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Specifications:

Model	YP-0511F
Range of Sound Intensity	0-150 W/cm ²
Range of Frequency	5 Khz-1 MHz
Service Temperature	0-100 °C (common) 0-500 °C (high temperature)
Service Medium	PH 4-PH 10 (liquid)
Supply Voltage	220V
The Response Duration	Less than 0.1 second
Length of Probe	30cm 40cm 50cm 60cm (optional)
Material of The Probe	Titanium
Size	10*20*3 cm
Screen	LCD
Power Supply	9V Battery or External Power Supply

Competitive Advantage:

Measuring instrument design, reasonable structure, simple operation, accurate measurement.
The installation of the equipment is simple, convenient operation, wide applicability, which means that the use of.
Sufficient stock, ensure rapid delivery, ease and carefree.

Detailed Product Description

Frequency:	15 KHz	Capacitance:	8000-13500 PF
Dimension:	70mm	Material:	Aluminium

70mm Aluminium Ultrasonic Oscillator For Ultrasonic Machine , 15 KHz Gray / Black

Description:

Ultrasonic booster can change the amplitude of transducer. Booster is a passive device and cannot produce vibration itself. It is only to output after the input vibration is changed into amplitude, and finishing the impedance conversion at the same time. Under the stimulus of electric field, ultrasonic transducer can produce regular vibration and the amplitude is about 10 μ mm commonly. That is not enough to finish the welding and processing step directly.

Through with the suitable booster, the amplitude of ultrasonic can be changed in a large range. If the material is enough intensive, the amplitude can exceed 100 μ mm. We named oscillator after connecting ultrasonic transducer with booster.

On the other hand, when the booster works vibration through longitudinal and extension, on the both sides of the particle direction of motion is the opposite, which is equal to a rest section. This section is named nodal point, which is the best-fixed point of the oscillator. To departure from the fixed point, it will reduce the work efficiency of the oscillator.

In the general, the transform efficiency of aluminum booster is high but the intension of material is low and easy to cracking and easy to slipping from the hole of screw; the intension of the steel booster is high but the sound impedance is large comparatively; the all round properties of the titanium alloy booster is good but the price is high and the processing is difficult.

Detailed Product Description

Model:	YP-B65	Frequency:	20 KHz
Peelable Cable Diameter:	3 Mm	Length Of Wire Stripping:	30 Mm
Power:	1000 W	Voltage:	220V 50Hz 3A
Size:	500*300*400 Mm		

20 KHz Automatic Ultrasonic Cable Stripping Machine High Speed , 1000W
Quick Detail:

Great reliability
High working efficiency
High speed
Low power consumption

Description:

Ultrasonic cable stripping machine is used for mineral insulated cable stripping equipment. Its clever use of ultrasonic energy to the role of the characteristics of both fire cable insulation slag shattered discharge, but also to protect the cable core does not suffer any harm. Design of the stripping machine is compact, reliable, high efficiency, high speed, low power consumption, can be adapted to a variety of mineral insulated cable stripping

Applications:

Mineral insulated cable has been widely used in various applications of insulated cables of high-rise building, petroleum chemical industry, airport, tunnel, ship, offshore oil platforms, aerospace, metallurgical, shopping centers, parking and other mineral.

Detailed Product Description

Model:	YP-W57	Frequency:	40 KHz
Atomization Volume:	10 L/H	Average Particle Diameter Of Fog:	32µm
Atomization Head Structure:	Cylindrical	Power:	60 W
Application:	Metal Melt, Variety Of Liquid Substances		

Industrial Atomizing Ultrasonic Spraying Systems / Nebulizer With Nozzle , Small Volume

Quick Detail:

Atomize various kinds of liquid
Large atomizing volume, energy-saving, environmental protection
No plug, no abrasion

Description:

Ultrasonic spray (FOG) is to use the energy of ultrasonic water or liquid scattered, forming several microns to 100 microns in size of particles, used for air humidifying, granulating, mixing liquid, promote chemical reactions, spraying, molten metal powder etc..

Applications:

Atomization humidification, chemical mixing, production, spray drying granulation, paint spraying, metal milling and so on

Specifications:

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.

Detailed Product Description

Ceramic Diameter: 50 Mm	Frequency: 20 KHz
Capacitance: 6000-7000 PF	

20 KHz 6 μm Piezoelectric Ultrasonic Transducer 50 mm With 1.5 M18 Screw

Quick Detail:

Stabilized power and high reliability widely application

Description:

- 1.High Efficiency: of high mechanical factor. High transfer efficiency is obtained when working in resonance frequency.
- 2.Big amplitude: designed and chosen by computer, high rate in oscillation speed and big amplitude in front operculum.
- 3.Big Power: under the function of the pre-stressed force screw rod, the piezoelectricity ceramics can work freely in the highest level of power.
- 4.In good heat resistance: of small resonance impedance, less heat produced, can be used in a wide range of temperature with long life and high reliability.

Specifications:

Model	YP-5020-2Z
Connect Screw	M18 1.5
Ceramic Diameter	50 mm
Quantity of Ceramic	2 pcs
Frequency	20 KHz
Resistance	20 Ω

The Horns Surface Hardness:	More Than HRC56	Model:	YP-F51
Frequency:	35 KHz	Power:	400 W
Applications:	Car, Motorcycle, Household Appliances, Stationery, Daily Necessities, The Application Of The Sports Ind		

High Precision Small Ultrasonic Welding Machine 400W For Clothing Industry , Good Tightness

Quick Detail:

- Fast weld
- High strength
- Good tightness
- Simplicity of operator
- Low energy consumption

Description:

The work method of Seamless sewing part is completely imitating traditional sewing machine. The biggest characteristic is the ultrasonic transmit horn work direction is same with the sewed cloth. Which will make the sewed point of the cloth are even, flat and fastness. Through suitable design, it can reach perfect sewing effectiveness.

Applications:

Usually used in clothing industry is the ultrasonic lace machine, which is mainly used in cutting and welding cloth. Owing to its transmit horn is a plane, so it only can turn its own geometric center and cant turn the same direction with the cloth. Which make the sewed point of the cloth is unevenness. The transmit horn of Seamless sewing part is a circumference horn, and can turn around . For the cloth, it is jointing with the cloth

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

and working at the same time. The ultrasonic seamless sewing part advance ultrasonic lace machine and its market prospects are very bright.

Specifications:

Model	YP-F51	YP-F57
Frequency	35 KHz	35 KHz
Power	400 W	600 W
Rotary Welding Horns Width	7 mm	12 mm
Power Adjust Method	File or Continuous	
The Horns Surface Hardness	More than HRC56	
Real-time Display	Working Frequency and Working Current	
Synchronizing Wheel Specifications	46XL Trapezoidal Tooth,Width16mm	
Synchronizing Belt Matched	The Length is not more than730mm,the Width 12mm	
Allowable Rotation Speed	100 r/min.	
Install Bolt	M8, 4 pcs

Detailed Product Description

Working Mode:	PLC Or Manual	Cooling Mode:	Compressed Air
Model:	YP-D77	Frequency:	60Khz
Applications:	Electronic Products, The Application Of The Sports Industry		

60 KHz Ultrasonic RF Card Welding Machine / Welder , Wear-resistant Tool Head

Quick Detail:

Steady welding point, completely eradicate insufficient solder

Save labor and cost

Search the frequency automatically

Description:

During the past half year, with many effort from the research development section of our company, at present we have successfully promote the intelligent card welding equipment substantially. After promotion, comparison with the former one, the properties of the equipment has been promoted highly, more stability, better in search the frequency at more wide range, and much better appearance. On the process using the former 60K equipment, with the damage of the welding horn, the frequency would be altered.(the frequency is decided by the size of the product).When the frequency is altered to a certain degree, the ultrasonic generator would be difficult to coincide with the frequency, then influencing to the normal running of all the ultrasonic system.

Applications:

The equipment is used for the coil embedded in a smart card.

Specifications:

Model	YP-D77
-------	--------

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

I'm Online Chat Now

 **Contact Now**

Frequency	60Khz or custom made
Working Mode	PLC or manual
Material of Head	Wear-resisting alloy steel, HRC≥50
Hole for line	φ0.3 mm, φ0.5 mm or custom made
Cable	2M
Generator	V1.5
Size of generator	250*250*120 mm
Size of Shell	φ25*100 mm
Material of Shell	Nylon or aluminium
Cooling mode	Compressed air(φ4 mm)

Competitive Advantage:

Steady welding point, completely eradicate insufficient solder technically.

The size of welding spots is the same, equality line, good effect on uniformity.

The welding spot is small, wouldn't increase the weight of the coil, easy to do lamination and encapsulation.

To leave out the immersion tin step before doing welding, save an operator.

After skilled in welding, much faster than the way to use searing iron to do weld.

On the process on manufactory, there is no waste gas, waste rubbish on pollution, runs in quiet and no noise.

To select the frequency 60KHz, one machine could drive 5-10 ultrasonic products, the speed to do welding is much faster.

Low power consumption, to save production cost for manufactory enterprise.

Detailed Product Description

Power Adjusting:	Step Or Continuous	Model:	YP-D21
Frequency:	20 KHz	Applications:	Electronic Products, The Application Of The Sports Industry, The Packaging Industry

2000W High Power Ultrasonic Metal Welding Machine For Iron , Steel , Copper , Aluminum , Zinc Quick Detail:

Welding machine
 Used for metal welding
 High working rate
 High quality parts
 Convenient and save labor

Description:

By using the ultrasonic high frequency vibration principle, the ultrasonic metal welder converts the ultrasonic vibration energy into friction energy to transfer the metal's surface. Under condition of producing the heat by the friction and putting a pressure to the metal, the metal pieces will fuse.

Applications:

Hot Forging: Aims to fabricate the work pieces of certain temperature into other shapes through forging press with the help of punch press ,forging machine or other equipments.

Smelting: Mainly aims to melt the metal into liquid by using the high temperature, which is mainly applicable to smelting of iron, steel, copper, aluminum, zinc as well as various precious metals;

Heat Treatment: It is mainly aims to change the hardening of the materials through the heat treatment to work pieces. Such as, quench for various hardware and tools, automobile and motorcycle, machine tools, hardware parts and

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

I'm Online Chat Now

Contact Now

machine parts, hardware mold, etc.

Welding/Brazing:

It mainly aims to melt the solder by heating it to a certain temperature for the purpose of connecting two types of metals of the same material or different material

Annealing:

Annealing of various stainless steel products and other work pieces , such as stainless steel basin, stainless steel tube, cue ,brass lock, aluminum radiator and so on .

Specifications:

Model	YP-D21
Frequency	20 KHz
Output Power	2000 W
Voltage	220 V
Switch	Handle or foot switch
Power Adjusting	Step or continuous
Working Time Control	24 Hours
Weight	20-30 KG (Determined by the size of the horn)
Generator	V6.0

Competitive Advantage:

Fast Heating: The minimum rate of heating is less than one second (rate of heating is available for adjustment and control)

Wide Coverage of Heating: It can be used to heat various metal parts (replace removable induction coil as per different shape).

Easy Installation: It can be used once it is connected with power source, induction coil as well as water supply pipe and rising pipe; it is small in size and light in weight.

Easy Operation: You can learn to operate it within several minutes.

Fast start-up: It can be started to perform heating operation on condition that water and power supply is available.

Low Power Consumption: As compared with conventional vacuum tube high frequency equipments, it can save the power by approximately 70%. The smaller the size of the work pieces, the lower power consumption would be.

High Effectiveness: It has such features as uniform heating (it is applicable to adjust the spacing of the induction coil to ensure the appropriate temperature as required by each part of work piece), fast warming and limited oxid horizon, and can guard against any waste after annealing.

Comprehensive Protection: It has such functions as overvoltage, over-current, overheat and water shortage alarm indications as well as automatic control and protection.

Controllable Temperature: It is applicable to control the temperature for heating work pieces as per the preset heating time, and thereby control the heating temperature at a certain technical point.

Comprehensive Full Load Design: It can work continuously for 24 hours

Small Size and Light Weight: It has a weight of only several dozens of kilograms, of which, the limited floor space can effectively save the workshop space. **Sound operational environment:** it is favorable for environmental protection, conservation of energy and safety operation, which is free of any noise, exhaust gas and dust.

Elimination of High Voltage: it requires no step-up transformer which may produce approximately ten thousand voltages, and thus can ensure the maximum safety.

Detailed Product Description

Model:	YP-D47	Frequency:	28 KHz±1 KHz
Power:	200 W	Generator:	ZJS-500N
Working Type:	Intermittent	Shape:	Straight Type
Applications:	Car, Motorcycle, Electronic Products, Stationery, Daily Necessities		

Electronic HF Hand Held Ultrasonic Welding Machine / Equipment For Car / Automobile

Quick Detail:

Stable, safe use
 According to the need to set the working time
 Convenient and safe operation
 The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy

industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Power:	200 W	Shape:	Straight Type
Working Type:	Intermittent	Model:	YP-D47

Auto Small Ultrasonic Spot Welding Equipment 200 W For Mobile Phone Batteries , Good Tightness

Quick Detail:

Stable, safe use
According to the need to set the working time
Convenient and safe operation
The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
--------------	---

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations. Great company!

 **Contact Now**

Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

Efficiency: The welding process is very fast, welding time is only 0-999 seconds.

Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).

Quality: Finished product is hermetic sealing (airtight and watertight).

Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).

Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-D57	Frequency:	28 KHz±1 KHz
Power:	800W	Working Type:	Intermittent
Shape:	Straight Type	Applications:	Car, Motorcycle, Electronic Products, Household Appliances

PVC / UPVC Portable Ultrasonic Plastic Welding Machine / Welder For Toy Industry

Quick Detail:

Stable, safe use
 According to the need to set the working time
 Convenient and safe operation
 The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations. Great company!

Supply Ability:	50 Sets/Month

[Contact Now](#)

Detailed Product Description

Model:	YP-D21	Frequency:	20 KHz
Output Power:	2000 W	Voltage:	220 V
Applications:	Annealing, Heat Treatment, Welding/Brazing		

Mobile Small Ultrasonic Metal Welding Machine / Welder For Annealing Stainless Steel Basin / Tube

Quick Detail:

Welding machine
 Used for metal welding
 High working rate
 High quality parts
 Convenient and save labor

Description:

By using the ultrasonic high frequency vibration principle, the ultrasonic metal welder converts the ultrasonic vibration energy into friction energy to transfer the metal's surface. Under condition of producing the heat by the friction and putting a pressure to the metal, the metal pieces will fuse.

Applications:

- Hot Forging:** Aims to fabricate the work pieces of certain temperature into other shapes through forging press with the help of punch press ,forging machine or other equipments.
- Smelting:** Mainly aims to melt the metal into liquid by using the high temperature, which is mainly applicable to smelting of iron, steel, copper, aluminum, zinc as well as various precious metals;
- Heat Treatment:** It is mainly aims to change the hardening of the materials through the heat treatment to work pieces. Such as, quench for various hardware and tolls, automobile and motorcycle, machine tools, hardware parts and

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

machine parts, hardware mold, etc.

Welding/Brazing:

It mainly aims to melt the solder by heating it to a certain temperature for the purpose of connecting two types of metals of the same material or different material

Annealing:

Annealing of various stainless steel products and other work pieces , such as stainless steel basin, stainless steel tube, cue ,brass lock, aluminum radiator and so on .

Specifications:

Model	YP-D21
Frequency	20 KHz
Output Power	2000 W
Voltage	220 V
Switch	Handle or foot switch
Power Adjusting	Step or continuous
Working Time Control	24 Hours
Weight	20-30 KG (Determined by the size of the horn)
Generator	V6.0

Competitive Advantage:

Fast Heating: The minimum rate of heating is less than one second (rate of heating is available for adjustment and control)

Wide Coverage of Heating: It can be used to heat various metal parts (replace removable induction coil as per different shape).

Easy Installation: It can be used once it is connected with power source, induction coil as well as water supply pipe and rising pipe; it is small in size and light in weight.

Easy Operation: You can learn to operate it within several minutes.

Fast start-up: It can be started to perform heating operation on condition that water and power supply is available.

Low Power Consumption: As compared with conventional vacuum tube high frequency equipments, it can save the power by approximately 70%. The smaller the size of the work pieces, the lower power consumption would be.

High Effectiveness: It has such features as uniform heating (it is applicable to adjust the spacing of the induction coil to ensure the appropriate temperature as required by each part of work piece), fast warming and limited oxyc horizon, and can guard against any waste after annealing.

Comprehensive Protection: It has such functions as overvoltage, over-current, overheat and water shortage alarm indications as well as automatic control and protection.

Controllable Temperature: It is applicable to control the temperature for heating work pieces as per the preset heating time, and thereby control the heating temperature at a certain technical point.

Comprehensive Full Load Design: It can work continuously for 24 hours

Small Size and Light Weight: It has a weight of only several dozens of kilograms, of which, the limited floor space can effectively save the workshop space. **Sound operational environment:** it is favorable for environmental protection, conservation of energy and safety operation, which is free of any noise, exhaust gas and dust.

Elimination of High Voltage: it requires no step-up transformer which may produce approximately ten thousand voltages, and thus can ensure the maximum safety.

Large Image : Portable Hand Held Ultrasonic Welder For Household Appliances , High Precision

Product Details:

Place of Origin:	Hangzhou, China
Brand Name:	FYCG
Certification:	BV
Model Number:	YP-D55

Payment & Shipping Terms:

Minimum Order Quantity:	1 Set
Packaging Details:	Wooden Case
Delivery Time:	7 Working Days
Payment Terms:	T/T Escrow
Supply Ability:	100 Sets/Month

Contact Now

Detailed Product Description

Model:	YP-D55	Frequency:	28 KHz±1 KHz
Power:	800 W	Generator:	ZJS-500N
Working Type:	Intermittent	Shape:	Pistol Type
Applications:	Car, Motorcycle, Stationery, Daily Necessities		

Portable Hand Held Ultrasonic Welder For Household Appliances , High Precision

Quick Detail:

Stable, safe use
 According to the need to set the working time
 Convenient and safe operation
 The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic

products	swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-5020-4Z	Connect Screw:	M8 1.5
Ceramic Diameter:	50 Mm	Frequency:	20 KHz

M8 1.5 High Power Piezoelectric Ultrasonic Transducer For Welding Machine

Quick Detail:

Stabilized power and high reliability widely application

Description:

- 1.High Efficiency: of high mechanical factor. High transfer efficiency is obtained when working in resonance frequency.
- 2.Big amplitude: designed and chosen by computer, high rate in oscillation speed and big amplitude in front operculum.
- 3.Big Power: under the function of the pre-stressed force screw rod, the piezoelectricity ceramics can work freely in the highest level of power.
- 4.In good heat resistance: of small resonance impedance, less heat produced, can be used in a wide range of temperature with long life and high reliability.

Specifications:

Model	YP-5020-4Z
Connect Screw	M8 1.5
Ceramic Diameter	50 mm
Quantity of Ceramic	4 pcs
Frequency	20 KHz
Resistance	15 Ω

- Best Products**
- [Waterproof Piezoelectric Ultrasonic Transducer](#)
- [High Frequency Ultrasonic Atomizing Piezoelectric Transducer](#)
- [40 KHz Piezoelectric Ultrasonic Transducer](#)

Certifications

Stable machine, competitive price, rich products series.
 — Alan Scott (U.K.)
 Good design,make scheme according customers' requirement.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Capacitance	11000-17000 pF
Input Power	1500 W
Amplitude	8 μ m

Competitive Advantage:

We are earliest Ultrasonic Enterprises in China.
30 years of expertise and experience.

Quality first.

Top national defense technology.

The highest yield, the largest market share.

Detailed Product Description

Frequency:	28 KHz	Capacitance:	8500-13500 PF
Dimension:	38mm	Material:	Stainless Steel

28 KHz High Pressure Ultrasonic Oscillator For Ultrasonic Cutting Machine

Quick Detail:

28Khz Ultrasonic Oscillator
Higher quality of electronic component
Analog or Digital generator

Description:

Ultrasonic Oscillator is the main part of high-power ultrasonic system, include booster and Transducer (converter). Ultrasonic booster can change the amplitude of transducer. Booster is a passive device and cannot produce vibration itself. It is only to output after the input vibration is changed into amplitude, and finishing the impedance conversion at the same time. Under the stimulus of electric field, ultrasonic transducer can produce regular vibration and the amplitude is about 10μmm commonly. That is not enough to finish the welding and processing step directly. Through with the suitable booster, the amplitude of ultrasonic can be changed in a large range.

Applications:

Ultrasonic Oscillator is used for ultrasonic cutting machine. It's the core of ultrasonic cutting equipment.

Specifications:

Model	YP-3828-4BZ
-------	-------------

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

I'm Online Chat Now

 **Contact Now**

Package Type	Through Hole
Frequency	28 KHz
Capacitance	8500-13500 pF
Dimension	38mm
Booster	1
Material	Stainless Steel
Color	Black
Piezoelectric Chip	4

Competitive Advantage:

High mechanical quality and excellent electro-acoustic conversion efficiency, providing a high output amplitude.

Piezoelectric element offer a high speed of vibration. Through bolt-on mounting, mechanical intensity and amplitude have been improved.

Having steady output amplitude even the load markedly changed.

Extended using temperature, ensuring good amplitude linearity. Lower resonant impedance, ensuring high conversion efficiency.

Bolt-on mounting gives the fast, easy installation and high reliability.

15 KHz 70mm Ultrasonic Oscillator Stainless Steel For Ultrasonic Equipment , High Reliability

Large Image : 15 KHz 70mm Ultrasonic Oscillator Stainless Steel For Ultrasonic Equipment , High Reliability

Product Details:

Place of Origin: Hangzhou, China

Brand Name: FYCG

Certification: BV

Model Number: YP-7015-6XZ

Payment & Shipping Terms:

Minimum Order Quantity: 1 Unit

Packaging Details: Wooden Case

Delivery Time: 5 Days

Payment Terms: T/T Escrow

Supply Ability: 1000 Units/Month

[Contact Now](#)

Detailed Product Description

Frequency:	15 KHz	Capacitance:	10000-18500 PF
Dimension:	70mm	Material:	Stainless Steel

15 KHz 70mm Ultrasonic Oscillator Stainless Steel For Ultrasonic Equipment , High Reliability

Quick Detail:

15Khz Ultrasonic Oscillator
Higher quality of electronic component
Analog or Digital generator

Description:

Ultrasonic Oscillator is the main part of high-power ultrasonic system, include booster and Transducer (converter). Ultrasonic booster can change the amplitude of transducer. Booster is a passive device and cannot produce vibration itself. It is only to output after the input vibration is changed into amplitude, and finishing the impedance conversion at the same time. Under the stimulus of electric field, ultrasonic transducer can produce regular vibration and the amplitude is about 10μmm commonly. That is not enough to finish the welding and processing step directly. Through with the suitable booster, the amplitude of ultrasonic can be changed in a large range.

Applications:

Ultrasonic Oscillator is used for ultrasonic cutting machine. It's the core of ultrasonic cutting equipment.

Specifications:

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

 **Contact Now**

Model	YP-7015-6XZ
Package Type	Through Hole
Frequency	15 KHz
Capacitance	10000-18500 pF
Dimension	70mm
Booster	1
Material	Stainless Steel
Color	Black
Piezoelectric Chip	6

Competitive Advantage:

High mechanical quality and excellent electro-acoustic conversion efficiency, providing a high output amplitude.

Piezoelectric element offer a high speed of vibration. Through bolt-on mounting, mechanical intensity and amplitude have been improved.

Having steady output amplitude even the load markedly changed.

Extended using temperature, ensuring good amplitude linearity. Lower resonant impedance, ensuring high conversion efficiency.

Bolt-on mounting gives the fast, easy installation and high reliability.

Power:	Less Than 5000W	Frequency:	15KHz – 100KHz
Material:	Titanium, Aluminum, Steel		

Piezoelectric Ultrasonic Oscillator , Ultrasonic Horn For Welding Machine 15 KHz – 100 KHz
Description:

Our company provides all kinds of ultrasonic horn (15 KHz-100 KHz). We can produce it by your drawing or design according to your requirement. The material can be aluminum, titanium, steel and so on.

Specifications:

Frequency	15KHz – 100KHz
Power	Less than 5000W
Material	Titanium, Aluminum, Steel
Size	According to customer requirement

Detailed Product Description

Frequency:	15 KHz – 60 KHz	Capacitance:	500 – 30000 PF
Output Power:	100 – 3000 W	Voltage:	220 V 50 Hz

≤ 85%RH High Power Ultrasonic Generator For Cleaning Tank 500 – 30000 pF

Quick Detail:

- A variety of frequency selection
- Stable
- High power
- Low energy consumption

Description:

The ultrasonic generator also called ultrasonic power supply, electronic box and ultrasonic controller. It is an important part of high power ultrasonic system.

Applications:

Ultrasonic generator main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.
Ultrasonic generator is applied to all kinds of ultrasonic equipment, mainly with ultrasonic welding, ultrasonic cutting, ultrasonic chemical equipment and ultrasonic welding equipment such as non-woven fabric.

Specifications:

Model	V6.0
Frequency	15 KHz – 60 KHz

- Best Products**
- [Electrical Ultrasonic Generator](#)
- [Ultrasonic Generator For Welding Machine](#)
- [Automatic Ultrasonic Generator](#)

Certifications

Stable machine, competitive price, rich products series.

Capacitance	500 – 30000 pF
Size	380*350*180 mm
Weight	11 KG
Output Power	100 – 3000 W
Voltage	220 V 50 Hz
Temperature	≤300
Moisture	≤85%RH

Competitive Advantage:

Real time monitoring: Monitoring the system operating frequency and power

Parameter adjustment: According to the different requirements, adjust the power, amplitude, the running time

Automatic equipment with frequency: Once the initial setup, can work continuously without the need to adjust the generator.

The automatic amplitude control: Changing load transducer work process can automatically adjust the driving characteristics of ultrasonic tool head, ensure the stable amplitude.

System protection: The system work in the unsuitable operation environment, the generator will stop working and alarm display, to protect the equipment from damage.

Amplitude adjustment: Amplitude can instantly increase or decrease in the work process, the amplitude of the set range: 0%~100%.

Automatic frequency search: Working frequency can be automatically measured and stored in the tool head.

Non resonant state (forced vibration): General driving power supply must be working in the resonant state; the power supply can be the special requirements of customers, stability in the non resonant state, very suitable for some special application of ultrasonic.

Comparison:

	Analog generator	Digital generator
Circuit	Analog circuit, discrete components	Digital circuit, the chip control
Automatic search	x	•
Automatic frequency tracking	x	•
Frequency adjustment range	±0.15 KHz	±0.5 KHz
Power regulation	x	•
24 hours of continuous work	x	•
Non resonant condition	x	•
LCD	x	•
Add the PLC protocol	x	•
Automatic circuit protection	Bad, easy to cause the damage of components	Good
Repair method	Professional repair	Module replacement

Sound Analog Ultrasonic Generator High Power 3000 W For Ultrasonic Equipment

Quick Detail:

Cheap
Simple structure
Easy to repair

Description:

The ultrasonic generator, also called ultrasonic driving power supply, electronic box, control box, is an important part of high power ultrasonic system. Main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.

Applications:

Ultrasonic generator main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.

Ultrasonic generator is applied to all kinds of ultrasonic equipment, mainly with ultrasonic welding, ultrasonic cutting, ultrasonic chemical equipment and ultrasonic welding equipment such as non-woven fabric.

Specifications:

Model	ZJS-500N
Frequency	15 KHz – 60 KHz
Size	300*450*170 mm

price meet my expectations.
Great company!

— Julie (USA)

I'm Online Chat Now

Contact Now

Weight	12 KG
Output Power	100 – 3000 W
Voltage	220 V 50 Hz
Temperature	≤300
Moisture	≤85%RH

Competitive Advantage:

The use of high-quality electronic components assembly.
Advanced and reliable protection circuit makes the reliability is greatly improved.
FM and frequency automatic compensation, frequency of the digital display.
Frequency deviation, working current two meter indication and protection function.
According to the customer request interface plug.
Has the advantages of simple structure, easy to repair, cheap.

Comparison:

	Analog generator	Digital generator
Circuit	Analog circuit, discrete components	Digital circuit, the chip control
Automatic search	x	•
Automatic frequency tracking	x	•
Frequency adjustment range	±0.15 KHz	±0.5 KHz
Power regulation	x	•
24 hours of continuous work	x	•
Non resonant condition	x	•
LCD	x	•
Add the PLC protocol	x	•
Automatic circuit protection	Bad, easy to cause the damage of components	Good
Repair method	Professional repair	Module replacement

Detailed Product Description

Model:	YP-Q65	Frequency:	20 KHz
Power:	500 W	Size Of Cutter:	85*25 Mm
Length Of Cable:	3 M	Voltage:	AC220V 50Hz

20 KHz Automatic Ultrasonic Cutting Machine High Power 500W , No Pollution

Quick Detail:

High precision cutting, compound unchanged

Easy to apply to automation

Clean cutting surface, bonding performance

Fast speed, high efficiency, no pollution

Smooth, reliable cutting, accurate trimming, no deformation, no raising, fuzzing, spinning, wrinkling

Description:

Ultrasonic Cutting Machine is a class of device using ultrasonic energy for cutting. Instead of using traditional blade cutting, ultrasonic cutting has its advantages of smooth, reliable cutting, accurate trimming, no deformation, no raising, fuzzing, spinning, wrinkling etc. It can avoid the rough cutting-edge, coked edge, fuzballs and other shortcomings of laser cutting machine.

Applications:

Ultrasonic cutting machine is used for cutting rubber, synthetic fabric, cloth, plastic, sheet metal, food etc.

Specifications:

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

Model	YP-Q65
Frequency	20 KHz
Power	500 W
Size of cutter	85*25 mm
Length of cable	3 M
Generator	V6.0
Outer skin	Aluminium
Weight	11.5 KG
Voltage	AC220V 50Hz
Material of cutter	Magnalium alloy, titanium alloy, stainless steel

PS: we can produce the cutter according to your drawing or design by your requirement.

Competitive Advantage:

The use of high power ultrasonic transducer vibrating element, ensure the long time stable working
The cutting speed is improved greatly, the efficiency 10 times higher than the traditional cutting knife.
Cutting all kinds of ordinary tool to cut products, solve production problems
Can be installed high hardness blade, cutting blade can be replaced, greatly reducing the use cost
Cutting tool complete varieties, can also be customized according to customer process shaped cutting tool
Installation, easy to use, almost does not change the original cutting process
Can be used in the production of circular ultrasonic tool cutting equipment, rolling cutting, suitable for cutting special
Can use air-cooled, water-cooled design, adapt to various working conditions and environment

Detailed Product Description

Model:	YP-W51	Frequency:	60 KHz
Atomization Volume:	0.5 L/H	Average Particle Diameter Of Fog:	20µm
Atomization Head Structure:	Cylindrical	Power:	30 W
Application:	A Variety Of Oil Mucus, Variety Of Liquid Substances		

60 KHz Industrial Ultrasonic Nozzle Spray High Power Atomize Various Kinds Of Liquid

Quick Detail:

Atomize various kinds of liquid

Large atomizing volume, energy-saving, environmental protection

No plug, no abrasion

Description:

Ultrasonic spray (FOG) is to use the energy of ultrasonic water or liquid scattered, forming several microns to 100 microns in size of particles, used for air humidifying, granulating, mixing liquid, promote chemical reactions, spraying, molten metal powder etc..

Applications:

Atomization humidification, chemical mixing, production, spray drying granulation, paint spraying, metal milling and so on

Specifications:

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Model	YP-W51	YP-W55	YP-W57	YP-W59	YP-W61	YP-W63
Frequency	60 KHz	50 KHz	40 KHz	30 KHz	20 KHz	15 KHz
Atomization Volume	0.5 L/H	2 L/H	10 L/H	70 L/H	100 L/H	150 L/H
Average Particle Diameter of Fog	20µm	28µm	32µm	39µm	51µm	62µm
Power Consumption	0.01 Degrees/Kg			0.001 Degrees/Kg		
Atomization Head Structure	Cylindrical			Horn		
Power	30 W	30 W	60 W	100 W	300 W	500 W
The Application of Atomizing Media	Ordinary water, a variety of liquid substances, chemical liquid, a variety of oil mucus, metal melt and so on					

Competitive Advantage:

- A major breakthrough in spray technology, you can spray a variety of liquids.
- Low power consumption, the fog of great energy saving.
- No plug, no abrasion, no noise, no pressure, no moving parts.
- Can be any combination to meet the requirements of the spray volume.
- The use of high-performance titanium and stainless steel.

High Power Ultrasonic Nozzle Spray / Nebulizer Promote Chemical Reactions , Spraying , 1 to 100 Microns

Large Image : High Power Ultrasonic Nozzle Spray / Nebulizer Promote Chemical Reactions , Spraying , 1 to 100 Microns

Product Details:

Place of Origin:	Hangzhou, China
Brand Name:	FYCG
Certification:	BV
Model Number:	YP-W57

Payment & Shipping Terms:

Minimum Order Quantity:	1 Set
Packaging Details:	Wooden Case
Delivery Time:	10-15 Working Days
Payment Terms:	T/T Escrow
Supply Ability:	100 Sets/Month

[Contact Now](#)

Detailed Product Description

Model:	YP-W57	Frequency:	40 KHz
Atomization Volume:	10 L/H	Average Particle Diameter Of Fog:	32µm
Atomization Head Structure:	Cylindrical	Power:	60 W
Application:	Chemical Liquid, Metal Melt, Variety Of Liquid Substances		

High Power Ultrasonic Nozzle Spray / Nebulizer Promote Chemical Reactions , Spraying , 1 to 100 Microns

Quick Detail:

Atomize various kinds of liquid
Large atomizing volume, energy-saving, environmental protection
No plug, no abrasion

Description:

Ultrasonic spray (FOG) is to use the energy of ultrasonic water or liquid scattered, forming several microns to 100 microns in size of particles, used for air humidifying, granulating, mixing liquid, promote chemical reactions, spraying, molten metal powder etc..

Applications:

Atomization humidification, chemical mixing, production, spray drying granulation, paint spraying, metal milling and so on

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Specifications:

Model	YP-W51	YP-W55	YP-W57	YP-W59	YP-W61	YP-W63
Frequency	60 KHz	50 KHz	40 KHz	30 KHz	20 KHz	15 KHz
Atomization Volume	0.5 L/H	2 L/H	10 L/H	70 L/H	100 L/H	150 L/H
Average Particle Diameter of Fog	20µm	28µm	32µm	39µm	51µm	62µm
Power Consumption	0.01 Degrees/Kg			0.001 Degrees/Kg		
Atomization Head Structure	Cylindrical			Horn		
Power	30 W	30 W	60 W	100 W	300 W	500 W
The Application of Atomizing Media	Ordinary water, a variety of liquid substances, chemical liquid, a variety of oil mucus, metal melt and so on					

Competitive Advantage:

- A major breakthrough in spray technology, you can spray a variety of liquids.
- Low power consumption, the fog of great energy saving.
- No plug, no abrasion, no noise, no pressure, no moving parts.
- Can be any combination to meet the requirements of the spray volume.
- The use of high-performance titanium and stainless steel.

Detailed Product Description

Model:	YP-R55	Frequency:	20±1 KHz
Power:	2000 W	Voltage:	220±10% V
Temperature:	800	Diameter Of Head:	50 Mm

20 KHz 2000W Ultrasonic Metal Crystallization Processor For Broken / Fine Metal Particles

Quick Detail:

Significantly refine the metal grain
 Uniform alloy composition to accelerate the bubble motion
 Improvements in the metal

Description:

High-power ultrasonic role in the crystallization process of molten metal can significantly refine the metal grain, uniform alloy composition to accelerate the bubble motion, significantly improving the performance of the metal material strength, hardness, ductility, toughness

Applications:

High-strength aluminum alloy, magnesium alloy casting
 * Aluminium, magnesium alloy bar stock, sheet metal production
 The crystallization of a variety of alloys, the motor rotor degassing
 * A variety of metal matrix composites, high strength aluminum alloy piston casting

Specifications:

Model	YP-R21	YP-R51	YP-R53	YP-R55	YP-R57

Detailed Product Description

Model: YP-Y25

Frequency: 20±1 KHz

Power: 300 – 1000 W

Voltage: AC220V 50Hz 5A

High Power Ultrasonic Metal Crystallization Processor For Grain Refinement , 450mm Gun

Quick Detail:

High power and impact effect
High reliability, long using life
Light weight, portable, easy to operate
Excellent designation

Description:

Ultrasonic aging treatment system is the use of high power ultrasonic driving impact tools, at a frequency of 20000 times per second impact metal surface, the metal surface to produce compressive plastic deformation. At the same time, ultrasonic changes the original stress field, effectively put the residual structure stress relief above 99.8%, so that the structure and extend the service life of more than 10 times

Applications:

Ultrasonic impact treatment device application areas: the industries have strict requirement on welding stability and strength. Such as bridge, electric power, shipbuilding, pressure vessel, steel structure and other industry's metal welding.

Specifications:

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Model	YP-Y25
Frequency	20±1 KHz
Power	300 – 1000 W
Voltage	AC220V 50Hz 5A
Size of Gun	Length 450 mm
Weight of Gun	4 KG
Shape of Gun Head	The impact of the needle or impact rod

I'm Online Chat Now

 **Contact Now**

Competitive Advantage:

Cause residual stress of pulling in the metal welding line surface layer changed into compressive stress. Significantly increase the fatigue life of metal structure.

Change the grain layer on metal surface into plastic deformation layer to improve strength and hardness of metal surface layer significantly.

Improve the weld toe geometric, reduce the stress focus.

Change weld toe stress field, reduce welding deformation obviously, and improve size stability of work piece.

Detailed Product Description

Model:	YP-Z43	Frequency:	50 KHz
Power:	100 W	Voltage:	220±10% V
Temperature:	800		

50KHz Ultrasonic Metal Crystallization Processor For Powder / Metal Milling , Small Uniform

Quick Detail:

Great quantity of capacity
Working stability
Non-wear parts
Milling particles are small, uniform
Easy to install

Description:

The basic principles of ultrasonic metal atomization is the use of the ultrasonic generator (ultrasonic power) of ordinary AC power converted to high frequency electromagnetic oscillations, and then through the transducer, will be converted to high frequency mechanical vibration, and then through the amplitude pole amplitude to expand and spread to the tool head. When the liquid metal contact with the tool head, spread into a layer of liquid film under the ultrasonic vibration, when the tool head and face of a certain amplitude, the thin liquid layer vibration broken, flying out from the working surface of the formation of atomization.

Applications:

Ultrasonic metal milling equipment is for all kinds of metal powder. Like tin, aluminum, zinc and so on.

Specifications:

Model	YP-Z43	YP-Z491	YP-Z492	YP-Z53	YP-Z57
Frequency	50 KHz	40 KHz	40 KHz	40 KHz	35 KHz
Power	100 W	300 W	300 W	600 W	800 W

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Capacity	≥5 KG/H	≥10 KG/H	≥10 KG/H	≥15 KG/H	≥20 KG/H
Structure	Longitudinal cone	Longitudinal cone	Longitudinal oblique type	Rotating disk transverse modes	Rotating disk transverse modes
Atomizing Head Form	Tapered rod type	Tapered rod type	Oblique	Disc type	Disc type
Particle Diameter	50 μm	50 μm	50 μm	50 μm	50 μm

Competitive Advantage:

An ultrasonic vibration source (power supply): 50-60Hz mains into high power high frequency (15 KHz-100 KHz) power provided to the transducer.

Transducer: high-frequency electrical energy into mechanical vibrations.

Horn: connected and fixed transducer and milling disk, the amplitude of the transducer to enlarge transferred to the milling disk.

Milling disk: the use of ultrasonic energy, the liquid metal on the milling disk vibration broken, and into the mist flying out of the disc.

Fixed flange: milling device fixed at a fixed point.

Connecting bolts: closely connected to the above components.

Detailed Product Description

Model:	YP-R51	Frequency:	20±1 KHz
Power:	1000 W	Voltage:	220±10% V
Temperature:	800	Diameter Of Head:	50 Mm

Ultrasonic Metal Crystallization Processor , Ultrasonic Metal Melting Casting Processor

Quick Detail:

Significantly refine the metal grain
Uniform alloy composition to accelerate the bubble motion
Improvements in the metal

Description:

The smelting process of high power ultrasound is applied to the metal, to refine the grain of alloy composition, metal, accelerate bubble, and improve the properties of metallic materials

Applications:

High-strength aluminum alloy, magnesium alloy casting
* Aluminium, magnesium alloy bar stock, sheet metal production
The crystallization of a variety of alloys, the motor rotor degassing
* A variety of metal matrix composites, high strength aluminum alloy piston casting

— Alan Scott (U.K.)

Good design,make scheme according customers' requirement.

Detailed Product Description

Model:	YP-B65	Frequency:	20 KHz
Peelable Cable Diameter:	3 Mm	Length Of Wire Stripping:	30 Mm
Startup Mode:	Manual Or Pedal Switch		

Automatic Ultrasonic Coaxial Cable Stripping Machine Pollution-free 3 mm 30 mm

Quick Detail:

Great reliability
High working efficiency
High speed
Low power consumption

Description:

Ultrasonic cable stripping machine is used for mineral insulated cable stripping equipment. Its clever use of ultrasonic energy to the role of the characteristics of both fire cable insulation slag shattered discharge, but also to protect the cable core does not suffer any harm. Design of the stripping machine is compact, reliable, high efficiency, high speed, low power consumption, can be adapted to a variety of mineral insulated cable stripping

Applications:

Mineral insulated cable has been widely used in various applications of insulated cables of high-rise building, petroleum chemical industry, airport, tunnel, ship, offshore oil platforms, aerospace, metallurgical, shopping centers, parking and other mineral.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

Specifications:

Model	YP-B45	YP-B65
Frequency	35 KHz	20 KHz
Peelable cable diameter	5 mm	3 mm
Length of Wire Stripping for One Time	20 mm	30 mm
Startup Mode	Manual or Pedal Switch	Manual or Pedal Switch
Power	200 W	1000 W
Voltage	220V 50Hz 3A	220V 50Hz 3A
Size	800*150*200 mm	500*300*400 mm
Weight	25 KG	35 KG

Competitive Advantage:

	Manual	Ultrasonic
Stripping speed	20 Second/Unit	2 Second/Unit
Operator	Skilled Workers	Everybody
Length of Wire Stripping	10 mm	2-30 mm
Powder Pollution	Serious	Pollution-free
Core Damage	Yes	No
Stripping Consistency	Low	High
Production Line	No	Yes

Detailed Product Description

Model:	YP-0511F	Range Of Sound Intensity:	0-150 W/cm ²
Range Of Frequency:	5 Khz-1 MHz	Service Medium:	PH 4-PH 10 (liquid)
Length Of Probe:	30cm 40cm 50cm 60cm (optional)	Material Of The Probe:	Titanium

Sound Intensity Ultrasonic Testing Equipment
Quick Detail:

Measuring ultrasonic power in the liquid.

Description:

The sound intensity measuring instrument is a kind of special for ultrasonic measurement of liquid in the sound equipment. The sound power of sound intensity is the so-called unit area; sound intensity directly affects the size of the ultrasonic cleaning, emulsification, extraction, dispersion effect.

We design and development of the second generation of ultrasonic sound intensity measuring instrument, the probe adopts stainless steel design, built-in high precision piezoelectric sensor, sensitive, accurate response of sound intensity.

Applications:

This equipment is used for ultrasonic measurement of intensity of sound in the liquid.

Specifications:

Great company!
 — Julie (USA)

Model	YP-0511F
Range of Sound Intensity	0-150 W/cm ²
Range of Frequency	5 Khz-1 MHz
Service Temperature	0-100 °C (common) 0-500 °C (high temperature)
Service Medium	PH 4-PH 10 (liquid)
Supply Voltage	220V
The Response Duration	Less than 0.1 second
Length of Probe	30cm 40cm 50cm 60cm (optional)
Material of The Probe	Titanium
Size	10*20*3 cm
Screen	LCD
Power Supply	9V Battery or External Power Supply

Competitive Advantage:

Measuring instrument design, reasonable structure, simple operation, accurate measurement.
 The installation of the equipment is simple, convenient operation, wide applicability, which means that the use of.
 Sufficient stock, ensure rapid delivery, ease and carefree.

Amplitude Ultrasonic Testing Equipment

Product Details:

Place of Origin: Hangzhou, China

Brand Name: FYCG

Certification: BV

Model Number: YP-0901B

Payment & Shipping Terms:

Minimum Order Quantity: 1 Set

Packaging Details: Wooden Case

Delivery Time: 5 Days

Payment Terms: T/T Escrow

Supply Ability: 500 Sets/Month

Detailed Product Description

Model:	YP-0901B	Range Of Frequency:	10 KHz – 200 KHz
Type Of Indicator:	Digital	Sensitivity:	1 μm

Amplitude Ultrasonic Testing Equipment

Quick Detail:

Delicate design
Reasonable structure
Simple operation
Accurate measurement
Can replace the laser measuring device

Description:

The amplitude of ultrasonic tool head end requirements related to the generation of objects or medium efficiency. So usually need to determine the amplitude. Laser lateral vibration instrument used on the current international, high requirement of the operation, ordinary users to accept. Design of measuring instrument I launched a compact, reasonable structure, simple operation, accurate measurement, low cost, the best partner for ultrasonic equipment user.

Applications:

Ultrasonic Amplitude Measuring Instrument is used to measure the amplitude of ultrasonic equipment.

Specifications:

Model	YP-0901B
-------	----------

Great company!
— Julie (USA)

Precision	2.5%
Sensitivity	1 μm
Measuring Range	More than 3 μm
Frequency Range	10 KHz – 200 KHz
Supply Power	Built-in power supply (DC 3V)
Type of Indicator	Digital
Test direction	Up or down

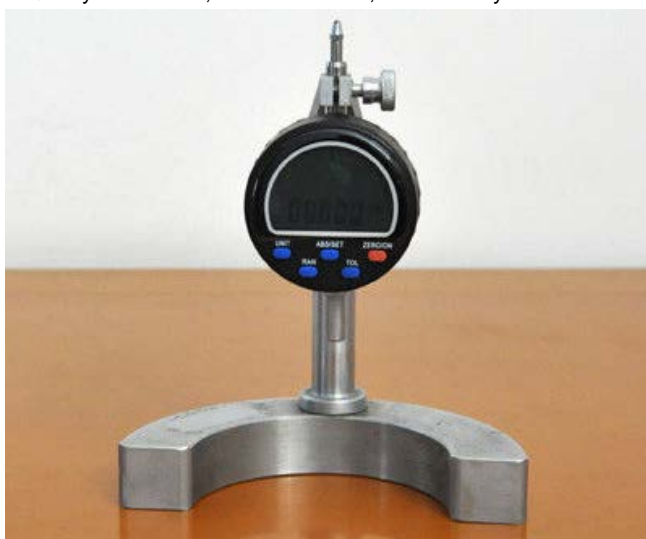

Competitive Advantage:

The measuring instrument of ingenious design, reasonable structure, simple operation, accurate measurement

Easy operation, wide applicability, no plug

Compact design, reliable work, can directly replace the laser measuring instrument

Quality assurance, sufficient stock, fast delivery

Portable Amplitude Ultrasonic Testing Equipment High Precision DC 3V

[Large Image](#) : Portable Amplitude Ultrasonic Testing Equipment High Precision DC 3V

Product Details:

Place of Origin:	Hangzhou, China
Brand Name:	FYCG
Certification:	BV
Model Number:	YP-0901B

Payment & Shipping Terms:

Minimum Order Quantity:	1 Set
Packaging Details:	Wooden Case
Delivery Time:	5 Days
Payment Terms:	T/T Escrow
Supply Ability:	500 Sets/Month

[Contact Now](#)

Detailed Product Description

Model:	YP-0901B	Range Of Frequency:	10 KHz – 200 KHz
Type Of Indicator:	Digital	Sensitivity:	1 μm

Portable Amplitude Ultrasonic Testing Equipment High Precision DC 3V

Quick Detail:

- Delicate design
- Reasonable structure
- Simple operation
- Accurate measurement
- Can replace the laser measuring device

Description:

The amplitude of ultrasonic tool head end requirements related to the generation of objects or medium efficiency. So usually need to determine the amplitude. Laser lateral vibration instrument used on the current international, high requirement of the operation, ordinary users to accept. Design of measuring instrument I launched a compact, reasonable structure, simple operation, accurate measurement, low cost, the best partner for ultrasonic equipment user.

Applications:

Ultrasonic Amplitude Measuring Instrument is used to measure the amplitude of ultrasonic equipment.

Specifications:

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Model	YP-0901B
Precision	2.5%
Sensitivity	1 μm
Measuring Range	More than 3 μm
Frequency Range	10 KHz – 200 KHz
Supply Power	Built-in power supply (DC 3V)
Type of Indicator	Digital
Test direction	Up or down

I'm Online Chat Now

[Contact Now](#)

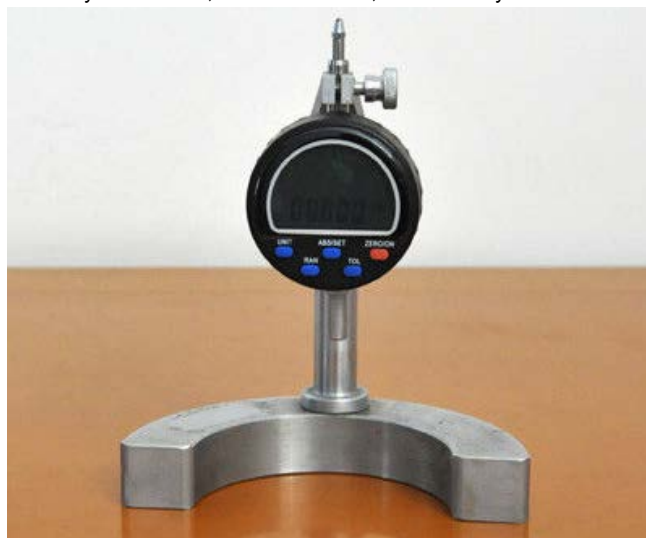

Competitive Advantage:

The measuring instrument of ingenious design, reasonable structure, simple operation, accurate measurement

Easy operation, wide applicability, no plug

Compact design, reliable work, can directly replace the laser measuring instrument

Quality assurance, sufficient stock, fast delivery

Tank Capacity:	10L – 100L	Ultrasonic Power:	10W – 4000W

15 KHZ - 100 KHZ Ultrasonic Cleaning Machines For Metal , 59k Low Noise

Quick Detail:

Custom made
Pause function
Efficient heating
Touch sensitive panel
Memory Quick

Description:

It has been widely used for cleaning medical and lab instruments, metal and electronic arts ultrasonic cleaning machine.

Under the international standard IEC60886.61102.61161,our company manufactures series of intelligently automatic ultrasonic cleaning machine and intelligently automatic airing cleaning machines ,all major spare parts were imported ,making the circuit more advanced , work more reliable ,efficiency higher ,noise lower and cleaning more effective.

Applications:

Ultrasonic washer is designed to apply a cavitation effect produced in the cleaning liquid by means of ultrasonic waves ,accelerating dirty and grease dissolution and decomposition from parts of being cleaned and having a perfect effect on behind hole interiors .features of this products include :quick to achieve the sound resets and free of part damage .it has been widely used for cleaning medical and lab instruments .metal and electronic arts and also used in automobiles ,electro-gilding and plastic industries .according to the special demands of clients ,our company can select or purchase some temperature increasing .wattage adjustable double frequency ,high frequency (59k low noise and suitable for cleaning)products ,ultrasonic

Detailed Product Description

Model:	YP-S13	Frequency:	20±1 KHz
Power:	1000 W	Voltage:	220±10% V
Temperature:	150	Max Capacity:	500 MI
Material Of Tip Head:	Titanium Alloy		

Portable Ultrasonic Sonochemistry Laboratory Dispersion Equipment , 500ml 40 KHz

Quick Detail:

- Simple, low-cost design
- Low operating costs
- High efficiency
- Low maintenance
- Faster emulsification

Description:

Ultrasonic technique as a physical means and tools, can produce various extreme conditions in the liquid, a phenomenon known as sonochemistry, ultrasonic equipment related is called ultrasonic chemical equipment (referred to as "the sound of chemical equipment"). Ultrasonic dispersing device is an application of acoustic chemical equipment, can be used for water treatment, solid dispersion of particles in a liquid system, disaggregation, promoting effect of solid-liquid reaction etc.

Applications:

Ultrasonic Laboratory System: It is mainly used in laboratory tests or small scale production. It has big power, small volume, light weight, portability etc.

Certifications

Stable machine, competitive price, rich products series.

— Alan Scott (U.K.)

Good design,make scheme according customers' requirement.

Detailed Product Description

Model:	YP-S59	Frequency:	20±1 KHz
Power:	2000 W	Voltage:	220±10% V
Temperature:	300	Pressure:	35 MPa

2000W / 3000W High Pressure Ultrasonic Sonochemistry Processor For Cell Disruption

Quick Detail:

Simple, low-cost design
Low operating costs
High efficiency
Low maintenance
Faster emulsification

Description:

Ultrasonic dispersion refers to the liquid medium, the ultrasonic "cavitation" in the liquid, the liquid particles dispersion and agglomeration process.

Ultrasonic technique as a physical means and tools, can produce various extreme conditions in the liquid, a phenomenon known as sonochemistry, ultrasonic equipment related is called ultrasonic chemical equipment (referred to as "the sound of chemical equipment"). Ultrasonic dispersing device is an application of acoustic chemical equipment, can be used for water treatment, solid dispersion of particles in a liquid system, disaggregation, promoting effect of solid-liquid reaction etc.

— Ahmet Ogmen (Turkey)

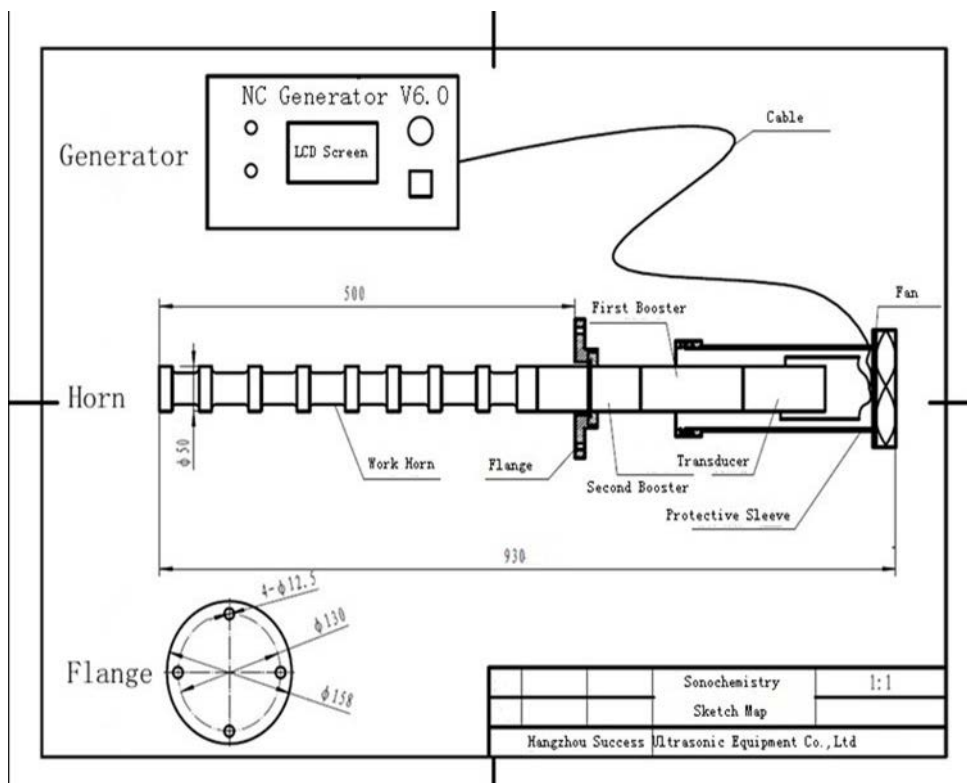

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Applications:

- Dispersion of silicon carbide in liquid
- Dispersed cell material paste
- Food powder emulsion dispersion
- The dispersion of nano carbon reaction process
- Dispersion tube phosphor materials
- Graphite particles in liquid

Specifications:

Model	YP-S53	YP-S55	YP-S57	YP-S59	YP-S61
Frequency	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz	20±1 KHz
Power	500 W	1000 W	1500 W	2000 W	3000 W
Voltage	220±10% V	220±10% V	220±10% V	220±10% V	220±10% V
Temperature	300	300	300	300	300
Pressure	35 MPa	35 MPa	35 MPa	35 MPa	35 MPa
Intensity of sound	10 W/cm ²	20 W/cm ²	30 W/cm ²	40 W/cm ²	60 W/cm ²
Max Capacity	5 L/Min	10 L/Min	15 L/Min	20 L/Min	30 L/Min
Material Of Tip Head	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy	Titanium Alloy

PS:If you need more power, we can install two or more device.

Competitive Advantage:

- A single set of high power, maximum power can reach 3000W
- Work stability: continuous work around the clock
- The titanium alloy as the transducer and the tool head material, improve the vibration transmission efficiency, the service life of the equipment is greatly improved
- High temperature resistant: radiation head part, highest can withstand 600 degrees.
- High pressure: the maximum pressure 35Mpa
- A plurality of the tool head design: the effective increase of ultrasonic radiation area, the radiation effect is more uniform
- Focus on design, high energy density

Upgrade equipment is simple, no need to change the customer production equipment and the existing process

Simple installation, the standard flange butt joint installation

Yield and efficiency can be improved obviously, reduce the cost of

Sets of equipments used in combination

Spot Ultrasonic Welding Machines / Welder
Quick Detail:

Steady welding point, completely eradicate insufficient solder

Save labor and cost

Search the frequency automatically

Description:

During the past half year, with many effort from the research development section of our company, at present we have successfully promote the intelligent card welding equipment substantially. After promotion, comparison with the former one, the properties of the equipment has been promoted highly, more stability, better in search the frequency at more wide range, and much better appearance. On the process using the former 60K equipment, with the damage of the welding horn, the frequency would be altered.(the frequency is decided by the size of the product).When the frequency is altered to a certain degree, the ultrasonic generator would be difficult to coincide with the frequency, then influencing to the normal running of all the ultrasonic system.

Applications:

The equipment is used for the coil embedded in a smart card.

Great company!

— Julie (USA)

I'm Online Chat Now

Specifications:

Model	YP-D77
Frequency	60Khz or custom made
Working Mode	PLC or manual
Material of Head	Wear-resisting alloy steel, HRC≥50
Hole for line	φ0.3 mm, φ0.5 mm or custom made
Cable	2M
Generator	V1.5
Size of generator	250*250*120 mm
Size of Shell	φ25*100 mm
Material of Shell	Nylon or aluminium
Cooling mode	Compressed air(φ4 mm)

Competitive Advantage:

Steady welding point, completely eradicate insufficient solder technically.

The size of welding spots is the same, equality line, good effect on uniformity.

The welding spot is small, wouldn't increase the weight of the coil, easy to do lamination and encapsulation.

To leave out the immersion tin step before doing welding, save an operator.

After skilled in welding, much faster than the way to use searing iron to do weld.

On the process on manufactory, there is no waste gas, waste rubbish on pollution, runs in quiet and no noise.

To select the frequency 60KHz, one machine could drive 5-10 ultrasonic products, the speed to do welding is much faster.

Low power consumption, to save production cost for manufactory enterprise.

Detailed Product Description

Model:	YP-F51	Frequency:	35 KHz
Power:	400 W	Applications:	Car, Motorcycle, Household Appliances, Stationery, Daily Necessities, The Application Of The Sports Ind
The Horns Surface Hardness:	More Than HRC56		

Small Portable Ultrasonic Welding Machine

Quick Detail:

Fast weld
High strength
Good tightness
Simplicity of operator
Low energy consumption

Description:

The work method of Seamless sewing part is completely imitating traditional sewing machine. The biggest characteristic is the ultrasonic transmit horn work direction is same with the sewed cloth. Which will make the sewed point of the cloth are even, flat and fastness. Through suitable design, it can reach perfect sewing effectiveness.

Applications:

Usually used in clothing industry is the ultrasonic lace machine, which is mainly used in cutting and welding cloth. Owing to its transmit horn is a plane, so it only can turn its own geometric center and cant turn the same direction with the cloth. Which make the sewed point of the cloth is unevenness. The transmit horn of Seamless sewing part is a circumference horn, and can turn around . For the cloth, it is jointing with the cloth and working at the same time. The ultrasonic seamless sewing part advance ultrasonic lace machine and its market prospects are very bright.

Great company!

Specifications:

Model	YP-F51	YP-F57
Frequency	35 KHz	35 KHz
Power	400 W	600 W
Rotary Welding Horns Width	7 mm	12 mm
Power Adjust Method	File or Continuous	
The Horns Surface Hardness	More than HRC56	
Real-time Display	Working Frequency and Working Current	
Synchronizing Wheel Specifications	46XL Trapezoidal Tooth,Width16mm	
Synchronizing Belt Matched	The Length is not more than730mm,the Width 12mm	
Allowable Rotation Speed	100 r/min.	
Install Bolt	M8, 4 pcs

Detailed Product Description

Model:	YP-D53	Frequency:	28 KHz±1 KHz
Power:	500 W	Generator:	ZJS-500N
Working Type:	Intermittent	Shape:	Straight Type
Applications:	Car, Motorcycle, Electronic Products, Stationery, Daily Necessities, The Application Of The Sports Indu		

PVC / UPVC Portable Ultrasonic Welding Machine High Efficiency 500W For Clothing , Packaging

Quick Detail:

Stable, safe use
According to the need to set the working time
Convenient and safe operation
The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

I'm Online Chat Now

Specifications:

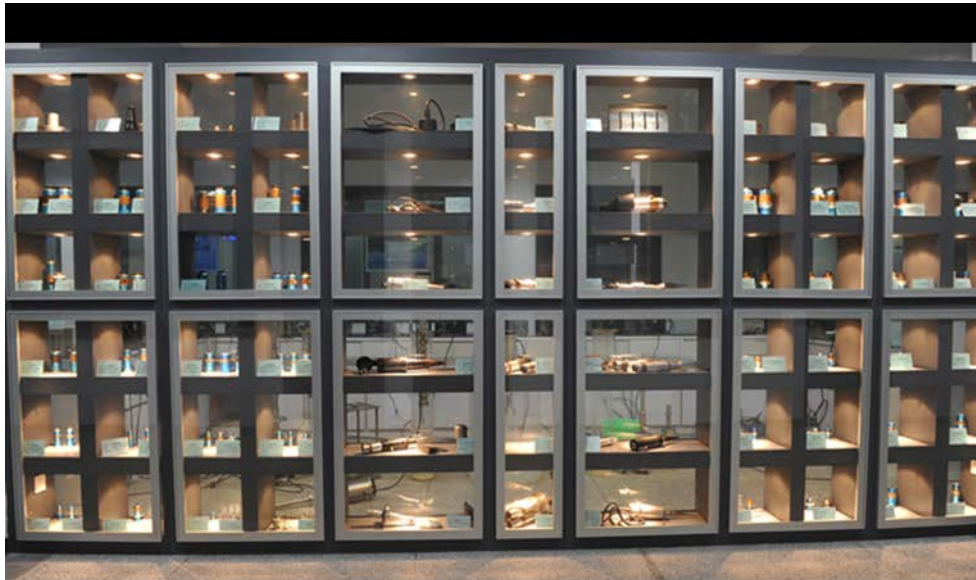

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-D53	Frequency:	28 KHz±1 KHz
Power:	500 W	Generator:	ZJS-500N
Working Type:	Intermittent	Shape:	Straight Type
Applications:	Household Appliances, The Packaging Industry, Toy Industry		

Automatic Thermoplastic Ultrasonic Welding Machine 500 W For Auto Door

Quick Detail:

Stable, safe use

According to the need to set the working time

Convenient and safe operation

The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

products	swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

Efficiency: The welding process is very fast, welding time is only 0-999 seconds.

Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).

Quality: Finished product is hermetic sealing (airtight and watertight).

Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).

Appearance: The joints are repeatable, clean and precise.

Small Industrial Ultrasonic Spot Welding Machine

[Large Image](#) : Small Industrial Ultrasonic Spot Welding Machine

Product Details:

Place of Origin: Hangzhou, China

Brand Name: FYCG

Certification: BV

Model Number: YP-D76

Payment & Shipping Terms:

Minimum Order Quantity: 1 Set

Packaging Details: Wooden Case

Delivery Time: 7 Working Days

Payment Terms: T/T Escrow

Supply Ability: 500 Sets/Month

[Contact Now](#)

Detailed Product Description

Model:	YP-D76	Frequency:	50Khz Or Custom Made
Working Mode:	PLC Or Manual	Material Of Head:	HRC≥50, Wear-resisting Alloy Steel
Hole For Line:	φ0.3 Mm, φ0.5 Mm Or Custom Made	Cable:	2M
Material Of Shell:	Nylon Or Aluminium		

Small Industrial Ultrasonic Spot Welding Machine

Quick Detail:

Steady welding point, completely eradicate insufficient solder

Save labor and cost

Search the frequency automatically

Description:

During the past half year, with many effort from the research development section of our company, at present we have successfully promote the intelligent card welding equipment substantially. After promotion, comparison with the former one, the properties of the equipment has been promoted highly, more stability, better in search the frequency at more wide range, and much better appearance. On the process using the former 60K equipment, with the damage of the welding horn, the frequency would be altered.(the frequency is decided by the size of the product).When the frequency is altered to a certain degree, the ultrasonic generator would be difficult to coincide with the frequency, then influencing to the normal running of all the ultrasonic system.

Applications:

The equipment is used for the coil embedded in a smart card.

Great company!
 — Julie (USA)

Specifications:

Model	YP-D76
Frequency	50Khz or custom made
Working Mode	PLC or manual
Material of Head	Wear-resisting alloy steel, HRC≥50
Hole for line	φ0.3 mm, φ0.5 mm or custom made
Cable	2M
Generator	V1.5
Size of generator	250*250*120 mm
Size of Shell	φ25*100 mm
Material of Shell	Nylon or aluminium
Cooling mode	Compressed air(φ4 mm)

Competitive Advantage:

Steady welding point, completely eradicate insufficient solder technically.
 The size of welding spots is the same, equality line, good effect on uniformity.
 The welding spot is small, wouldn't increase the weight of the coil, easy to do lamination and encapsulation.
 To leave out the immersion tin step before doing welding, save an operator.
 After skilled in welding, much faster than the way to use searing iron to do weld.
 On the process on manufactory, there is no waste gas, waste rubbish on pollution, runs in quiet and no noise.
 To select the frequency 60KHz, one machine could drive 5-10 ultrasonic products, the speed to do welding is much faster.
 Low power consumption, to save production cost for manufactory enterprise.

28 KHz HF Industrial Ultrasonic Spot Welding Machine Automatic For Circuit Board

Large Image : 28 KHz HF Industrial Ultrasonic Spot Welding Machine Automatic For Circuit Board

Product Details:

Place of Origin:	Hangzhou, China
Brand Name:	FYCG
Certification:	BV
Model Number:	YP-D45

Payment & Shipping Terms:

Minimum Order Quantity:	1 Set
Packaging Details:	Wooden Case
Delivery Time:	7 Working Days
Payment Terms:	T/T Escrow
Supply Ability:	100 Sets/Month

Detailed Product Description

Power:	200 W	Shape:	Pistol Type
Working Type:	Intermittent	Model:	YP-D45

28 KHz HF Industrial Ultrasonic Spot Welding Machine Automatic For Circuit Board

Quick Detail:

Stable, safe use
 According to the need to set the working time
 Convenient and safe operation
 The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control,

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

I'm Online Chat Now

products	electronic swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpet hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-D76	Frequency:	50Khz Or Custom Made
Working Mode:	PLC Or Manual	Material Of Head:	HRC≥50, Wear-resisting Alloy Steel
Hole For Line:	φ0.3 Mm, φ0.5 Mm Or Custom Made	Cable:	2M
Material Of Shell:	Nylon Or Aluminium		

50 KHz Small Automatic Ultrasonic Spot Welding Machine For ID Card / RF Card
Quick Detail:

Steady welding point, completely eradicate insufficient solder

Save labor and cost

Search the frequency automatically

Description:

During the past half year, with many effort from the research development section of our company, at present we have successfully promote the intelligent card welding equipment substantially. After promotion, comparison with the former one, the properties of the equipment has been promoted highly, more stability, better in search the frequency at more wide range, and much better appearance. On the process using the former 60K equipment, with the damage of the welding horn, the frequency would be altered.(the frequency is decided by the size of the product).When the frequency is altered to a certain degree, the ultrasonic generator would be difficult to coincide with the frequency, then influencing to the normal running of all the ultrasonic system.

Applications:

The equipment is used for the coil embedded in a smart card.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

I'm Online Chat Now

Contact Now

Specifications:

Model	YP-D76
Frequency	50Khz or custom made
Working Mode	PLC or manual
Material of Head	Wear-resisting alloy steel, HRC≥50
Hole for line	φ0.3 mm, φ0.5 mm or custom made
Cable	2M
Generator	V1.5
Size of generator	250*250*120 mm
Size of Shell	φ25*100 mm
Material of Shell	Nylon or aluminium
Cooling mode	Compressed air(φ4 mm)

Competitive Advantage:

Steady welding point, completely eradicate insufficient solder technically.
 The size of welding spots is the same, equality line, good effect on uniformity.
 The welding spot is small, wouldn't increase the weight of the coil, easy to do lamination and encapsulation.
 To leave out the immersion tin step before doing welding, save an operator.
 After skilled in welding, much faster than the way to use searing iron to do weld.
 On the process on manufactory, there is no waste gas, waste rubbish on pollution, runs in quiet and no noise.
 To select the frequency 60KHz, one machine could drive 5-10 ultrasonic products, the speed to do welding is much faster.
 Low power consumption, to save production cost for manufactory enterprise.

Detailed Product Description

Power:	500 W	Shape:	Pistol Type
Working Type:	Intermittent	Model:	YP-D51
Frequency:	28 KHz		

Hand Held Ultrasonic Spot Welding Machine For Clothing / Packaging , Pistol Type

Quick Detail:

Stable, safe use

According to the need to set the working time

Convenient and safe operation

The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations. Great company!

YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

Efficiency: The welding process is very fast, welding time is only 0-999 seconds.

Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).

Quality: Finished product is hermetic sealing (airtight and watertight).

Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).

Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-D76	Frequency:	50Khz Or Custom Made
Material Of Head:	HRC≥50, Wear-resisting Alloy Steel	Hole For Line:	φ0.3 Mm, φ0.5 Mm Or Custom Made
Cable:	2M	Material Of Shell:	Nylon Or Aluminium

Portable Coil Ultrasonic Spot Welding Machine High Efficiency , Steady Point

Quick Detail:

Steady welding point, completely eradicate insufficient solder
 Save labor and cost
 Search the frequency automatically

Description:

During the past half year, with many effort from the research development section of our company, at present we have successfully promote the intelligent card welding equipment substantially. After promotion, comparison with the former one, the properties of the equipment has been promoted highly, more stability, better in search the frequency at more wide range, and much better appearance. On the process using the former 60K equipment, with the damage of the welding horn, the frequency would be altered.(the frequency is decided by the size of the product).When the frequency is altered to a certain degree, the ultrasonic generator would be difficult to coincide with the frequency, then influencing to the normal running of all the ultrasonic system.

Applications:

The equipment is used for the coil embedded in a smart card.

Specifications:

Model	YP-D76
-------	--------

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations. Great company!

— Julie (USA)

Frequency	50Khz or custom made
Working Mode	PLC or manual
Material of Head	Wear-resisting alloy steel, HRC≥50
Hole for line	φ0.3 mm, φ0.5 mm or custom made
Cable	2M
Generator	V1.5
Size of generator	250*250*120 mm
Size of Shell	φ25*100 mm
Material of Shell	Nylon or aluminium
Cooling mode	Compressed air(φ4 mm)

I'm Online Chat Now

Contact Now

Competitive Advantage:

Steady welding point, completely eradicate insufficient solder technically.
 The size of welding spots is the same, equality line, good effect on uniformity.
 The welding spot is small, wouldn't increase the weight of the coil, easy to do lamination and encapsulation.
 To leave out the immersion tin step before doing welding, save an operator.
 After skilled in welding, much faster than the way to use searing iron to do weld.
 On the process on manufactory, there is no waste gas, waste rubbish on pollution, runs in quiet and no noise.
 To select the frequency 60KHz, one machine could drive 5-10 ultrasonic products, the speed to do welding is much faster.
 Low power consumption, to save production cost for manufactory enterprise.

PVC / UPVC Ultrasonic Plastic Welding Machine

Large Image : PVC / UPVC Ultrasonic Plastic Welding Machine

Product Details:

Place of Origin:	Hangzhou, China
Brand Name:	FYCG
Certification:	BV
Model Number:	YP-D57

Payment & Shipping Terms:

Minimum Order Quantity:	1 Set
Packaging Details:	Wooden Case
Delivery Time:	7 Working Days
Payment Terms:	T/T Escrow
Supply Ability:	100 Sets/Month

Contact Now

Detailed Product Description

Model:	YP-D57	Frequency:	28 KHz
Power:	800W	Working Type:	Intermittent
Shape:	Straight Type	Applications:	Car, Motorcycle, Stationery, Daily Necessities, The Application Of The Sports Industry

PVC / UPVC Ultrasonic Plastic Welding Machine

Quick Detail:

Stable, safe use
According to the need to set the working time
Convenient and safe operation
The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc

Great company!
 — Julie (USA)

I'm Online Chat Now

Household appliances	Electronic clock, electric trumpet hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type

Detailed Product Description

Model:	YP-D53	Frequency:	28 KHz
Power:	500 W	Working Type:	Intermittent
Shape:	Straight Type	Applications:	Electronic Products, The Application Of The Sports Industry, The Packaging Industry

Handheld Ultrasonic PVC Plastic Welding Machine / Equipment For Toys / Dolls / Gifts

Quick Detail:

Stable, safe use

According to the need to set the working time

Convenient and safe operation

The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
--------------	---

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

I'm Online Chat Now

Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

Efficiency: The welding process is very fast, welding time is only 0-999 seconds.

Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).

Quality: Finished product is hermetic sealing (airtight and watertight).

Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).

Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-D53	Power:	500 W
Working Type:	Intermittent	Shape:	Straight Type
Applications:	Electronic Products, The Application Of The Sports Industry, The Packaging Industry		

Portable Ultrasonic Plastic Welding Machine For PET / Acrylics Electronic Products

Quick Detail:

Stable, safe use
According to the need to set the working time
Convenient and safe operation
The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations. Great company!

— Julie (USA)

products	swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

Efficiency: The welding process is very fast, welding time is only 0-999 seconds.

Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).

Quality: Finished product is hermetic sealing (airtight and watertight).

Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).

Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Model:	YP-D21	Frequency:	20 KHz
Output Power:	2000 W	Voltage:	220 V
Applications:	Annealing, Heat Treatment, Hot Forging		

20 KHz Automatic Metal Ultrasonic Welding Machine
Quick Detail:

Welding machine
Used for metal welding
High working rate
High quality parts
Convenient and save labor

Description:

By using the ultrasonic high frequency vibration principle, the ultrasonic metal welder converts the ultrasonic vibration energy into friction energy to transfer the metal's surface. Under condition of producing the heat by the friction and putting a pressure to the metal, the metal pieces will fuse.

Applications:

Hot Forging: Aims to fabricate the work pieces of certain temperature into other shapes through forging press with the help of punch press ,forging machine or other equipments.

Smelting:

Mainly aims to melt the metal into liquid by using the high temperature, which is mainly applicable to smelting of iron, steel, copper, aluminum, zinc as well as various precious metals;

Heat Treatment:

It is mainly aims to change the hardening of the materials through the heat treatment to work pieces. Such as, quench for various hardware and tools, automobile and motorcycle, machine tools, hardware parts and machine parts, hardware mold, etc.

Welding/Brazing:

It mainly aims to melt the solder by heating it to a certain temperature for the purpose of connecting two types of metals of the same material or different material

Great company!

— Julie (USA)

I'm Online Chat Now

Annealing:

Annealing of various stainless steel products and other work pieces , such as stainless steel basin, stainless steel tube, cue ,brass lock, aluminum radiator and so on .

Specifications:

Model	YP-D21
Frequency	20 KHz
Output Power	2000 W
Voltage	220 V
Switch	Handle or foot switch
Power Adjusting	Step or continuous
Working Time Control	24 Hours
Weight	20-30 KG (Determined by the size of the horn)
Generator	V6.0

Competitive Advantage:

Fast Heating: The minimum rate of heating is less than one second (rate of heating is available for adjustment and control)

Wide Coverage of Heating: It can be used to heat various metal parts (replace removable induction coil as per different shape).

Easy Installation: It can be used once it is connected with power source, induction coil as well as water supply pipe and rising pipe; it is small in size and light in weight.

Easy Operation: You can learn to operate it within several minutes.

Fast start-up: It can be started to perform heating operation on condition that water and power supply is available.

Low Power Consumption: As compared with conventional vacuum tube high frequency equipments, it can save the power by approximately 70%. The smaller the size of the work pieces, the lower power consumption would be.

High Effectiveness: It has such features as uniform heating (it is applicable to adjust the spacing of the induction coil to ensure the appropriate temperature as required by each part of work piece), fast warming and limited oxic horizon, and can guard against any waste after annealing.

Comprehensive Protection: It has such functions as overvoltage, over-current, overheat and water shortage alarm indications as well as automatic control and protection.

Controllable Temperature: It is applicable to control the temperature for heating work pieces as per the preset heating time, and thereby control the heating temperature at a certain technical point.

Comprehensive Full Load Design: It can work continuously for 24 hours

Small Size and Light Weight: It has a weight of only several dozens of kilograms, of which, the limited floor space can effectively save the workshop space. **Sound operational environment:** it is favorable for environmental protection, conservation of energy and safety operation, which is free of any noise, exhaust gas and dust.

Elimination of High Voltage: it requires no step-up transformer which may produce approximately ten thousand voltages, and thus can ensure the maximum safety.

Detailed Product Description

Model:	YP-D21	Frequency:	20 KHz
Output Power:	2000 W	Voltage:	220 V
Applications:	Annealing, Heat Treatment, Welding/Brazing		

HF Portable Ultrasonic Metal Welding Machine

Quick Detail:

Welding machine
Used for metal welding
High working rate
High quality parts
Convenient and save labor

Description:

By using the ultrasonic high frequency vibration principle, the ultrasonic metal welder converts the ultrasonic vibration energy into friction energy to transfer the metal's surface. Under condition of producing the heat by the friction and putting a pressure to the metal, the metal pieces will fuse.

Applications:

Hot Forging: Aims to fabricate the work pieces of certain temperature into other shapes through forging press with the help of punch press ,forging machine or other equipments.

Smelting:

Mainly aims to melt the metal into liquid by using the high temperature, which is mainly applicable to smelting of iron, steel, copper, aluminum, zinc as well as various precious metals;

Heat Treatment:

It is mainly aims to change the hardening of the materials through the heat treatment to work pieces. Such as, quench for various hardware and tolls, automobile and motorcycle, machine tools, hardware parts and machine parts, hardware mold, etc.

Welding/Brazing:

It mainly aims to melt the solder by heating it to a certain temperature for the purpose of connecting two types of metals of the same material or different material

Great company!
 — Julie (USA)

I'm Online Chat Now

 **Contact Now**

Annealing:

Annealing of various stainless steel products and other work pieces , such as stainless steel basin, stainless steel tube, cue ,brass lock, aluminum radiator and so on .

Specifications:

Model	YP-D21
Frequency	20 KHz
Output Power	2000 W
Voltage	220 V
Switch	Handle or foot switch
Power Adjusting	Step or continuous
Working Time Control	24 Hours
Weight	20-30 KG (Determined by the size of the horn)
Generator	V6.0

Competitive Advantage:

- Fast Heating: The minimum rate of heating is less than one second (rate of heating is available for adjustment and control)
- Wide Coverage of Heating: It can be used to heat various metal parts (replace removable induction coil as per different shape).
- Easy Installation: It can be used once it is connected with power source, induction coil as well as water supply pipe and rising pipe; it is small in size and light in weight.
- Easy Operation: You can learn to operate it within several minutes.
- Fast start-up: It can be started to perform heating operation on condition that water and power supply is available.
- Low Power Consumption: As compared with conventional vacuum tube high frequency equipments, it can save the power by approximately 70%. The smaller the size of the work pieces, the lower power consumption would be.
- High Effectiveness: It has such features as uniform heating (it is applicable to adjust the spacing of the induction coil to ensure the appropriate temperature as required by each part of work piece), fast warming and limited oxic horizon, and can guard against any waste after annealing.
- Comprehensive Protection: It has such functions as overvoltage, over-current, overheat and water shortage alarm indications as well as automatic control and protection.
- Controllable Temperature: It is applicable to control the temperature for heating work pieces as per the preset heating time, and thereby control the heating temperature at a certain technical point.
- Comprehensive Full Load Design: It can work continuously for 24 hours
- Small Size and Light Weight: It has a weight of only several dozens of kilograms, of which, the limited floor space can effectively save the workshop space.
- Sound operational environment: it is favorable for environmental protection, conservation of energy and safety operation, which is free of any noise, exhaust gas and dust.
- Elimination of High Voltage: it requires no step-up transformer which may produce approximately ten thousand voltages, and thus can ensure the maximum safety.

Detailed Product Description

Model:	YP-D53	Frequency:	28 KHz±1 KHz
Power:	500 W	Generator:	ZJS-500N
Working Type:	Intermittent	Shape:	Straight Type

HF Industrial Hand Held Ultrasonic Welder

Quick Detail:

Stable, safe use
According to the need to set the working time
Convenient and safe operation
The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc

Great company!
 — Julie (USA)

I'm Online Chat Now

Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Spot Hand Held Ultrasonic Welder

[Large Image : Spot Hand Held Ultrasonic Welder](#)

Product Details:

Place of Origin: **Hangzhou, China**Brand Name: **FYCG**Certification: **BV**Model Number: **YP-D57**

Payment & Shipping Terms:

Minimum Order Quantity: **1 Set**Packaging Details: **Wooden Case**Delivery Time: **7 Working Days**Payment Terms: **T/T Escrow**Supply Ability: **100 Sets/Month**

Detailed Product Description

Model:	YP-D57	Frequency:	28 KHZ±1 KHZ
Power:	800 W	Generator:	ZJS-500N
Working Type:	Intermittent	Shape:	Straight Type
Applications:	The Packaging Industry, Toy Industry		

Spot Hand Held Ultrasonic Welder

Quick Detail:

Stable, safe use

According to the need to set the working time

Convenient and safe operation

The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc

Great company!
— Julie (USA)

I'm Online Chat Now

 Contact Now

Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

Efficiency: The welding process is very fast, welding time is only 0-999 seconds.

Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).

Quality: Finished product is hermetic sealing (airtight and watertight).

Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).

Appearance: The joints are repeatable, clean and precise.

Portable Hand Held Ultrasonic Welder 500W For Plastic Toys / Toy Industry , High Frequency

[Large Image : Portable Hand Held Ultrasonic Welder 500W For Plastic Toys / Toy Industry , High Frequency](#)

Product Details:

Place of Origin: **Hangzhou, China**
 Brand Name: **FYCG**
 Certification: **BV**
 Model Number: **YP-D51**

Payment & Shipping Terms:

Minimum Order Quantity: **1 Set**
 Packaging Details: **Wooden Case**
 Delivery Time: **7 Working Days**
 Payment Terms: **T/T Escrow**
 Supply Ability: **100 Sets/Month**

Detailed Product Description

Model:	YP-D51	Frequency:	28 KHz±1 KHz
Power:	500 W	Generator:	ZJS-500N
Working Type:	Intermittent	Applications:	Car, Motorcycle, Stationery, Daily Necessities, The Application Of The Sports Industry

Portable Hand Held Ultrasonic Welder 500W For Plastic Toys / Toy Industry , High Frequency

Quick Detail:

Stable, safe use
 According to the need to set the working time
 Convenient and safe operation
 The overall carrying convenient, wide application range

Description:

Handheld ultrasonic welding machines, also known as portable ultrasonic welding machines, handheld ultrasonic welding machines, hand-held welding machine, portable welding machine, ultrasonic spot welding, riveting machines, ultrasonic point welder, can be used for the butt welding of thermoplastics, welding head can also be replaced according to customer demand for riveting, spot welding, embedding, removal process, compared to other traditional crafts (such as adhesive, scald together or screw fastening, etc.), with high production efficiency and welding quality good, environmentally friendly and energy-saving advantages.

Applications:

Electronic and electrical appliances, auto parts, clothing and packaging, textile industry, environmental industry, medical equipment, the toy industry, communications equipment and other industries.

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations. Great company!

— Julie (USA)

 **Contact Now**

Toy industry	Plastic toys, water guns, aquatic life video game, children dolls, plastic gifts, etc
Electronic products	Recording, audio tape boxes and core wheel, disk enclosure, board of mobile phone batteries and rectifier transformers, switches and sockets, remote control, electronic swatter, pseudo-imitation caps, etc
Household appliances	Electronic clock, electric trumpeter hairdryer, steam iron water tank, electric kettle air-hsiang, computer, etc
Stationery, daily necessities	Stationery, aquarium ruler, the raphe folder and shell, pen stand, cosmetics box shell, the end of the toothpaste tube seal, mirror, insulated cup, lighter, seasoning bottles sealed container
Car, motorcycle	Battery, front corner lamp, rear tail light, instrument, reflectors, automotive manual welding jacket, the car door welded baffle welding, automobile, car mats welding, automotive bumper repair welding
The application of the sports industry	Table tennis, table tennis bats, badminton rackets, tennis rackets, golf clubs, pool table, treadmill roller rope skipping handle stepper, treadmill accessories, box jumps, gymnastics mats, boxing gloves, boxing sandbag Sanda protective gear, the path to indicate the brand, the X Display Stand and other sports equipment, etc
The packaging industry	Hollow crate welding, ziplock welded

Specifications:

Model	Frequency	Power	Generator	Function area	Application	Working type	Shape
YP-D45	28 KHz±1 KHz	200 W	ZJS-500N	According to the customer need to customize the tool head		Intermittent	Pistol type
YP-D47		200 W	ZJS-500N				Straight type
YP-D49		300 W	ZJS-500N				Straight type
YP-D51		500 W	ZJS-500N				Pistol type
YP-D53		500 W	ZJS-500N				Straight type
YP-D55		800 W	ZJS-500N				Pistol type
YP-D57		800 W	ZJS-500N				Straight type

Pistol type: in accordance with the shape design of human body engineering, ultrasonic start switch is located on the trigger, easy to grasp and use the welding operation, especially suitable for horizontal or vertical.

Straight type: for the appearance of design straight, ultrasonic start switch is located outside the cylinder, easy welding and hand carried, can also be installed between the on machine, welding operation for each direction.

Competitive Advantage:

- Efficiency: The welding process is very fast, welding time is only 0-999 seconds.
- Strength: Can bear more pressure and tension (the weld joint has same strength as the base material).
- Quality: Finished product is hermetic sealing (airtight and watertight).
- Cost: Non bolt or glue, reduce labor and costs (no adhesives, screws, connective bolts).
- Appearance: The joints are repeatable, clean and precise.

Detailed Product Description

Waterproof Piezoelectric Ultrasonic Transducer

Quick Detail:

Larger amplitude, bigger output power, high-sound intensity, high-power density application

Description:

- 1.High Efficiency: of high mechanical factor. High transfer efficiency is obtained when working in resonance frequency.
- 2.Big amplitude: designed and chosen by computer, high rate in oscillation speed and big amplitude in front operculum.
- 3.Big Power: under the function of the pre-stressed force screw rod, the piezoelectricity ceramics can work freely in the highest level of power.
- 4.In good heat resistance: of small resonance impedance, less heat produced, can be used in a wide range of temperature with long life and high reliability.

Specifications:

Model	YP-3020-6D
Connect Screw	3/8-24UNF
Ceramic Diameter	30 mm
Quantity of Ceramic	6 pcs
Frequency	20 KHz
Resistance	15 Ω
Capacitance	8000-9000 pF
Input Power	600 W
Amplitude	9 μm

price meet my expectations.
Great company!

High Frequency Ultrasonic Atomizing Piezoelectric Transducer

[Large Image : High Frequency Ultrasonic Atomizing Piezoelectric Transducer](#)

Product Details:

Place of Origin: Hangzhou, China

Brand Name: FYCG

Certification: BV

Model Number: YP-5015-4Z

Payment & Shipping Terms:

Minimum Order Quantity: 1 Unit

Packaging Details: Wooden Case

Delivery Time: 5 Working Days

Payment Terms: T/T Escrow

Supply Ability: 5000 Units/Month

Detailed Product Description

High Frequency Ultrasonic Atomizing Piezoelectric Transducer

Quick Detail:

Stabilized power and high reliability widely application

Description:

- 1.High Efficiency: of high mechanical factor. High transfer efficiency is obtained when working in resonance frequency.
- 2.Big amplitude: designed and chosen by computer, high rate in oscillation speed and big amplitude in front operculum.
- 3.Big Power: under the function of the pre-stressed force screw rod, the piezoelectricity ceramics can work freely in the highest level of power.
- 4.In good heat resistance: of small resonance impedance, less heat produced, can be used in a wide range of temperature with long life and high reliability.

Specifications:

Model	YP-5015-4Z
Connect Screw	M8 1.5
Ceramic Diameter	50 mm
Quantity of Ceramic	4 pcs
Frequency	15 KHz
Resistance	15 Ω
Capacitance	12000-14500 pF
Input Power	1500 W
Amplitude	8 μm

Certifications

Stable machine, competitive price, rich products series.

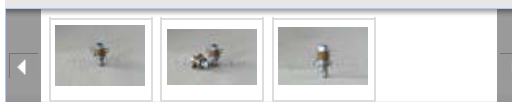

— Alan Scott (U.K.)

Good design,make scheme according customers' requirement.

Detailed Product Description

Connect Screw:	1/2-20UNF	Ceramic Diameter:	50 Mm
Frequency:	20 KHz	Capacitance:	19000-25000 PF
Input Power:	2000 W		

Atomizing Ceramic Piezoelectric Ultrasonic Transducer 20 KHz High Reliability

Quick Detail:

Larger amplitude, bigger output power, high-sound intensity, high-power density application

Description:

- 1.High Efficiency: of high mechanical factor. High transfer efficiency is obtained when working in resonance frequency.
- 2.Big amplitude: designed and chosen by computer, high rate in oscillation speed and big amplitude in front operculum.
- 3.Big Power: under the function of the pre-stressed force screw rod, the piezoelectricity ceramics can work freely in the highest level of power.
- 4.In good heat resistance: of small resonance impedance, less heat produced, can be used in a wide range of temperature with long life and high reliability.

Specifications:

Model	YP-5020-6D
Connect Screw	1/2-20UNF
Ceramic Diameter	50 mm
Quantity of Ceramic	6 pcs
Frequency	20 KHz

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Resistance	15 Ω
Capacitance	19000-25000 pF
Input Power	2000 W
Amplitude	10 μm

Competitive Advantage:

We are earliest Ultrasonic Enterprises in China.
30 years of expertise and experience.
Quality first.
Top national defense technology.
The highest yield, the largest market share.

Detailed Product Description

Model:	YP-5020-2P	Connect Screw:	M18 1.5
Ceramic Diameter:	50 Mm	Frequency:	20 KHz
Resistance:	20 Ω	Capacitance:	5500-6500 PF

20 KHz Waterproof Piezoelectric Ultrasonic Cleaner Transducer High Reliability

Quick Detail:

Good heat releasing, multiple choice of fixation

Description:

- 1.High Efficiency: of high mechanical factor. High transfer efficiency is obtained when working in resonance frequency.
- 2.Big amplitude: designed and chosen by computer, high rate in oscillation speed and big amplitude in front operculum.
- 3.Big Power: under the function of the pre-stressed force screw rod, the piezoelectricity ceramics can work freely in the highest level of power.
- 4.In good heat resistance: of small resonance impedance, less heat produced, can be used in a wide range of temperature with long life and high reliability.

Specifications:

Model	YP-5020-2P
Connect Screw	M18 1.5
Ceramic Diameter	50 mm
Quantity of Ceramic	2 pcs
Frequency	20 KHz

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

— Julie (USA)

Resistance	20 Ω
Capacitance	5500-6500 pF
Input Power	900 W
Amplitude	4 μm

Detailed Product Description

Ultrasonic Oscillator For Cutting Machine

Description:

Ultrasonic booster can change the amplitude of transducer. Booster is a passive device and cannot produce vibration itself. It is only to output after the input vibration is changed into amplitude, and finishing the impedance conversion at the same time. Under the stimulus of electric field, ultrasonic transducer can produce regular vibration and the amplitude is about 10μmm commonly. That is not enough to finish the welding and processing step directly.

Through with the suitable booster, the amplitude of ultrasonic can be changed in a large range. If the material is enough intensive, the amplitude can exceed 100μmm.

We named oscillator after connecting ultrasonic transducer with booster.

On the other hand, when the booster works vibration through longitudinal and extension, on the both sides of the particle direction of motion is the opposite, which is equal to a rest section. This section is named nodal point, which is the best-fixed point of the oscillator. To departure from the fixed point, it will reduce the work efficiency of the oscillator.

In the general, the transform efficiency of aluminum booster is high but the intension of material is low and easy to cracking and easy to slipping from the hole of screw; the intension of the steel booster is high but the sound impedance is large comparatively; the all round properties of the titanium alloy booster is good but the price is high and the processing is difficult.

Specifications:

Model	YP-6015-8GZ
Package Type	Through Hole
Frequency	15 KHz
Capacitance	13000-32000 pF
Dimension	60 mm

Detailed Product Description

Aluminium Small Ultrasonic Oscillator

Quick Detail:

15Khz Ultrasonic Oscillator

Higher quality of electronic component

Analog or Digital generator

Description:

Ultrasonic Oscillator is the main part of high-power ultrasonic system, include booster and Transducer (converter). Ultrasonic booster can change the amplitude of transducer. Booster is a passive device and cannot produce vibration itself. It is only to output after the input vibration is changed into amplitude, and finishing the impedance conversion at the same time. Under the stimulus of electric field, ultrasonic transducer can produce regular vibration and the amplitude is about 10μmm commonly. That is not enough to finish the welding and processing step directly. Through with the suitable booster, the amplitude of ultrasonic can be changed in a large range.

Applications:

Ultrasonic Oscillator is used for ultrasonic welding machine. It's the core of ultrasonic welding equipment.

Specifications:

Model	YP-6015-4BD
Package Type	Through Hole
Frequency	15 KHz
Capacitance	9500-11000 pF
Dimension	60mm

Booster	1
Material	Aluminium
Color	Black
Piezoelectric Chip	4

Competitive Advantage:

High mechanical quality and excellent electro-acoustic conversion efficiency , providing a high output amplitude.

Piezoelectric element offer a high speed of vibration. Through bolt-on mounting, mechanical intensity and amplitude have been improved.

Having steady output amplitude even the load markedly changed.

Extended using temperature, ensuring good amplitude linearity. Lower resonant impedance, ensuring high conversion efficiency.

Bolt-on mounting gives the fast, easy installation and high reliability.

Piezoelectric element offer a high speed of vibration. Through bolt-on mounting, mechanical intensity and amplitude have been improved.

Having steady output amplitude even the load markedly changed.

Extended using temperature, ensuring good amplitude linearity. Lower resonant impedance, ensuring high conversion efficiency.

Bolt-on mounting gives the fast, easy installation and high reliability.

Detailed Product Description

Frequency:	25 KHz	Capacitance:	8900-13000 PF
Dimension:	38mm	Material:	Aluminium

25 KHz Ultrasonic Oscillator Waterproof With Booster And Transducer , 38mm

Description:

Ultrasonic booster can change the amplitude of transducer. Booster is a passive device and cannot produce vibration itself. It is only to output after the input vibration is changed into amplitude, and finishing the impedance conversion at the same time. Under the stimulus of electric field, ultrasonic transducer can produce regular vibration and the amplitude is about 10μmm commonly. That is not enough to finish the welding and processing step directly.

Through with the suitable booster, the amplitude of ultrasonic can be changed in a large range. If the material is enough intensive, the amplitude can exceed 100μmm. We named oscillator after connecting ultrasonic transducer with booster.

On the other hand, when the booster works vibration through longitudinal and extension, on the both sides of the particle direction of motion is the opposite, which is equal to a rest section. This section is named nodal point, which is the best-fixed point of the oscillator. To departure from the fixed point, it will reduce the work efficiency of the oscillator.

In the general, the transform efficiency of aluminum booster is high but the intension of material is low and easy to cracking and easy to slipping from the hole of screw; the intension of the steel booster is high but the sound impedance is large comparatively; the all round properties of the titanium alloy booster is good but the price is high and the processing is difficult.

15 KHz Waterproof Ultrasonic Oscillator / Vibrator For Ultrasonic Welding Machine

Quick Detail:

15 KHz Ultrasonic Oscillator
Higher quality of electronic component
Analog or Digital generator

Description:

Ultrasonic Oscillator is the main part of high-power ultrasonic system, include booster and Transducer (converter). Ultrasonic booster can change the amplitude of transducer. Booster is a passive device and cannot produce vibration itself. It is only to output after the input vibration is changed into amplitude, and finishing the impedance conversion at the same time. Under the stimulus of electric field, ultrasonic transducer can produce regular vibration and the amplitude is about 10μmm commonly. That is not enough to finish the welding and processing step directly. Through with the suitable booster, the amplitude of ultrasonic can be changed in a large range.

Applications:

Ultrasonic Oscillator is used for ultrasonic welding machine. It's the core of ultrasonic welding equipment.

Detailed Product Description

Electrical Ultrasonic Generator

Quick Detail:

A variety of frequency selection

Stable

High power

Low energy consumption

Description:

The ultrasonic generator also called ultrasonic power supply, electronic box and ultrasonic controller. It is an important part of high power ultrasonic system.

Applications:

Ultrasonic generator main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.

Ultrasonic generator is applied to all kinds of ultrasonic equipment, mainly with ultrasonic welding, ultrasonic cutting, ultrasonic chemical equipment and ultrasonic welding equipment such as non-woven fabric.

Specifications:

Model	V5.0
Frequency	15 KHz – 60 KHz
Capacitance	500 – 30000 pF
Size	220*500*285 mm
Weight	10.5 KG
Output Power	100 – 3000 W

— Julie (USA)

I'm Online Chat Now

Voltage	220 V 50 Hz
Temperature	≤300
Moisture	≤85%R

Competitive Advantage:

Real time monitoring: Monitoring the system operating frequency and power

Parameter adjustment: According to the different requirements, adjust the power, amplitude, the running time

Automatic equipment with frequency: Once the initial setup, can work continuously without the need to adjust the generator.

The automatic amplitude control: Changing load transducer work process can automatically adjust the driving characteristics of ultrasonic tool head, ensure the stable amplitude.

System protection: The system work in the unsuitable operation environment, the generator will stop working and alarm display, to protect the equipment from damage.

Amplitude adjustment: Amplitude can instantly increase or decrease in the work process, the amplitude of the set range: 0%~100%.

Automatic frequency search: Working frequency can be automatically measured and stored in the tool head.

Non resonant state (forced vibration): General driving power supply must be working in the resonant state; the power supply can be the special requirements of customers, stability in the non resonant state, very suitable for some special application of ultrasonic.

Comparison:

	Analog generator	Digital generator
Circuit	Analog circuit, discrete components	Digital circuit, the chip control
Automatic search	x	•
Automatic frequency tracking	x	•
Frequency adjustment range	±0.15 KHz	±0.5 KHz

Detailed Product Description

Ultrasonic Generator For Welding Machine

Quick Detail:

Cheap
 Simple structure
 Easy to repair

Description:

The ultrasonic generator, also called ultrasonic driving power supply, electronic box, control box, is an important part of high power ultrasonic system. Main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.

Applications:

Ultrasonic generator main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.
 Ultrasonic generator is applied to all kinds of ultrasonic equipment, mainly with ultrasonic welding, ultrasonic cutting, ultrasonic chemical equipment and ultrasonic welding equipment such as non-woven fabric.

Specifications:

Model	ZJS-2000
Frequency	15 KHz – 60 KHz
Size	410*600*180 mm
Weight	14 KG
Output Power	100 – 3000 W
Voltage	220 V 50 Hz

Temperature	≤300
Moisture	≤85%RH

Competitive Advantage:

The use of high-quality electronic components assembly.
 Advanced and reliable protection circuit makes the reliability is greatly improved.
 FM and frequency automatic compensation, frequency of the digital display.
 Frequency deviation, working current two meter indication and protection function.
 According to the customer request interface plug.
 Has the advantages of simple structure, easy to repair, cheap.

Comparison:

	Analog generator	Digital generator

Detailed Product Description

Frequency:	15 KHz – 60 KHz	Capacitance:	500 – 30000 PF
Size:	380*350*180 Mm	Output Power:	100 – 3000 W
Voltage:	220 V 50 Hz		

Intelligent Automatic Ultrasonic Generator / Controller For Cleaner , Waterproof

Quick Detail:

A variety of frequency selection
Stable
High power
Low energy consumption

Description:

The ultrasonic generator also called ultrasonic power supply, electronic box and ultrasonic controller. It is an important part of high power ultrasonic system.

Applications:

Ultrasonic generator main function is to generate high power and high frequency alternating current, drive the ultrasonic transducer.

Ultrasonic generator is applied to all kinds of ultrasonic equipment, mainly with ultrasonic welding, ultrasonic cutting, ultrasonic chemical equipment and ultrasonic welding equipment such as non-woven fabric.

Specifications:

price meet my expectations.
Great company!

— Julie (USA)

Contact Now

Model	V6.0
Frequency	15 KHz – 60 KHz
Capacitance	500 – 30000 pF
Size	380*350*180 mm
Weight	11 KG
Output Power	100 – 3000 W
Voltage	220 V 50 Hz
Temperature	≤300
Moisture	≤85%RH

Competitive Advantage:

Real time monitoring: Monitoring the system operating frequency and power

Parameter adjustment: According to the different requirements, adjust the power, amplitude, the running time

Automatic equipment with frequency: Once the initial setup, can work continuously without the need to adjust the generator.

The automatic amplitude control: Changing load transducer work process can automatically adjust the driving characteristics of ultrasonic tool head, ensure the stable amplitude.

System protection: The system work in the unsuitable operation environment, the generator will stop working and alarm display, to protect the equipment from damage.

Amplitude adjustment: Amplitude can instantly increase or decrease in the work process, the amplitude of the set range: 0%~100%.

Automatic frequency search: Working frequency can be automatically measured and stored in the tool head.

Non resonant state (forced vibration): General driving power supply must be working in the resonant state; the power supply can be the special requirements of customers, stability in the non resonant state, very suitable for some special application of ultrasonic.

Comparison:

	Analog generator	Digital generator
Circuit	Analog circuit, discrete components	Digital circuit, the chip control
Automatic search	x	•
Automatic frequency tracking	x	•
Frequency adjustment range	±0.15 KHz	±0.5 KHz
Power regulation	x	•
24 hours of continuous work	x	•
Non resonant condition	x	•
LCD	x	•
Add the PLC protocol	x	•
Automatic circuit protection	Bad, easy to cause the damage of components	Good
Repair method	Professional repair	Module replacement

Competitive Advantage:

The use of high-quality electronic components assembly.
Advanced and reliable protection circuit makes the reliability is greatly improved.
FM and frequency automatic compensation, frequency of the digital display.
Frequency deviation, working current two meter indication and protection function.
According to the customer request interface plug.
Has the advantages of simple structure, easy to repair, cheap.

Detailed Product Description

Fabric High Power Ultrasonic Cutting Machine

Quick Detail:

High precision cutting, compound unchanged

Easy to apply to automation

Clean cutting surface, bonding performance

Fast speed, high efficiency, no pollution

Smooth, reliable cutting, accurate trimming, no deformation, no raising, fuzzing, spinning, wrinkling

Description:

Ultrasonic Cutting Machine is a class of device using ultrasonic energy for cutting. Instead of using traditional blade cutting, ultrasonic cutting has its advantages of smooth, reliable cutting, accurate trimming, no deformation, no raising, fuzzing, spinning, wrinkling etc. It can avoid the rough cutting-edge, coked edge, fuzballs and other shortcomings of laser cutting machine.

Applications:

Ultrasonic cutting machine is used for cutting rubber, synthetic fabric, cloth, plastic, sheet metal, food etc.

Specifications:

Model	YP-Q83
Frequency	20 KHz
Power	2000 W
Size of cutter	Design as customers' need
Length of cable	3 M

Great company!
— Julie (USA)

I'm Online Chat Now

Generator	V6.0
Outer skin	Aluminium
Weight	13.5 KG
Voltage	AC220V 50Hz
Material of cutter	Magnalium alloy, titanium alloy, stainless steel

PS: we can produce the cutter according to your drawing or design by your requirement.

Competitive Advantage:

The use of high power ultrasonic transducer vibrating element, ensure the long time stable working
 The cutting speed is improved greatly, the efficiency 10 times higher than the traditional cutting knife.
 Cutting all kinds of ordinary tool to cut products, solve production problems
 Can be installed high hardness blade, cutting blade can be replaced, greatly reducing the use cost
 Cutting tool complete varieties, can also be customized according to customer process shaped cutting tool
 Installation, easy to use, almost does not change the original cutting process
 Can be used in the production of circular ultrasonic tool cutting equipment, rolling cutting, suitable for
 cutting special
 Can use air-cooled, water-cooled design, adapt to various working conditions and environment

Outer skin	Aluminium
Weight	13.5 KG
Voltage	AC220V 50Hz
Material of cutter	Magnalium alloy, titanium alloy, stainless steel

PS: we can produce the cutter according to your drawing or design by your requirement.

Competitive Advantage:

The use of high power ultrasonic transducer vibrating element, ensure the long time stable working
 The cutting speed is improved greatly, the efficiency 10 times higher than the traditional cutting knife.
 Cutting all kinds of ordinary tool to cut products, solve production problems
 Can be installed high hardness blade, cutting blade can be replaced, greatly reducing the use cost
 Cutting tool complete varieties, can also be customized according to customer process shaped cutting tool
 Installation, easy to use, almost does not change the original cutting process
 Can be used in the production of circular ultrasonic tool cutting equipment, rolling cutting, suitable for cutting special
 Can use air-cooled, water-cooled design, adapt to various working conditions and environment

Detailed Product Description

Model:	YP-Q65	Frequency:	20 KHz
Power:	500 W	Size Of Cutter:	85*25 Mm
Length Of Cable:	3 M	Voltage:	AC220V 50Hz

PVC Plastic / Cloth Ultrasonic Cutting Machine AC 220V 20 KHz With Generator V6.0

Quick Detail:

High precision cutting, compound unchanged
 Easy to apply to automation
 Clean cutting surface, bonding performance
 Fast speed, high efficiency, no pollution
 Smooth, reliable cutting, accurate trimming, no deformation, no raising, fuzzing, spinning, wrinkling

Description:

Ultrasonic Cutting Machine is a class of device using ultrasonic energy for cutting. Instead of using traditional blade cutting, ultrasonic cutting has its advantages of smooth, reliable cutting, accurate trimming, no deformation, no raising, fuzzing, spinning, wrinkling etc. It can avoid the rough cutting-edge, coked edge, fuzballs and other shortcomings of laser cutting machine.

Applications:

Ultrasonic cutting machine is used for cutting rubber, synthetic fabric, cloth, plastic, sheet metal, food etc.

Specifications:

Model	YP-Q65
Frequency	20 KHz
Power	500 W

— Ahmet Ogmen (Turkey)

Short delivery time , quality and price meet my expectations.
Great company!

Detailed Product Description

Model:	60 W	Frequency:	20 KHz
Atomization Volume:	100 L/H	Average Particle Diameter Of Fog:	51µm
Atomization Head Structure:	Horn	Power:	100 W
Application:	A Variety Of Oil Mucus, Chemical Liquid, Ordinary Water, Variety Of Liquid Substances		

Portable Ultrasonic Nozzle Spray Systems

Quick Detail:

Atomize various kinds of liquid
Large atomizing volume, energy-saving, environmental protection
No plug, no abrasion

Description:

Ultrasonic spray (FOG) is to use the energy of ultrasonic water or liquid scattered, forming several microns to 100 microns in size of particles, used for air humidifying, granulating, mixing liquid, promote chemical reactions, spraying, molten metal powder etc..

Applications:

Atomization humidification, chemical mixing, production, spray drying granulation, paint spraying, metal milling and so on

Great company!

Specifications:

Model	YP-W51	YP-W55	YP-W57	YP-W59	YP-W61	YP-W63
Frequency	60 KHz	50 KHz	40 KHz	30 KHz	20 KHz	15 KHz
Atomization Volume	0.5 L/H	2 L/H	10 L/H	70 L/H	100 L/H	150 L/H
Average Particle Diameter of Fog	20µm	28µm	32µm	39µm	51µm	62µm
Power Consumption	0.01 Degrees/Kg			0.001 Degrees/Kg		
Atomization Head Structure	Cylindrical			Horn		
Power	30 W	30 W	60 W	100 W	300 W	500 W
The Application of Atomizing Media	Ordinary water, a variety of liquid substances, chemical liquid, a variety of oil mucus, metal melt and so on					

Competitive Advantage:

- A major breakthrough in spray technology, you can spray a variety of liquids.
- Low power consumption, the fog of great energy saving.
- No plug, no abrasion, no noise, no pressure, no moving parts.
- Can be any combination to meet the requirements of the spray volume.
- The use of high-performance titanium and stainless steel.

Detailed Product Description

Model:	YP-W57	Frequency:	40 KHz
Atomization Volume:	10 L/H	Average Particle Diameter Of Fog:	32µm
Atomization Head Structure:	Cylindrical	Power:	60 W
Application:	Chemical Liquid, Metal Melt, Variety Of Liquid Substances		

High Power Ultrasonic Nozzle Spray / Nebulizer

Quick Detail:

Atomize various kinds of liquid

Large atomizing volume, energy-saving, environmental protection

No plug, no abrasion

Description:

Ultrasonic spray (FOG) is to use the energy of ultrasonic water or liquid scattered, forming several microns to 100 microns in size of particles, used for air humidifying, granulating, mixing liquid, promote chemical reactions, spraying, molten metal powder etc..

Applications:

Atomization humidification, chemical mixing, production, spray drying granulation, paint spraying, metal milling and so on

Specifications:

Great company!
 — Julie (USA)

Model	YP-W51	YP-W55	YP-W57	YP-W59	YP-W61	YP-W63
Frequency	60 KHz	50 KHz	40 KHz	30 KHz	20 KHz	15 KHz
Atomization Volume	0.5 L/H	2 L/H	10 L/H	70 L/H	100 L/H	150 L/H
Average Particle Diameter of Fog	20µm	28µm	32µm	39µm	51µm	62µm
Power Consumption	0.01 Degrees/Kg			0.001 Degrees/Kg		
Atomization Head Structure	Cylindrical			Horn		
Power	30 W	30 W	60 W	100 W	300 W	500 W
The Application of Atomizing Media	Ordinary water, a variety of liquid substances, chemical liquid, a variety of oil mucus, metal melt and so on					

Competitive Advantage:

A major breakthrough in spray technology, you can spray a variety of liquids.
 Low power consumption, the fog of great energy saving.
 No plug, no abrasion, no noise, no pressure, no moving parts.
 Can be any combination to meet the requirements of the spray volume.
 The use of high-performance titanium and stainless steel.

High Power Ultrasonic Nozzle Spray / Nebulizer

Certifications

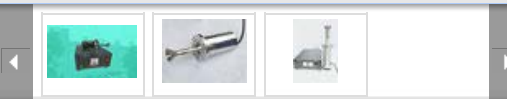

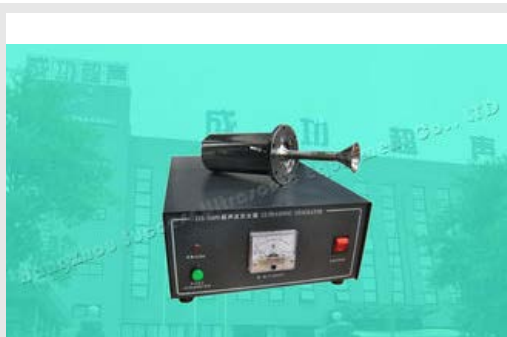

Stable machine, competitive price, rich products series.

— Alan Scott (U.K.)

Good design,make scheme according customers' requirement.

Industrial Humidification Ultrasonic Nozzle Spray For Granulating , Mixing Liquid

Large Image : Industrial Humidification Ultrasonic Nozzle Spray For Granulating , Mixing Liquid

Product Details:

Place of Origin: Hangzhou, China

Brand Name: FYCG

Certification: BV

Model Number: YP-W61

Payment & Shipping Terms:

Minimum Order Quantity: 1 Set

Packaging Details: Wooden Case

Delivery Time: 10-15 Working Days

Payment Terms: T/T Escrow

Supply Ability: 100 Sets/Month
