Sweco is the world leader in particle-separation and size reduction solutions.

We have over 100 service offices surrounding the globe. With this type of global commitment, you can be assured that Sweco will provide you with the best service in the industry . . . no matter where you are located.

Featured Products

Round Separation Equipment

Behind each Vibro-Energy Round Separator is the Sweco legacy, synonymous with top quality equipment, innovative design, and exacting standards. Since 1942, when Sweco patented the first vibratory separator to today's high yield Vibro-Energy Round Separators, Sweco has continued our tradition of solutions and service.

[See full line of Round Separation Equipment >](#)

(Or select from Full Product List below)

GyraMax™ Gyratory Sifter

Sweco now offers our customers yet another separation solution to further optimize your facilities' production. The Sweco GyraMax™ Gyratory Sifter **maximizes** productivity ... provides **maximum** vibration control ... enables **maximum** recovery of clean, acceptable product. The Sweco GyraMax ... just another way that Sweco makes separation simple.

If you would like to set up a test today, go to the [Contact Us](#) page now or contact your [local sales representative](#).

About

Headquartered in Florence, Ky., USA, Sweco also maintains manufacturing facilities in Macon, Ga., Tulsa, Ok., Belgium and Singapore, a joint-venture in Mexico, and a licensee in Australia. In addition, Sweco has over 100 service offices surrounding the globe. With this type of global commitment, you can be assured that Sweco will provide you with the best service in the industry . . . no matter where you are located.

The Sweco Mission

To be the world leader in particle-separation and size reduction solutions. To meet the challenges of an ever-changing world market by seeking innovative new technologies both inside and outside our organization. To provide responsive, intelligent sales support teams that are as knowledgeable about the needs of our customers as they are about our products. To engineer and manufacture equipment that provides quality, value, and dependability. To pursue all avenues that may enhance or improve our products and the products of our customers. To build a solid, lasting relationship with you, our customer.

The Sweco Commitment

To continue our sixty year tradition of providing quality, value, and performance by meeting your processing needs today, tomorrow, and far into the future.

Innovation

We constantly strive to improve our original designs with advances such as Sweco's Supertaut Plus II Screens. Our research and development in separation technology led to the creation of the QuickChange Separator, which drastically cuts down screen change time. And Sweco's Technology Center allows you to run a small scale, half scale or full scale test of your application to determine what kind of Sweco machine is right for you.

Quality

Sweco quality is found in both our products and our service. Special customer assistance features like our Motion Generator Replacement Program and Authentic Sweco Aftermarket Parts ensure fast and efficient service. Sweco's skilled design team will work with you to customize our machinery to fit your needs. Our extensive rep network is always on call to answer questions about your specific application.

Experience

Most of our field sales engineers have been with us for over 20 years. That means they can give you the type of hands-on guidance that you need to meet your process requirements. Their skill, training and extensive background have helped Sweco remain the leader in process technology for over 50 years.

The Sweco Family

Generations of Performance Working For You.
Innovation. Quality. Experience. Whatever your application, Sweco values mean important value for you.
Talk to a Sweco professional today.

Products

• [Round Separators](#)

Behind each Vibro-Energy Round Separator is the Sweco legacy, synonymous with top quality equipment, innovative design, and exacting standards. Since 1942, when Sweco patented the first vibratory separator to today's high yield Vibro-Energy Round Separators, Sweco has continued our tradition of solutions and service.

• [Rectangular Separators](#)

Available with linear, round or elliptical motion, the Full-Flow is ideal for a variety of diverse applications. The linear motion (LM) is ideal for dewatering large volumes of heavy solids on coarse to medium meshes. Balanced elliptical motion (BEM) is especially well suited for fine mesh dewatering of slurries. The gentler round motion (RM) screens viscous slurries, which have minimal oversize solids, such as clay slip and pigments, at high rates through screens as fine as 400 mesh. Round motion also classifies dry powders for many industries. The Universal Motion (UM) model incorporates all three motions into one machine allowing the used to precisely dial in the ideal motion for each application. So, whether you are processing wet or dry materials through coarse or fine mesh screens, there is a Full-Flow that's just right for you.

• [Other Separation Equipment](#)

Sweco also carries several lines of complementary separation products for specialty applications. These include our Sta-Sieve Stationary Screener for dewatering and effluent cleanup, White Water Filter for paper water preparation and filtration, Centrifugal Sifter for various application separation, Turbo-Screen Air classifier for fine particle classification, and Integrated Screen Press for increased feed rates and dryer solids.

• [Aftermarket Parts/Screens](#)

Sweco separator aftermarket parts are made to tough, precise standards. Careful materials selection, rigorous quality control and unsurpassed manufacturing methods assure correct fit, superior wear resistance and longer service life for everything from clamp rings to covers. For quality, service and performance you can count on, insist on the best ... insist on Sweco.

• [Grinding Mills](#)

Sweco Vibro-Energy Grinding Mills. The most versatile line of mills available today for fast, low-cost particle size reduction to

sub-micron range. Wet or dry grinding. With or without particle-size classification. Closed or open-circuit processing. From small lab batches to full production grinding.

- **[Finishing Mills](#)**

Ever since Sweco pioneered the concept of round-bowl vibratory finishing, there have been imitators producing "Sweco-clones". And although they can make their equipment look like a Sweco, getting it to match our performance ... well, that's another story. When you look closely at us, and our competition, we think you'll agree that Sweco truly offers the best built, best warranted finishing mills in the industry.

- **[Industrial Treatment Services Equipment](#)**

Sweco has been building equipment for the industrial processing industry for many years, utilizing their innovative engineering, design and development. We have now extended this expertise into the broad spectrum of environmental compliance applications through a full line of Treatment Services, including Enhanced Stabilization Systems, Liquid/Solid Separation, Dewatering Systems, Water Treatment, and Soil Washing.

- **[Pharmaceutical](#)**

A fully contained Vibro-Energy Separator suitable for aseptic processes in the pharmaceutical industry. With a design that eliminates gaps, crevices and hidden areas, the PharmASep proves valuable to those processes handling potent and/or toxic substances where containment is an important issue.

- **[Wire Mesh](#)**

Southwestern Wire Cloth and United Wire are your most comprehensive sources for wire cloth products because we maintain two of the largest and most complete inventories in the industry. This allows us to meet more of your specific requirements quickly. We can weave to the most exacting custom requirements and offer precision slitting of coils to exact tolerance widths and mesh calendaring to a specific thickness.

Industries

CHEMICAL INDUSTRY

The chemical industry is more diverse than virtually any other U.S. industry. Its products are omnipresent. Chemicals are the building blocks for products that meet our most fundamental needs for food, shelter, and health, as well as products vital to the high technology world of computing, telecommunications, and biotechnology. (SIC Code: Major Group 28)

FOOD & BEVERAGE INDUSTRY

The U.S. food and beverage processing industry is comprised of more than 1.5 million individuals established for the manufacturing or processing of foods and beverages for human consumption, and other certain related products. (SIC Code: Major Group 20)

POWDER COATING INDUSTRY

The powder coating industry consists of various chemical products, such as synthetic fibers, plastics materials, dry colors and pigments to be used by establishments engaged in the further manufacturing of products in other industries. (SIC Code: 2851 and various others)

PHARMACEUTICAL INDUSTRY

The pharmaceutical industry establishments primarily engage themselves in the manufacturing, fabrication, or processing of drugs in pharmaceutical preparations for human or veterinary use. The drugs are usually finished in the form intended for final consumption. (SIC Code: 2834)

Lab Testing

Sweco Assures Optimal Processing Performance

The **Sweco Technology Center**, located in Florence, Ky., has been set up to provide comprehensive separation and grinding test analysis of most material. The Technology Center consists of a Pilot Plant (full testing facility) and a Particle Lab. With the use of our wide range of test machines, Sweco can determine process feasibility and provide detailed Sieve Analysis or Microtrac Analysis of the materials before and after processing. With our "scaling" capabilities, we can also determine capacities on various machine sizes.

Pilot Plant

Requirement: The Pilot Plant can handle wet or dry test samples of nearly any size or volume. Objective: Each Pilot Plant test objective is to determine the feasibility, mesh sizes, capacity, efficiency, optimal settings and machine size.

Particle Lab

The Particle Lab consists of three services in itself: Particle Analysis, Optical Screen Comparison, and Sieve Analysis. The interpretation of tests is considered in the Particle Lab. Whether the test requires an analysis of the application's particle distribution or the shape of the material itself, the Particle Lab can perform the task quickly, effectively and accurately.

Centrifuge Testing Trailer

Sweco offers a completely equipped centrifuge trailer to perform full-scale on-site centrifuge performance demonstrations at a customer's plant or waste treatment site. The trailer is fully equipped with a Sweco 518 Centrifuge, Polymer Mix/Dispense System, Product Feed Pump, Effluent Return System with a pump and Solids Discharge System. This system is also equipped with a complete set of water testing instruments and is supplied with a trained Sweco Industrial Waste Treatment Service Engineer.

Used Equipment

Sweco is #1 in the industry when it comes to manufacturing processing and finishing equipment that lasts. That's why so many companies use their Sweco Separators and Mills for more than 30 years on average . . . some even longer. There are times, however, that a customers' process changes and they no longer need their Sweco equipment. From this, Sweco is able to acquire a stock of previously owned equipment and offer it to its customers.

So if you're searching for a less expensive alternative, and you still want to own quality Sweco equipment, look to the original manufacturer of the equipment . . . look to Sweco.

Separate solids from liquids or segregate dry materials into various sizes. Particles as fine as 400 mesh (37 microns) can be screened, with up to 4 screen decks incorporated in one Sweco separator. No special flooring or foundation is needed and less working floorspace is required. Simple and efficient design requires less horsepower. Other features include long screen life and ease with which screen may be changed.

Basically, the Sweco Separator is a screening device that vibrates about its center of mass. Vibration is accomplished by eccentric weights on the upper and lower ends of the motion-generator shaft. Rotation of the top weight creates vibration in the horizontal plane, which causes material to move across the screen cloth to the periphery. The lower weight acts to tilt the machine, causing vibration in the vertical and tangential planes. The angle of lead given the lower weight with relation to the upper weight provides variable control of the spiral screening pattern. Speed and spiral pattern of material travel over the screen cloth can be set by the operator for maximum throughput and screening efficiency of any screenable product ... wet or dry ... heavy or light ... coarse or fine ... hot or cold.

New technology adapts ultra-fine screen mesh for use in rectangular high-capacity separators (36 ft.2), yielding benefits previously found only on small circular screens. Fine-mesh screen panels can be installed in five minutes without tools on some models. Once in place, an O-ring system creates a positive seal against bypass.

Means correct fit, superior wear resistance, and longer service life. Authentic SWECO parts and inventory options assure you of "panic-free" processing.

Our fully computerized inventory management system assures the parts you need will be in stock and on their way to you quickly.

With authentic SWECO parts, you can depend on correct fit, superior wear resistance, and longer service life.

Our careful materials selection, stringent quality control, and unique manufacturing methods are unmatched by any third-party parts supplier.

When you compare [Supertaut Plus](#) with the others, you'll see . . . there is no comparison. The superbond adhesive, developed by Sweco engineers, encapsulates the wire screen mesh to the maximum strength tension-support ring to form a seal which eliminates any crevice or pits commonly found in spot-welded screens.

Products - Grinding Mills

Sweco® Vibro-Energy®

Grinding Mills are the most versatile line of mills available today for fast, low-cost particle size reduction to sub-micron range. Vibro-Energy grinding action achieves higher output per input horsepower; precise control of size and distribution. Product contamination from media and lining wear is virtually eliminated. Maintenance costs are low because of few moving parts and replaceable linings made of abrasion-resistant metal, ceramic or elastomers.

The Sweco Vibro-Energy Mill's unique vibratory motion, coupled with the use of cylindrical media, allows a dense packing of the media bed assuring maximum media surface contact and minimum void area when operated under a low energy condition. Feed materials as large as 300 microns can be reduced to sub-micron sizes.

In the high energy configuration, feed materials as large as twelve inch agglomerates have been successfully milled and solid particles of a half inch are being reduced to a d50 of 5 microns.

The low energy condition is reserved for wet milling whereas the higher energy mode can be used either wet or dry.

High Amplitude Wet or Dry Mills

Specifically designed for wet or dry grinding, the high amplitude Vibro-Energy Grinding Mills range from 1 ft³ (36 liters) to 75 ft³ (1,934 liters) of volume. Typical applications include

Models

DM1, DM4, DM10, DM20, DM28, DM70

Products - Finishing Mills

Time-tested technology provides three-dimensional Vibro-Energy® Motion. This motion subjects parts and media to a consistent high frequency tilting movement as they travel in a helical/orbital path around the chamber. The resulting compressive scrubbing action cleans and also removes burrs, round sharp corners, and smooths out surface impressions. Because vertical/horizontal amplitudes and the rate of vibration are completely adjustable, your finishing requirements can be handled quickly and efficiently.

Batch Mills

Sweco Batch Finishing Mills are ideally suited for use with external separating systems, manual parts unloading and for processes that have no media and the entire load can be easily discharged out the bottom door.

Models

[FM-1.2C](#), [FM-3LR](#), [FM-3C](#), [FM-4LR](#), [FM-10V](#), [FM-10C](#), [FM-14LR](#), [FM-20HA](#), [FM-24LR](#)

Long Radius Mills

Sweco Long Radius Finishing Mills provide a convenient means for separating parts from media. The DLR series provides both batch automatic and continuous finishing. Internal parts and media separation mills utilize a swing blade and a fixed separation screen mounted within the unit. The long-radius toroidal chamber design has excellent discharge characteristics.

Models

Spiral Mills

Sweco Spiral Finishing Mills or SLR series mills make available a long-radius spiral finishing chamber featuring fully-automatic parts/media separation utilizing an air-operated discharge gate and a fixed separating screen. Even unusual shapes and sizes discharge easily. These units are suitable for a wide range of finishing applications (including ball burnishing and media finishing) both batch and continuous. One of the most essential features on these mills is the long retention time of parts for single pass applications.

Products - Industrial Treatment Services Equipment

Sweco has expanded its product line to include decanting centrifuges and waste treatment services using field-proven technologies from Swaco. For over 60 years, Swaco has been a global leader in providing quality fluid processing equipment and waste management services to a variety of industries. Now Sweco, A Business Unit of Swaco, offers the same successful technologies exclusive to the industrial market.

Equipment

- Centrifuges
- Hydrocyclones
- Shakers
- Vortex Clarifiers
- Vacuum Solids Transport Systems
- Pneumatic Solids Transport Systems
- Thermal Phase Separating Systems
- Stack Disc Centrifuges

Process Evaluation

Feature: Sweco has expanded our laboratory services to include centrifuge and polymer flocculation application testing.

Benefit: Rapid response to feasibility tests.

Feature: Sweco conducts on-site waste mremediation evaluations to identify the most efficient method of waste treatment and management.

Benefit: Produces proposals tailored to customer needs.

Feature: Sweco offers on-site, full-scale centrifuge with polymer flocculation systems and thermal desorption demonstrations.

Benefit: Allows clients to witness real-time results and make informed decisions.

Products - Pharmaceutical

A fully contained Vibro-Energy Separator suitable for aseptic processes in the pharmaceutical industry. With a design in the pharmaceutical industry. With a design that eliminates gaps, crevices and hidden areas, the PharmASep proves valuable to those processes handling potent and/or toxic substances where containment is an important issue. The PharmASep, with clean-in-place and steam-in-place capabilities, enables users to properly clean the machine without the need to disassemble and re-assemble, reducing downtime and ultimately increasing productivity. In the case of wet sieving, the PharmASep can dewater the product on the screen, apply vacuum, dry and discharge the dried product, eliminating the necessity for separate vacuum drying.

[•Glossary](#)

Today, United Wire and Southwestern Wire Cloth are modern expanding companies specializing in woven wirecloth, screens and filters. We specialize in technically challenging applications and have developed our research, technical and manufacturing resources in order to meet the diverse needs of our customers.

We believe that only by continuous improvement of our processing techniques and by the continuous development of our product range will we be able to sustain our growth and our competitiveness in the world market.

Our commitment to provide our customers with world class products and service has made us the number one producer of wirecloth products in many locales.

You may download material displayed on the Site for non-commercial, personal use only, provided you also retain all copyright and other proprietary notices contained on the materials. You may not, however, distribute, modify, transmit, reuse, report, or use the contents of the Site for public or commercial purposes, including the text, images, audio, and video without Sweco written permission.

Your access and use of the Site is also subject to the following terms and conditions ("Terms and Conditions") and all applicable laws. By accessing and browsing the Site, you accept, without limitation or qualification, the Terms and Conditions and acknowledge that any other agreement between you and Sweco are superseded and of no force or effect.

Terms and Conditions

1. You should assume that everything you see or read on the Site is copyrighted unless otherwise noted and may not be used except as provided in these Terms and Conditions or in the text on the Site without the written permission of Sweco. Sweco neither warrants nor represents that your use of materials displayed on the Site will not infringe rights of third parties not owned or affiliated with Sweco.
2. Sweco makes no warranties or representations as to the accuracy or completeness of the information on the Site. Sweco assumes no liability or responsibility for any errors or omission in the content on the Site.
3. Your use and browsing of the Site is at your risk. NEITHER Sweco NOR ANY OTHER PARTY INVOLVED IN CREATING, PRODUCING, OR DELIVERING THE SITE SHALL BE LIABLE FOR ANY DIRECT, INCIDENTAL, CONSEQUENTIAL, INDIRECT, OR PUNITIVE DAMAGES ARISING OUT OF YOUR ACCESS TO, OR USE OF, THE SITE, WITHOUT LIMITING THE FOREGOING, EVERYTHING ON THE SITE IS PROVIDED TO YOU "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT. Please note that some jurisdictions may not allow the exclusion of implied

warranties, so some of the above exclusions may not apply to you. Check your local laws for any restrictions or limitations regarding the exclusion of implied warranties. Sweco also assumes no responsibility, and shall not be liable for any damages to, or viruses or other harmful code that may infect, your computer software or hardware or other property on account of your access to, use of, or browsing in the Site or your downloading of any materials, data, text, images, video, or audio from the Site.

4. Any communication or material you transmit to the Site by electronic mail or otherwise, including any data, questions, comments, suggestions, or the like is, and will be treated as non-confidential and non-proprietary to the extent that notwithstanding the foregoing you acquire any proprietary rights in anything you so transmit or post, you hereby grant to Sweco, and its affiliates a royalty-free, perpetual, worldwide license to use such material for any purpose, including but not limited to reproduction, disclosure, transmission, publication, broadcast, and posting or any other comment or non-comment use. Furthermore, Sweco is free to use ideas, concepts, know-how, or techniques contained in any communication you send to the Site for any purpose whatsoever, including but not limited to developing, manufacturing, and marketing products for commercial sale using such information.

5. Images of people or places displayed on the Site are either the property of, or used with permission by, Sweco. The use of these images by you, or anyone else authorized by you, is prohibited unless specifically permitted by these Terms and Conditions or specific permission provided elsewhere on the Site. Any unauthorized use of the images may violate copyright laws, trademark laws, the laws of privacy and publicity, and communications regulations and statutes.

6. The trademarks, logos, and service marks (collectively the "Trademarks") displayed on the Site, including Sweco, Vibro-Energy, Sono-Energy, Turbo Screen, and Supertaut are registered and unregistered Trademarks of Sweco. Nothing contained on the Site should be construed as granting, by implication, estoppel, or otherwise, any license or right to use any Trademark displayed on the Site without the written permission of Sweco or such third party that may own the Trademarks displayed on the Site. Your misuse of the Trademarks displayed on the Site, or any other content on the Site, except as provided in these Terms and Conditions, is strictly prohibited. You are also advised that Sweco will aggressively enforce its intellectual property rights to the fullest extent of the law, including the seeking of criminal prosecution, where applicable.

7. Sweco has not reviewed all of the sites linked to the Site and is not responsible for the contents of any off-site pages or any other sites linked to the Site. Your linking to any other offsite pages or other sites is at your own risk.

8. Although Sweco may from time to time monitor or review discussions, chats, postings, transmissions, bulletin boards, and the like on the Site, Sweco is under no obligation to do so and assumes no responsibility or liability arising from the content of any such locations nor for any error, defamation, libel, slander, omission, falsehood, obscenity, pornography, profanity, danger, or inaccuracy contained in any information contained within such locations on the Site. You are prohibited from posting or transmitting any unlawful, threatening, libelous, defamatory, obscene, scandalous, inflammatory, pornographic or profane material or any material that could constitute or encourage conduct that would be considered a criminal offense, give rise to civil liability, or otherwise violate any law. Sweco will fully cooperate with any law enforcement authorities or court order requesting or directing Sweco to disclose the identity of anyone posting any such information or materials.

9. Sweco may at any time revise these Terms and Conditions by updating this posting. If you access the Site after any such revision, you will be bound by any such revisions. You should therefore periodically visit this page to review the then current Terms and Concessions to which you are bound.
