## TECHNOLOGIES AND KNOW HOW TRANSFER

### **Swiss-made to stay stable and perfect**

High game decorative and finishing technologies in luxurious jewelry, watch-making and fancy articles

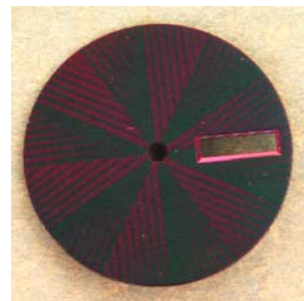

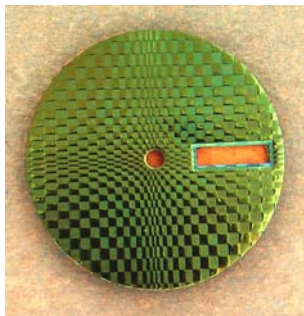

1. Advanced technologies in Decorative Patterns Realized by Colored Engraving, Electroforming and Etching on metallic and non-metallic surfaces (PVD, Vacuum metal plating and Electroplating).
2. Decorative patterns and coloring realized on any metallic or non-metallic surface (precious metals, stainless steel, ceramics, glass, sapphire etc.).
3. Structural objects-integration of any metallic, mineral and precious stones into a solid metallic form (jewelry and watch making).
4. Micro-forming: Electro-forming and Chemical etching

**If you are interested for any of here listed technologies, please contact MPI**

# 1. Decorative Patterns Realized by Colored Engraving, Electroforming and Etching on metallic and non-metallic surfaces

## 2. Colorized decoration realized using selective deposition

## 3. Structural metallic integration of metallic and non-metallic materials

#### 4. Micro-forming: Electro-forming and Chemical Etching
